AGA KHAN UNIVERSITY EXAMINATION BOARD

HIGHER SECONDARY SCHOOL CERTIFICATE

CLASS XII

ANNUAL EXAMINATIONS (THEORY) 2025

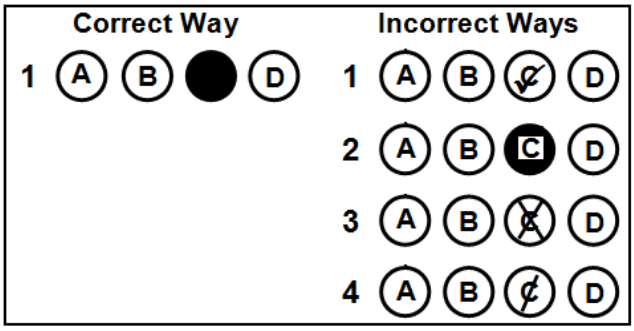

Computer Studies Paper I

Time: 1 hour 10 minutes Marks: 40

AKU-EB Annual Examinations 2025 For Teaching & Learning only

INSTRUCTIONS

1. Read each question carefully.
2. Answer the questions on the separate answer sheet provided. DO NOT write your answers on the question paper.
3. There are 100 answer numbers on the answer sheet. Use answer numbers 1 to 40 only.
4. In each question, there are four choices A, B, C, D. Choose ONE. On the answer grid, black out the circle for your choice with a pencil as shown below.

Candidate's Signature

5. If you want to change your answer, ERASE the first answer completely with a rubber, before blacking out a new circle.
6. DO NOT write anything in the answer grid. The computer only records what is in the circles.
7. You may use a scientific calculator if you wish.

1. A software that is NOT used to make presentations is

   A. Prezi.
   B. Canva.
   C. MS Access.
   D. PowerPoint.

2. The first stage of data processing cycle is

   A. input.
   B. output.
   C. storage.
   D. process.

3. Which of the following is a pointing input device?

   A. Barcode reader
   B. Keyboard
   C. Printer
   D. Mouse

4. Consider the following characteristics of a printer:

   - Compact in size, suitable for smaller workspaces or home
   - High-quality printing, especially for images and graphics
   - Versatile, capable of printing on various media types
   - Cost-effective, with lower installation cost

   The printer with given characteristics is identified as

   A. laser printer.
   B. inkjet printer.
   C. thermal printer.
   D. electrostatic printer.

5. On converting 5 KB into nibbles, we get

   A. 5000
   B. 5120
   C. 10240
   D. 40960

6. The phase of system development life cycle (SDLC) in which the wireframes and prototypes are made is

   A. design and development.
   B. testing and debugging.
   C. implementation.
   D. maintenance.

Annual Examinations 2025 AKU-EB For Teaching & Learning only

7. All of the following are the uses of computer in banking EXCEPT

   A. data analysis.
   B. record keeping.
   C. social networking.
   D. transaction management.

8. The PRIMARY purpose of computer simulation in healthcare industry is

   A. training.
   B. research.
   C. recruitment.
   D. emergency services.

9. Consider the given characteristics.

   - It is volatile.
   - It has the hierarchical structure.
   - It retains the most frequently used data.
   - It can store data as long as the power is supplied.

   The type of memory identified from the given characteristics is

   A. RAM.
   B. ROM.
   C. cache.
   D. register.

10. A CPU register that works on the principle of Last In First Out (LIFO) is

    A. memory address register.
    B. program counter.
    C. accumulator.
    D. stack.

11. The shortcut key in MS Word to undo the text is

    A. Ctrl+C
    B. Ctrl+V
    C. Ctrl+X
    D. Ctrl+Z

12. The tab that has text box option in MS Word is

    A. Draw.
    B. Insert.
    C. Layout.
    D. Design.

AKU-EB Annual Examinations 2025 for Teaching & Learning only

13. Consider the given image of an excel sheet.

	A	B
1	**Job Title**	**Number of Staff**
2	Director	3
3	Engineer	12
4	Analyst	5
5	Sales officer	9
6	Clerk	12

If the formula =COUNT(B1:B6) is applied, the output value will be

A. 5
B. 6
C. 29
D. 41

14. The database object that is used to present data in a formatted and visual manner is

A. form.
B. query.
C. report.
D. record.

15. An example of valid field name in MS Access is

A. Variable 1
B. 1Variable
C. Variable-1
D. Variable_1

16. Akram has applied a database relationship on two tables L and M. In this relationship, one row of table L is linked with only one row of table M.

