5. Due to high elevation and soil infertility, the mountainous people engage in the

A. agriculture industry.
B. marble industry.
C. livestock industry.
D. pharmaceutical industry.

6. All ancient human civilisations of the South Asia were based near the flowing rivers.

These rivers are MAJORLY considered as a source of the

A. first line of defence in case of any invasion.
B. fresh water for livelihood and irrigation.
C. economic resource for opting any sort of occupation.
D. transportation and communication for trade activities.

7. As per the demographic study of Pakistan, it is revealed that the east and southeast parts are thinly populated than the south and southwest parts of the country.

The MAJOR cause of this thin population is due to

A. high rate of rainfalls.
B. fertile and irrigated land.
C. large number of rivers and lakes.
D. arid mountainous and plateau regions.

Annual Examinations 2021
for
Teaching & Learning only

8. All of the following are examples of primary economic activities EXCEPT

A. forestry.
B. fishing.
C. mining.
D. pottery.

9. All of the following are factors that negatively affect the global fishing industries EXCEPT

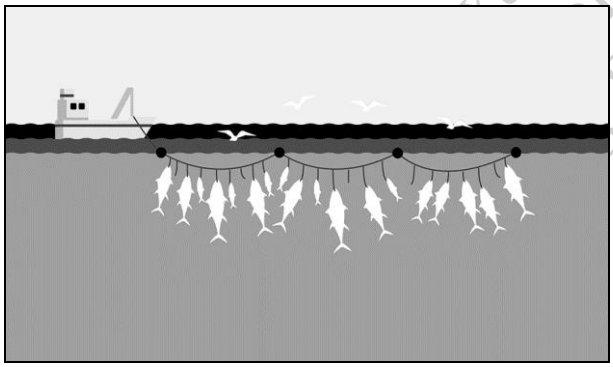

A. overfishing.
B. fish farming.
C. illegal fishing.
D. habitat damage.

10. According to the Food and Agriculture Organization of the United Nations (FAO) in 2018, the largest fish producer and exporter of the world is

(Source: www.FAO.org/state-of-fisheries)

A. India.
B. Japan.
C. China.
D. Indonesia.

11. The method of fishing depicted in the given picture is

A. gillnets.
B. demersal trawl.
C. longlines.
D. purse seine.

12. As per the economic survey of Pakistan 2020, the MAJOR contributing region of the livestock farming industry in Pakistan was

A. southern Punjab.
B. northern Punjab.
C. northern areas of KPK.
D. coastal areas of Makran Coast.

Examinations 2021
& Learning only

13. Livestock farming is considered as an important contributing factor in the economy of Pakistan.

As per the economic survey of Pakistan 2020, its contribution was accumulated to

A. 60.6% of the agriculture sector and 11.7% to the GDP.
B. 50.6% of the agriculture sector and 7.7% to the GDP.
C. 40.6% of the agriculture sector and 5.7% to the GDP.
D. 30.6% of the agriculture sector and 2.7% to the GDP.

14. As per the records of the international beef markets 2018-19, the largest livestock farming of beef in the world is by

A. Brazil.
B. China.
C. India.
D. Indonesia.

15. Following are the features of a type of forest.

- Located near the equator.
- Receives high temperatures and abundant rainfall throughout the year.
- Hugely dense, lush forest with canopies preventing sunlight from getting to the floor.
- A vital storehouse of biodiversity. Sustaining millions of different animals, birds, algae and fish species

On the basis of the above characteristics, the forest is identified as a

A. tropical forest.
B. temperate forest.
C. coniferous forest.
D. mediterranean forest.

16. Following are the features of natural vegetation:

- Herbs and shrubs are the dominant type of vegetation. They can be found on every continent except Antarctica.
- In cool and mild climates, like northwest Europe, these are dominated by oats that thrive the entire year.
- Temperate vegetation exists where there are seasonal variations in temperatures over the course of the year. Different types of herbs and shrubs thrive in different temperatures here.

The given features in the description classify

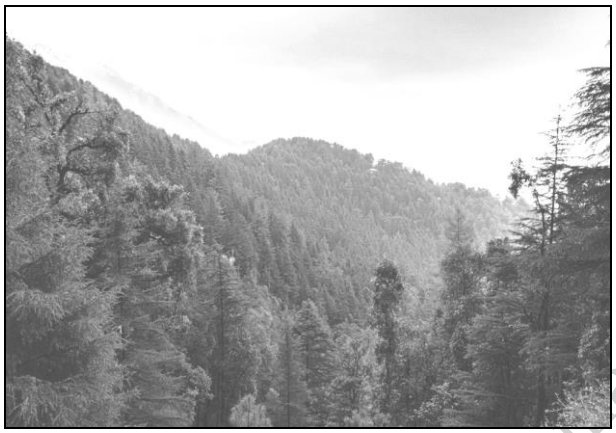

A. tundra.
B. forests.
C. grasslands.
D. desert vegetation.

Annual Examinations 2021 for Teaching & Learning only

17. The largest rainforest of the world is the

A. Congo.
B. Amazon.
C. Daintree.
D. Hutun Harapan Jambi.

18. The type of forest found in the northern areas of Pakistan, depicted in the given picture, is of the

A. Alpine forest.
B. Mangrove forest.
C. Bela forest.
D. Farmland forest.

19. The forest of Changa Manga is classified as a/ an

A. Bela forest.
B. Alpine forest.
C. Farmland forest.
D. Mangrove forest.

20. Read the following feasible conditions for the cultivation of a crop.

Temperature for cultivation	20° - 30°C
Temperature for harvesting	30° - 35°C
Rainfall	Above 500 -600 mm
Soil	Loamy, Clayey
Harvesting time	End of April and beginning of May

