AGA KHAN UNIVERSITY EXAMINATION BOARD

Notes from E-Marking Centre on SSC-II Islamiyat Annual Examinations 2024

Introduction

This document has been produced for the teachers and candidates of Secondary School Certificate (SSC) Part II Islamiyat. It contains comments on candidates' responses to the 2024 SSC-II Examination indicating the quality of the responses and highlighting their relative strengths and weaknesses.

E-Marking Notes

This includes overall comments on candidates' performance on every question and *some* specific examples of candidates' responses that support the mentioned comments. Please note that the descriptive comments represent an overall perception of the better and weaker responses as gathered from the e-marking session. However, the candidates' responses shared in this document represent some specific example(s) of the mentioned comments.

Teachers and candidates should be aware that examiners may ask questions that address the Student Learning Outcomes (SLOs) in a manner that requires candidates to respond by integrating knowledge, understanding and application skills they have developed during the course of study. Candidates are advised to read and comprehend each question carefully before writing the response to fulfill the demand of the question.

Candidates need to be aware that the marks allocated to the questions are related to the answer space provided on the examination paper as a guide to the length of the required response. A longer response will not in itself lead to higher marks. Candidates need to be familiar with the command words in the SLOs which contain terms commonly used in examination questions. However, candidates should also be aware that not all questions will start with or contain one of the command words. Words such as 'how', 'why' or 'what' may also be used.

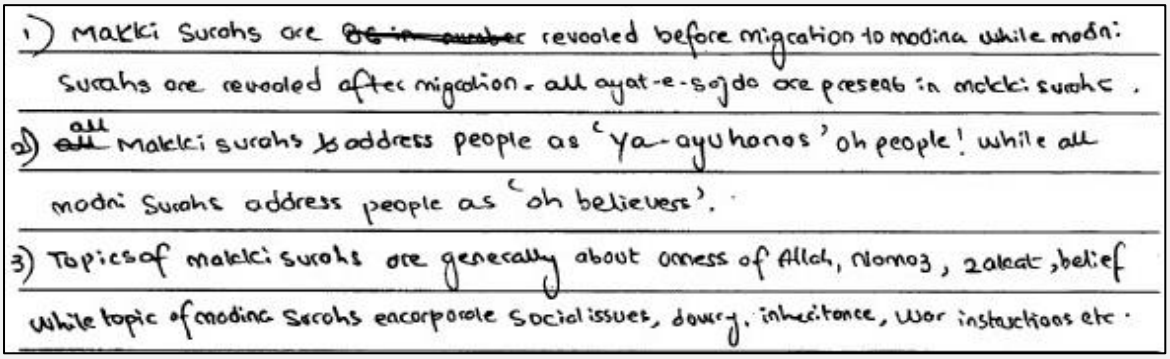

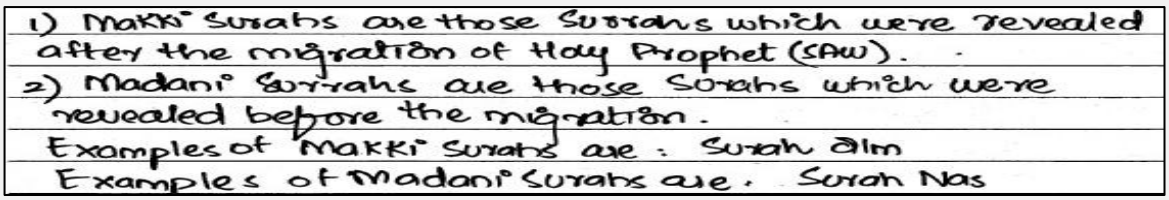

General Observations

The overall performance of the entire cohort in the examination indicates that the majority of candidates used their time effectively by offering relevant and focused responses that attempted to address the questions as instructed. Their responses demonstrated relevance and corresponded with the requirements. However, the candidates seemed challenged in the questions related to Battles. It was also observed that candidates struggled to construct their responses as per the command words used in the questions.

Note: Candidates' responses shown in this report have not been corrected for grammar, spelling, format, or information.

When teachers explain the difference between Hadith and *Sunnah*, they should provide clear examples to help students understand the distinction. For instance, they can explain that Hadith refers to specific sayings of the Holy Prophet Muhammad (PBUH), such as the Hadith where he said, "Actions are judged by intentions." In contrast, *Sunnah* encompasses the broader practices and behaviours of the Holy Prophet (PBUH), like the way he performed daily prayers. By illustrating these differences with concrete examples, students will be able to grasp how Hadith provides individual pieces of guidance, while *Sunnah* represents the overall conduct and lifestyle of the Holy Prophet Muhammad (PBUH).

Any Additional Suggestion:
When teachers discuss the applications of Hadith, it is important that they first ensure students thoroughly understand the Hadith itself. Observations show that students who struggle to apply Hadith often lack a clear comprehension of its meaning and context. Therefore, a strong foundational understanding of the Hadith is essential before moving on to its practical applications. By focusing on ensuring that students grasp the Hadith fully, teachers can better prepare them to apply its teachings effectively in various aspects of their lives. This approach will enhance the students' ability to integrate Hadith into their personal and communal practices.

