Notes from E-Marking Centre on SSC-I Islamiyat Annual Examinations 2024

Introduction

This document has been produced for the teachers and candidates of Secondary School Certificate (SSC) Part I Islamiyat. It contains comments on candidates' responses to the 2024 SSC-I Examination indicating the quality of the responses and highlighting their relative strengths and weaknesses.

E-Marking Notes

This includes overall comments on candidates' performance on every question and *some* specific examples of candidates' responses that support the mentioned comments. Please note that the descriptive comments represent an overall perception of the better and weaker responses as gathered from the e-marking session. However, the candidates' responses shared in this document represent some specific example(s) of the mentioned comments.

Teachers and candidates should be aware that examiners may ask questions that address the Student Learning Outcomes (SLOs) in a manner that requires candidates to respond by integrating knowledge, understanding and application skills they have developed during the course of study. Candidates are advised to read and comprehend each question carefully before writing the response to fulfill the demand of the question.

Candidates need to be aware that the marks allocated to the questions are related to the answer space provided on the examination paper as a guide to the length of the required response. A longer response will not in itself lead to higher marks. Candidates need to be familiar with the command words in the SLOs which contain terms commonly used in examination questions. However, candidates should also be aware that not all questions will start with or contain one of the command words. Words such as 'how', 'why' or 'what' may also be used.