The above mentioned cultivation conditions are ideal for the growth of

A. rice.
B. maize.
C. wheat.
D. cotton.

Annual Examinations 2021 for Teaching & Learning only

21. Arman has established a plant nursery. He sells plants of small and medium sizes which can be set as decorative items in gardens, homes and offices.

With reference to the given situation, the farming done by Arman can be classified as

A. shift farming.
B. plantation farming.
C. mechanised farming.
D. commercial farming.

22. All of the following are considered as cash crops EXCEPT

A. corn.
B. coffee.
C. cotton.
D. coconut.

23. As per 2019-2020, the largest wheat producer of the world is

A. the European Union.
B. India.
C. China.
D. the United States of America.

24. In Pakistan, maize is MAINLY cultivated in the provinces of

A. Sindh and Baluchistan.
B. Baluchistan and Punjab.
C. Sindh and Khyber Pakhtunkhwa.
D. Punjab and Khyber Pakhtunkhwa.

25. Amna has established an embroidery workshop at her backyard where she manufactures traditional dresses.

The workshop that she has established can be classified as a

A. textile industry.
B. techno industry.
C. cottage industry.
D. cosmetic industry.

26. With reference to labour force participation, the largest industrial sector of Pakistan is the

A. sugar industry.
B. cotton industry.
C. power industry.
D. cement industry.

Annual Examinations 2021 for Teaching & Learning only

27. As per 2019-20, the industrial sector contributed 32% to Pakistan's GDP (gross domestic product), which is comparatively lower than other countries in Southeast Asia.

The reason for this comparatively lower contribution is the lack of

A. water resources.
B. availability of financial resources.

35. In the year 2020, the world's busiest port was

A. Dubai.
B. Mumbai.
C. Shanghai.
D. New York.

36. The Suez Canal is constructed between

A. Asia and Europe.
B. Asia and Australia.
C. Africa and Australia.
D. Antarctica and Europe.

37. The highway that connects the two port cities of Karachi and Gwadar is known as the

A. Indus highway.
B. Superhighway.
C. National highway.
D. Makran coastal highway.

38. The coastline area along the seabed which is used for lodging and anchoring launches, and fishing yards is classified as a

A. jetty.
B. dock.
C. wharf.
D. harbour.

39. Inland terminals that are interconnected with a seaport via road or rail transportation facilities, and which usually act as a centre of multimodal logistics.

The given description identified the port as

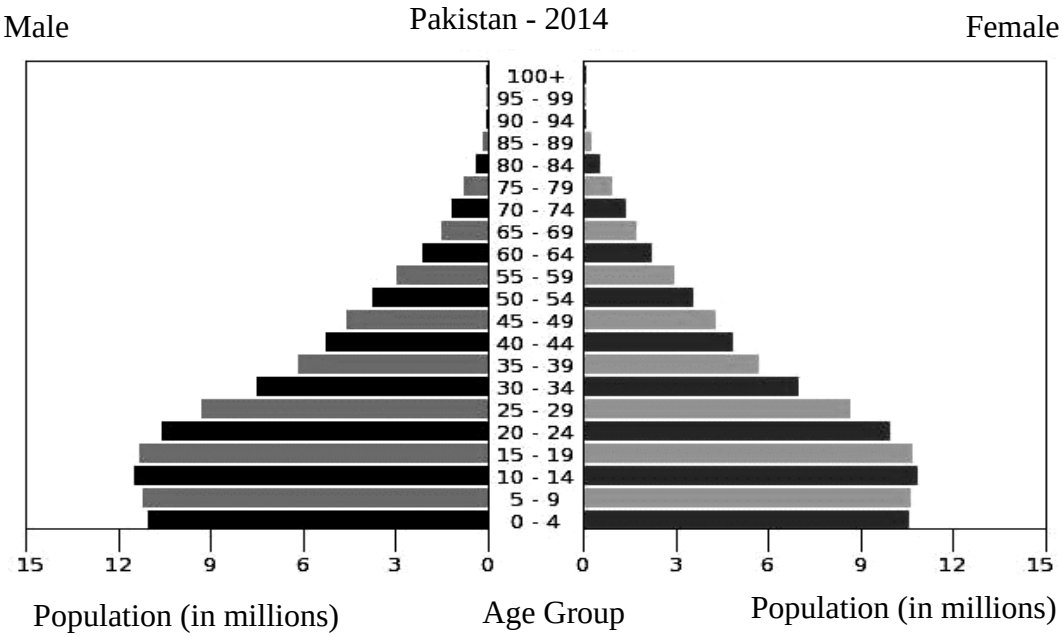

A. seaports.
B. entreports.
C. dry ports.
D. fishing ports.

Annual Examinations 2021 for Teaching & Learning only

40. With reference to key features of a seaport, which of the following is considered as the LEAST important feature of a seaport?

