AGA KHAN UNIVERSITY EXAMINATION BOARD

HIGHER SECONDARY SCHOOL CERTIFICATE

CLASS XII

ANNUAL EXAMINATIONS (THEORY) 2025

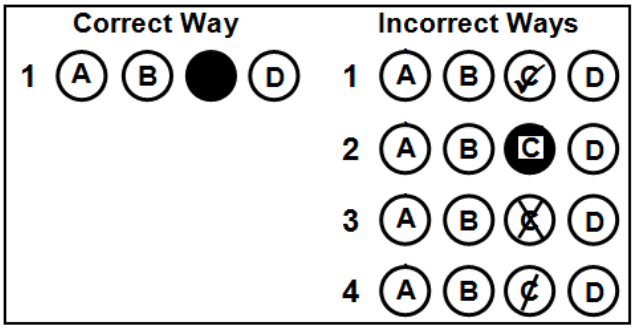

Commercial Geography Paper I

Time: 1 hour 10 minutes Marks: 40

AKU-EB Annual Examinations 2025 for Teaching & Learning only

INSTRUCTIONS

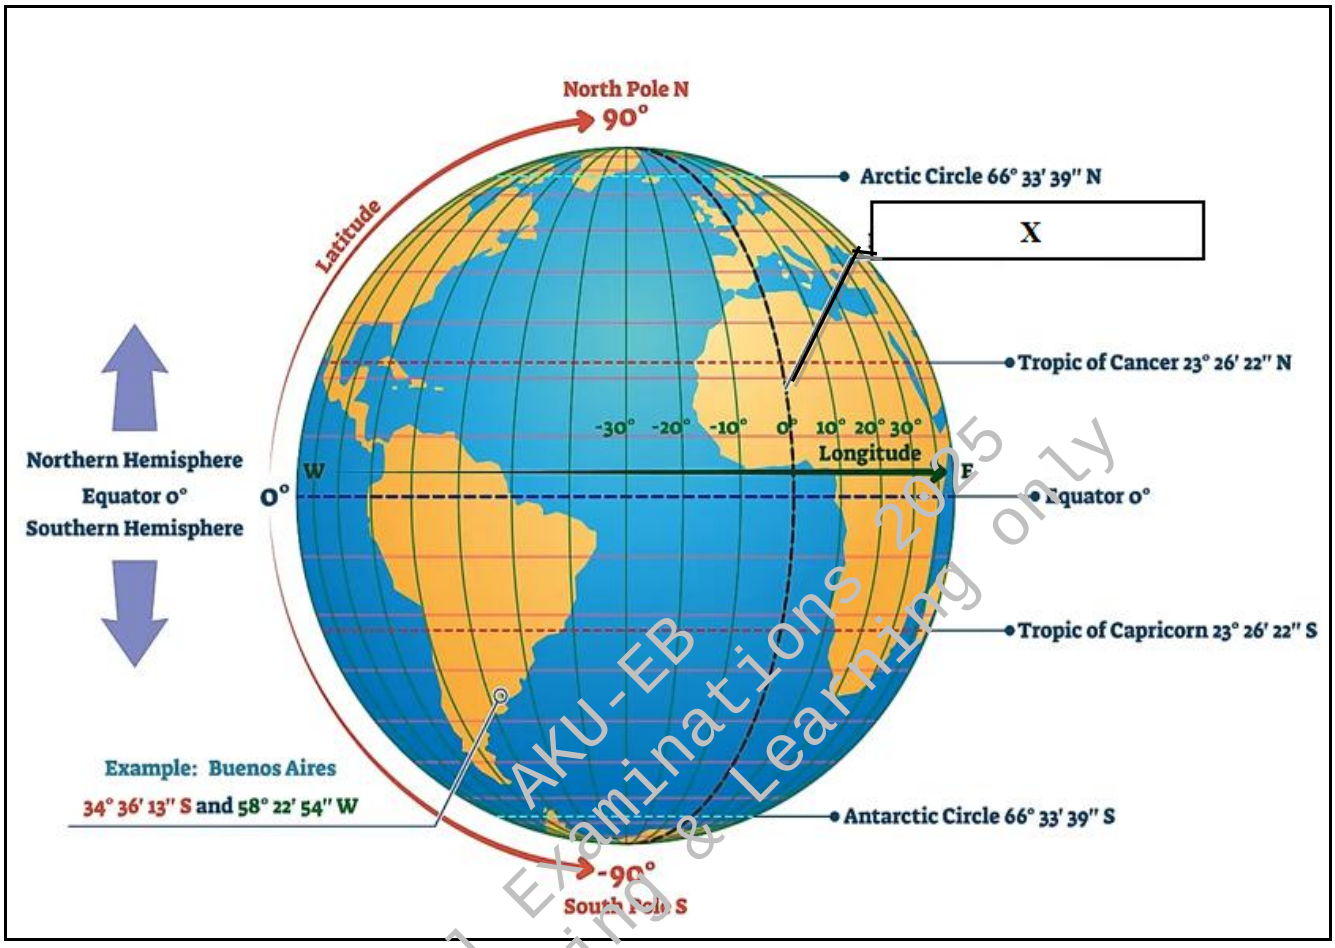

1. Read each question carefully.
2. Answer the questions on the separate answer sheet provided. DO NOT write your answers on the question paper.
3. There are 100 answer numbers on the answer sheet. Use answer numbers 1 to 40 only.
4. In each question, there are four choices A, B, C, D. Choose ONE. On the answer grid, black out the circle for your choice with a pencil as shown below.

Candidate's Signature

5. If you want to change your answer, ERASE the first answer completely with a rubber, before blacking out a new circle.
6. DO NOT write anything in the answer grid. The computer only records what is in the circles.

1. Review the given image:

AKU-EB Annual Examinations 2025 for Teaching & Learning only

The line **X** in the given globe is known as

A. arctic pole line.
B. prime meridian line.
C. antarctic pole line.
D. international date line.

2. The following are some of the objectives of famous travellers and explorers of the world.

I. To spread Christianity to China's ruling class
II. To explore culture and traditions of the region
III. To establish trade relations with the Yuan dynasty
IV. To prepare a travel log and maps for the upcoming expeditions

Which of the following were Marco Polo's objectives to travel to China?

A. I and III.
B. I and IV.
C. II and IV.
D. II and III.

3. Raza, a farmer lives in a hilly region, noticed that the topsoil of his land is being washed away after heavy rainfall, leading to reduced crop yields.