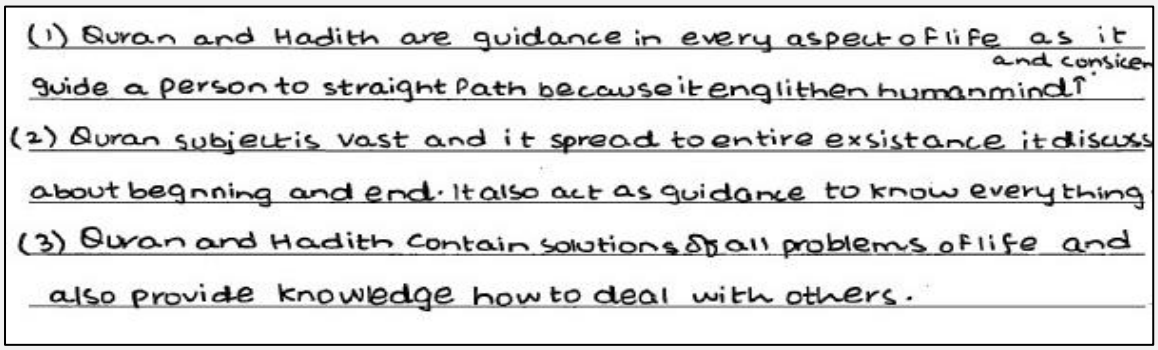

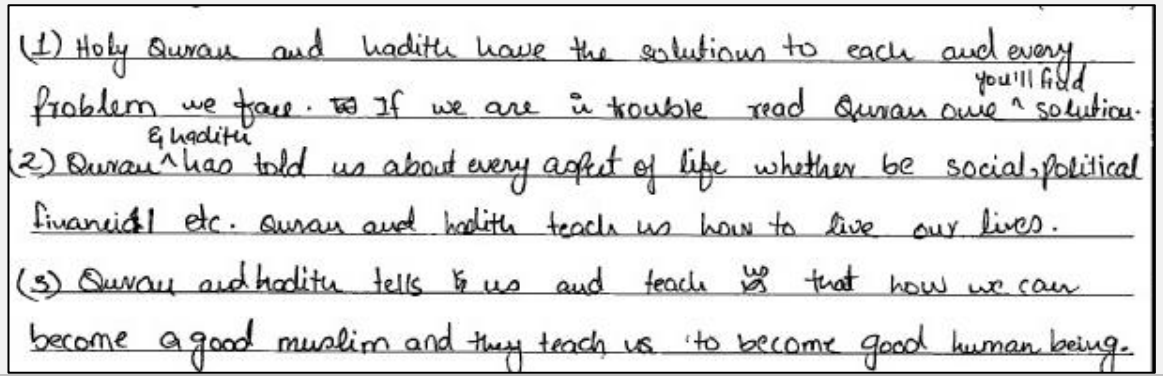

General Observations

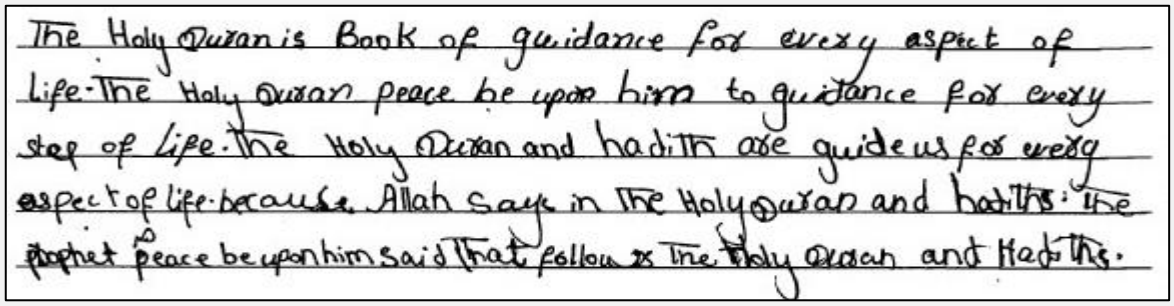

The overall performance of the entire cohort in the examination indicates that the majority of candidates used their time effectively by offering relevant and focused responses that attempted to address the questions as instructed. Their responses demonstrated relevance and corresponded with the requirements. However, the candidates seemed challenged in the question related to Prophet's (PBUH) early life. It was also observed that candidates struggled to construct their responses as per the command words used in the questions.

Note: Candidates' responses shown in this report have not been corrected for grammar, spelling, format, or information.

• Identify the expectation of command words (use Command Word Guide) • Ensure the content is taught at the relevant cognitive level • Identify necessary content required (skills + concepts) • Review past paper questions on the concept • Utilise the resource guide for additional materials	• Story Board • Cause and Effect • Fish and Bone • Concept Mapping • Audio Visual Resources • Think, Pair and Share • Knowledge Platform videos • Questioning Technique (Socratic approach) • Practical Demonstration ** For description of each Pedagogy, refer to Annexure A	• Past paper questions • Discussion on E-Marking Notes • AKU-EB Digital Learning Solution powered by Knowledge Platform https://akueb.knowledgeplatform.com/login

Any Additional Suggestion:
When teachers connect the Holy Qur'an and Hadith to every aspect of life, they should provide examples from various domains. For instance, when explaining concepts like 'justice and equity' from the Holy Qur'an and Hadith, they should give at least five to six practical examples. This approach helps students to relate Quranic teachings and Hadith to real-life situations. Simultaneously, it is imperative to ensure that students comprehend the imperative vocabulary and directives presented in the student learning outcomes (SLO).

Simultaneously, it is imperative to ensure that students comprehend the imperative vocabulary and directives presented in the Student Learning Outcomes (SLO).

This approach helps students understand the importance and relevance of each Hadith in their learning.

Yes, of course. The rights of Allah Ta'ala and the rights of our fellow beings is Ibadah (عبادت). The literal meaning of Ibadat is "worship". The worship which is mandatory for Muslims who totally believe in Allah. Muslims have their lives just to worship Allah. Allah give Muslims lives to worship him. The book written by Allah is reveled just to know the difference between wright and wrong.