The relationship that Akram has applied is

A. one-to-one.
B. one-to-many.
C. many-to-one.
D. many-to-many.

17. Fakhir wants to enter record in the database. The type of view he should use to perform this task is

A. Design view.
B. Datasheet view.
C. PivotChart view.
D. PivotTable view.

AKU-EB Annual Examinations 2025 for Teaching & Learning only

18. In MS Access, reports get their information from

A. forms.
B. tables.
C. queries.
D. modules.

19. Consider the given database table with Employee_ID as a primary key.

Employee_ID	**Employee_Name**	**Employee_Salary**
49	Ushba	90000
109	Sana	60000
79	Bashir	80000
48	Babar	115000

If we sort the Employee_Salary field in descending order, then the order of Employee_ID which will be returned in the output is

48 49 79 109	60000 80000 90000 115000
A	B
115000 90000 80000 60000	109 79 49 48
C	D

AKU-ED Annual Examinations 2025 For Teaching & Learning only

20. The step of problem solving in which programmer investigates all the aspects of a problem and gather as much information as possible is

A. analysing the problem.
B. planning solutions of the problem.
C. selecting the best solution of the problem.
D. preparing candid solutions of the problem.

21. Consider the given algorithm.

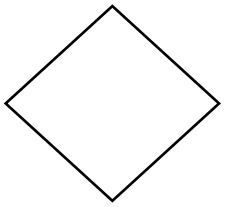

```
Step 1: Start
Step 2: X = 6
Step 3: Y = 4
Step 4: Z = X / Y * 4
Step 5: Output Z
Step 6: Stop
```

The output of this algorithm is

(**Note:** X and Y represents integer.)

A. 0
B. 2
C. 4
D. 8

22. Consider the given flowchart symbol.

This symbol is used to represent the

A. decision in a flowchart.
B. processing in a flowchart.
C. off-page connector in a flowchart.
D. starting and ending in a flowchart.

23. Following are the features of programming languages:

I. It uses mathematical operators and English words.
II. It deals with variables, stacks etc.
III. It is machine dependent.

The feature(s) that do/ does NOT belong to low level programming is/ are

A. I only.
B. III only.
C. I and II.
D. II and III.

AKU-EB Annual Examinations 2025 for Teaching & Learning only

24. The advantage(s) of C language over other programming languages is/ are

I. it is a portable language.
II. it is a middle level language.
III. it is an object-oriented programming language.

A. I only.
B. III only.
C. I and II.
D. II and III.

25. The menu in a C language editor that typically includes options for searching and replacing text within the code is

A. File
B. Edit
C. View
D. Tools

26. In C language, a function ends with a

A. bracket.
B. semicolon.
C. right brace.
D. right parenthesis.

27. The stage of the compilation process that translates the generated assembly code into machine-executable code is

A. preprocessing.
B. compilation.
C. assembling.
D. linking.

28. The file extension of an executable file in C language is

A. .c
B. .lib
C. .obj
D. .exe

29. Comments can be helpful in debugging C code by

A. generating error messages when code is commented out.
B. identify specific areas of the code for debugging.
C. automatically fixing syntax errors in the program.
D. providing additional functionality to the compiler.

Annual Examinations 2025 AKU-EB for Teaching & Learning only

30. The data type that can store the smallest non-decimal value is

A. int
B. long
C. float
D. double

31. The function that is used to read a character from the keyboard without echoing it to the screen is

A. getc
B. getch
C. scanf
D. getchar

32. An escape sequence used to show the carriage return character is

A. \r
B. \a
C. \b
D. \0

33. The CORRECT input statement to take a non-decimal number as an input is

A. scanf("%f", var_1)
B. scanf("%s", var_1)
C. scanf("%c", var_1)
D. scanf("%d", var_1)

34. All of the following are used to perform logical operations EXCEPT

A. !
B. ||
C. !=
D. &&

35. Consider the given C program.

```
#include <stdio.h>
int main() {
  int i = 10;
  int j = 2;
  printf ("Result = %d" , 6 + i % 10 * j);
return 0;
}
```

The output of this program is

A. 2
B. 6
C. 9
D. 18

AKU-EB Annual Examinations 2025 for Teaching & Learning only

36. Consider the given program.

```
#include <stdio.h>
int main() {
    int i = 0;
    while (i < 11) {
        printf("%d\n", i + 1);
        i++;
    }
    return 0;
}
```

The number of repetition due to the given while loop statement is

A. 0
B. 10
C. 11
D. 12

37. Consider the given syntax.

```
if (condition)
{
    //statement;
}
else
{
    //statement;
}
```

The given syntax is an example of

A. if-else structure.
B. if-else-if structure.
C. nested if structure.
D. simple if structure.

38. If the break statement is omitted within a case block of a switch statement in a C program, then the program

A. enters an infinite loop.
B. generates a syntax error.
C. executes the subsequent case blocks.
D. exits immediately from the case block.

AKU-EB Annual Examinations 2025 for Teaching & Learning only

39. All of the following is/ are property(ies) of functions EXCEPT

I. It reduces the readability of code.
II. It increases the reusability of code.
III. It allows the division of complex code.

A. I only.
B. III only.
C. I and II.
D. II and III.

40. The CORRECT syntax to declare a user-defined function which returns integer value and takes two integer arguments is

A. int FunctionName (int variable1, variable2);
B. int FunctionName (int variable1, int variable2);
C. integer FunctionName (integer variable1, variable2);
D. integer FunctionName (integer variable1, integer variable2);