Any Additional Suggestion:
When teachers explain the responsibilities imposed on the Prophet (PBUH), they should provide clear explanations for each responsibility with illustrative examples to ensure candidates fully understand. For instance, when discussing 'the Book', clarify that it refers to the Holy Qur'an. Teachers should explain that the Holy Qur'an is the final *Shariah*, containing divine commands and guidance. They should provide examples to show how it was the Holy Prophet's (PBUH) responsibility to convey its revelations to all humans. Similarly, illustrate how the Holy Prophet (PBUH) communicated the teachings of the Holy Qur'an through his sermons, actions, and personal conduct.

Checking Hints	Give ONE mark for writing a conclusion about the Khyber invasion (THREE required).
Overall Performance	This question was focused on the outcomes of the Khyber invasion. Candidates' responses were generally unsatisfactory. Many candidates described situations and events that were related to other battles rather than directly addressing the specific outcomes of Battle of Khyber.
Description of Better Responses	In better responses, candidates were accurately able to explain the outcomes of Battle of Khyber. They mentioned, Muslims suffered severe financial losses; Muslims came down from the hill with arrows (Battle of Uhud), and The Holy Prophet (PBUH) ordered to dig trenches (Battle of Trench). These answers were not relevant to Khyber campaign, reflecting a misunderstanding of the historical context and details related to the question.

These visual tools will help students gain a clearer and more accurate understanding of each battle's context and significance. By providing a structured visual representation, teachers can facilitate better comprehension and retention of the details and outcomes of each Battle, ensuring that students grasp the historical and strategic aspects more effectively.

Annexure A: Pedagogies Used for Teaching the SLOs

Pedagogy: Storyboard
Description: A visual pedagogy that uses a series of illustrated panels to present a narrative, encouraging creativity and critical thinking. It helps learners organise ideas, sequence events, and comprehend complex concepts through storytelling.
Example: In a Literature class, students are tasked with creating storyboards to visually retell a novel. They draw key scenes, write captions, and present their stories to the class, enhancing their reading comprehension and fostering their imagination.

Pedagogy: Cause and Effect
Description: This pedagogy explores the relationships between actions and consequences. By analysing cause-and-effect relationships, learners develop a deeper understanding of how events are interconnected and how one action can lead to various outcomes.
Example: In a History class, students study the causes and effects of the Industrial Revolution. They research and discuss how technological advancements in manufacturing led to significant societal changes, such as urbanisation and labour reform movements.

Pedagogy: Fish and Bone
Description: A method that breaks down complex topics into main ideas (the fish) and supporting details (the bones). This visual approach enhances comprehension by highlighting essential concepts and their relevant explanations.
Example: During a Biology class on human anatomy, the teacher uses the fish and bone technique to teach about the human skeletal system. Teacher presents the main components of the human skeleton (fish) and elaborates on each bone's structure and function (bones).

Pedagogy: Concept Mapping
Description: An effective way to visually represent relationships between ideas. Learners create diagrams connecting key concepts, aiding in understanding the overall structure of a subject and fostering retention.
Example: In a Psychology assignment, students use concept mapping to explore the various theories of personality. They interlink different theories, such as Freud's psychoanalysis, Jung's analytical psychology, and Bandura's social-cognitive theory, to see how they relate to each other.

Pedagogy: Audio Visual Resources
Description: Incorporating multimedia elements like videos, images, and audio into lessons. This approach caters to different learning styles, making educational content more engaging and memorable.
Example: In a General Science class, the teacher uses a documentary-style video to teach about the solar system. The video includes stunning visual animations of the planets, interviews with astronomers, and background music, enhancing students' interest and understanding of space.

Pedagogy: Think, Pair, and Share
Description: A collaborative learning technique where students ponder a question or problem individually, then discuss their thoughts in pairs or small groups before sharing with the entire class. It fosters active participation, communication skills, and diverse perspectives.
Example: In a Literature in English class, the teacher poses a thought-provoking question about a novel's moral dilemma. Students first reflect individually, then pair up to exchange their opinions, and finally participate in a lively class discussion to explore different viewpoints.

Pedagogy: Questioning Technique (Socratic Approach)
Description: Based on Socratic dialogue, this method stimulates critical thinking by posing thought-provoking questions. It encourages learners to explore ideas, justify their reasoning, and discover knowledge through a process of inquiry.
Example: In an Ethics class, the instructor uses the Socratic approach to lead a discussion on the meaning of justice. By asking a series of probing questions, the students engage in a deeper exploration of ethical principles and societal values.

Pedagogy: Practical Demonstration
Description: A hands-on approach where learners observe real-life applications of theories or skills. Practical demonstrations enhance comprehension, skill acquisition, and problem-solving abilities by bridging theoretical concepts with real-world scenarios.
Example: In a Food and Nutrition class, the instructor demonstrates the proper technique for filleting a fish. Students observe and then practice the skill themselves, learning the practical application of knife skills and culinary precision.