There are few types of worships (Ibadat) which Muslims are suppose to do. Salah is the type of worship. five prayers (salah) are must to pray in a day for Muslims. Zakat is also type of worship which we can give to poor people or to the Orphans. Ramazan is the month of blessings and we muslims are guided to fast during the month of Ramadan. Doing fasts is almost mandatory for Muslims. We are guided to worship one and only Allah because He is the creater of the world. There is no any other God but Allah. He has no family. He neither sleep

mind that Allah is watching us no matter where we are. We Muslims believe on Allah's books, Allah's Prophet's, Allah's angels. We will be rewarded of our good deeds and punished for our bad deeds.

Society reduces poverty, etc. Simultaneously, it is imperative to ensure that students comprehend the imperative vocabulary and directives presented in the Student Learning Outcomes (SLO) and the question.

Annexure A: Pedagogies Used for Teaching the SLOs

Pedagogy: Storyboard
Description: A visual pedagogy that uses a series of illustrated panels to present a narrative, encouraging creativity and critical thinking. It helps learners organise ideas, sequence events, and comprehend complex concepts through storytelling.
Example: In a Literature class, students are tasked with creating storyboards to visually retell a novel. They draw key scenes, write captions, and present their stories to the class, enhancing their reading comprehension and fostering their imagination.

Pedagogy: Cause and Effect
Description: This pedagogy explores the relationships between actions and consequences. By analysing cause-and-effect relationships, learners develop a deeper understanding of how events are interconnected and how one action can lead to various outcomes.
Example: In a History class, students study the causes and effects of the Industrial Revolution. They research and discuss how technological advancements in manufacturing led to significant societal changes, such as urbanisation and labour reform movements.

Pedagogy: Fish and Bone
Description: A method that breaks down complex topics into main ideas (the fish) and supporting details (the bones). This visual approach enhances comprehension by highlighting essential concepts and their relevant explanations.
Example: During a Biology class on human anatomy, the teacher uses the fish and bone technique to teach about the human skeletal system. Teacher presents the main components of the human skeleton (fish) and elaborates on each bone's structure and function (bones).

Pedagogy: Concept Mapping
Description: An effective way to visually represent relationships between ideas. Learners create diagrams connecting key concepts, aiding in understanding the overall structure of a subject and fostering retention.
Example: In a Psychology assignment, students use concept mapping to explore the various theories of personality. They interlink different theories, such as Freud's psychoanalysis, Jung's analytical psychology, and Bandura's social-cognitive theory, to see how they relate to each other.

Pedagogy: Audio Visual Resources
Description: Incorporating multimedia elements like videos, images, and audio into lessons. This approach caters to different learning styles, making educational content more engaging and memorable.
Example: In a General Science class, the teacher uses a documentary-style video to teach about the solar system. The video includes stunning visual animations of the planets, interviews with astronomers, and background music, enhancing students' interest and understanding of space.

Pedagogy: Think, Pair, and Share
Description: A collaborative learning technique where students ponder a question or problem individually, then discuss their thoughts in pairs or small groups before sharing with the entire class. It fosters active participation, communication skills, and diverse perspectives.
Example: In a Literature in English class, the teacher poses a thought-provoking question about a novel's moral dilemma. Students first reflect individually, then pair up to exchange their opinions, and finally participate in a lively class discussion to explore different viewpoints.

Pedagogy: Questioning Technique (Socratic Approach)
Description: Based on Socratic dialogue, this method stimulates critical thinking by posing thought-provoking questions. It encourages learners to explore ideas, justify their reasoning, and discover knowledge through a process of inquiry.
Example: In an Ethics class, the instructor uses the Socratic approach to lead a discussion on the meaning of justice. By asking a series of probing questions, the students engage in a deeper exploration of ethical principles and societal values.

Pedagogy: Practical Demonstration
Description: A hands-on approach where learners observe real-life applications of theories or skills. Practical demonstrations enhance comprehension, skill acquisition, and problem-solving abilities by bridging theoretical concepts with real-world scenarios.
Example: In a Food and Nutrition class, the instructor demonstrates the proper technique for filleting a fish. Students observe and then practice the skill themselves, learning the practical application of knife skills and culinary precision.