A. Connections to land transportation
B. Equipment and personnel to load and unload vessels
C. Connection to waterways for inland transfer of goods
D. Docks or berths where there are vessels moor and cargo storage area

41. Read the following graph.

The given population pyramid of Pakistan reflects that the country has a

A. low life expectancy ratio.
B. population growth rate is increasing.
C. high number of senior citizens.
D. greater number of children compared to its senior citizens.

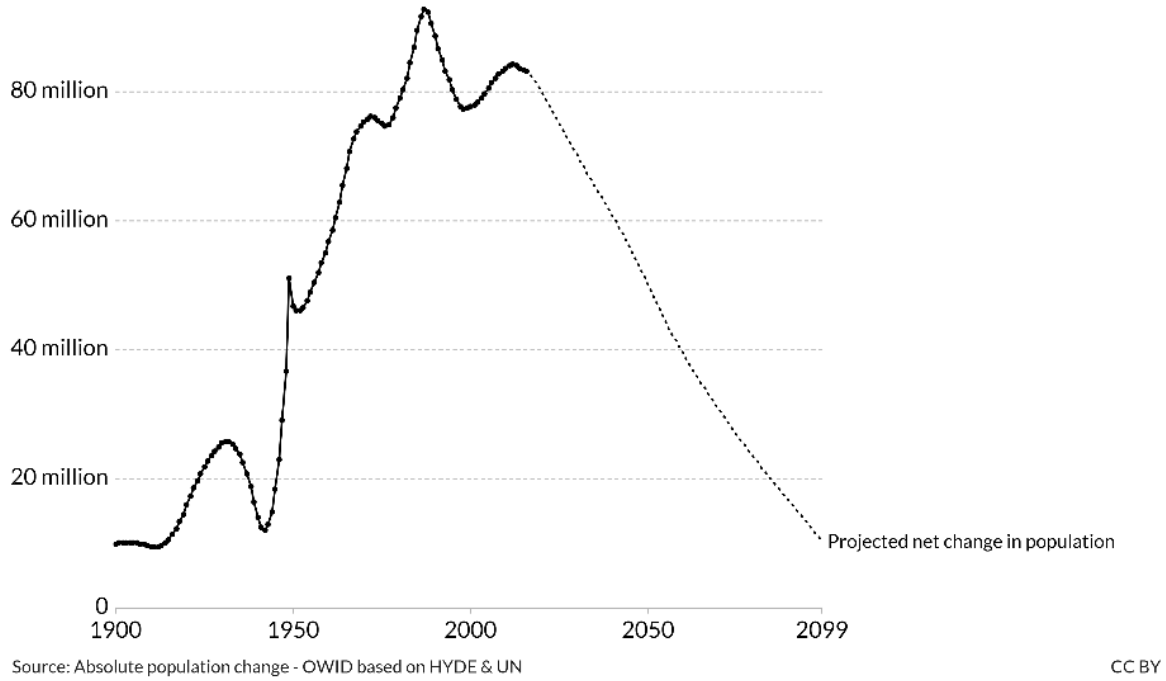

42. The rising level of a country's population can inversely affect its economy's

A. per capita income (PCI).
B. consumer price index (CPI).
C. gross domestic product (GDP).
D. human development index (HDI).

43. As per the records of 2020, the world's MOST densely populated country is

A. Monaco.
B. Rawanda.
C. Singapore.
D. Bangladesh.

44. The given graph shows the absolute increase in global population over the last two centuries.

The graph depicts that the human population exploded during 1950 to 1980, rapidly. It is because of

A. no outbreak of a pandemic.
B. global peace and prosperity.
C. the decrease in the mortality rate.
D. abundant availability of natural resources.

45. In recent decades, the MAJOR cause of the rapid rise of the death rate in the rural areas of Pakistan is the

A. spread of diseases.
B. lack of general health care facilities.
C. inconsistent law and order situations.
D. increase in floods and natural disasters.

46. The soil which is usually formed by the deposition in the river at the time of floods is known as

A. delta.
B. desert.
C. aeolian.
D. alluvium.

Aman Exams for Teaching & Learning

47. With reference to the administrative structure of Pakistan, **X** is the third tier of the federal government. However, with reference to the local government, **X** is the first tier.

The **X** in the given description identifies as a/ an

A. *tehsil*.
B. union.
C. district.
D. division.

48. If the issue of Kashmir is resolved, then according to the Pak-China agreement of 1963, the border line between both the countries will be discussed again.

The borderline which will be discussed again would be the

A. Durand line.
