Business Statistics Paper I

Time: 30 minutes Marks: 20

KUEB May Examination 2017

INSTRUCTIONS

1. Read each question carefully.
2. Answer the questions on the separate answer sheet provided. DO NOT write your answers on the question paper.
3. There are 100 answer numbers on the answer sheet. Use answer numbers 1 to 20 only.
4. In each question there are four choices A, B, C, D. Choose ONE. On the answer grid black out the circle for your choice with a pencil as shown below.

Candidate's Signature

5. If you want to change your answer, ERASE the first answer completely with a rubber, before blacking out a new circle.
6. DO NOT write anything in the answer grid. The computer only records what is in the circles.
7. You may use a scientific calculator if you wish.

1. Which of the following is a continuous variable?

   A. Height of Pakistani hockey players
   B. Blood group of Pakistani hockey players
   C. Number of gold medals won by Pakistani hockey team
   D. Number of hockey sticks used by Pakistani players in a tournament

2. Inferential Statistics deals with

   A. deduction of data.
   B. collection of data.
   C. presentation of data.
   D. organisation of data.

3. In statistics, all the registered voters in Pakistan would constitute a

   A. population.
   B. parameter.
   C. sample.
   D. statistic.

In the given table, typing errors of 30 typists in a particular report are shown. Answer Q.4, Q.5 and Q.6 using this table.

Number of Errors	Number of Typists
5 – 9	3
10 – 14	8
15 – 19	4
20 – 24	5
25 – 29	10

4. The class mark of the class interval corresponding to frequency 5 is

   A. 20
   B. 20.5
   C. 22
   D. 22.5

5. The class width of the given frequency distribution is

   A. 4
   B. 5
   C. 10
   D. 25

6. The median class of the given data is

   A. 10 – 14
   B. 15 – 19
   C. 20 – 24
   D. 25 – 29

AKU-EB May Examination 2017

In a survey, employees of a company were asked their preferred menu from choices *A*, *B* and *C*. The results are represented in the pie chart below. Answer questions Q.7 and Q.8.

7. The percentage of employees that prefer menu *C* is

   A. 28%
   B. 38%
   C. 46%
   D. 56%

8. The angle corresponding to the menu *A* is

   A. 4.4º
   B. 16º
   C. 22.5º
   D. 57.6º

9. Class marks of a frequency distribution are required to represent it as a

   A. histogram.
   B. frequency polygon.
   C. subdivided bar chart.
   D. cumulative frequency curve.

10. The mean weight of twenty objects was calculated to be 196 grams. However, it was found later that due to an error in the weighing machine, the weight of each object had been recorded with an increase of 3 grams. The mean of the original weights in grams, therefore, will be

    A. 136
    B. 193
    C. 196
    D. 199

AKU-EB May Examination 2017

The daily two-sided travelling expense (in Rupees) of 6 students is 25, 50, 30, 43, 30, and 20. If the expense is the same for both sides, answer Q.11, Q.12 and Q.13.

11. The daily two-sided mean expense is

A. Rs 8.25
B. Rs 16.5
C. Rs 33
D. Rs 66

12. The mean deviation of the daily two-sided travelling expense of 6 students is

A. Rs 0
B. Rs 1.63
C. Rs 9
D. Rs 21

13. The range of the daily two-sided travelling expense of 6 students is

A. Rs 5
B. Rs 23
C. Rs 30
D. Rs 50

14. An entry test for mathematics department comprises of two parts, Mathematics and English, having different weights. The marks obtained by a particular student in the test and the weight of the subjects are given in the following table.

Part	Marks Obtained	Weight
Mathematics	50	8
English	30	2

The weighted arithmetic mean of the marks obtained by the student is

A. 5.75
B. 8
C. 40
D. 46

AKU-EB May Examination 2017

15. The given table shows the average price (in Rupees per kilograms) of the most used vegetables in Karachi for the years 2000 and 2015.

Vegetable	Average Price (Rs/ kg)	
	2000	2015
Onion	15	22
Potatoes	12	20
Tomatoes	30	35

(**Note**: Based on fictitious data)

The aggregate price index (of these commodities) for the year 2015, taking year 2000 as base period, is

A. 174.1%
B. 135.1%
C. 74.1%
D. 35.1%

16. If the simple price index of a certain commodity for the year 2015, taking year 1995 as base period, is 171.4%, then it means that the price of this commodity in 2015, as compared to 1995, is

A. 71.4% higher.
B. 17.14% higher.
C. 71.4% lower.
D. 17.14% lower.

17. The number of possible ways to choose 3 students from a class of 18 is

A. 54
B. 816
C. 5,832
D. 4,896

18. The number of four-lettered arrangements using the letters of the word BLUE, without repetition, is

A. 4
B. 12
C. 24
D. 256

19. The number of two-digit numbers that can be formed, without repetition, using digits 1, 2, 3 and 4 are

A. 4
B. 6
C. 12
D. 16

AKU-EB May Examination 2017

20. If $P(A) = P(B) = a$ and $P(A \cap B) = b$, then $P(A \cup B)$ is equal to

A. $a + b$
B. $a - b$
C. $2a + b$
D. $2a - b$