   To overcome the problem, Raza should

   A. clear the land by removing vegetation for planting more crops.
   B. plant cover crops like grasses and legumes on his fields.
   C. increase the slope of his fields by creating terraces.
   D. use heavy machinery to pack the soil tightly.

4. Which of the following statements differentiates between weather and climate?

   A. Weather and climate both refer to daily changes in temperature and precipitation, but are measured in different units.
   B. Weather is related to global atmospheric patterns, whereas climate only applies to local and regional atmospheric conditions.
   C. Climate refers to the daily temperature and precipitation in a specific location, while weather is the average of these conditions over several decades.
   D. Weather refers to short-term atmospheric conditions in a specific area, while climate describes long-term patterns and averages of weather over a larger region.

5. All of the following are examples of primary economic activities EXCEPT

   A. forestry.
   B. fishing.
   C. mining.
   D. pottery.

6. Maria is an economic planner in a developing country. She is tasked with presenting a strategy to the government aimed at improving both economic growth and economic development. After analysing the country's current situation, she identifies several potential initiatives.

   The initiative that would contribute to both economic growth and economic development in her country is by

   A. encouraging foreign direct investment to enhance production capabilities.
   B. launching health initiatives to improve healthcare access and reduce mortality rates.
   C. implementing skill based education programs to improve productivity and labour export.
   D. increasing investment in infrastructure projects to boost gross domestic product (GDP).

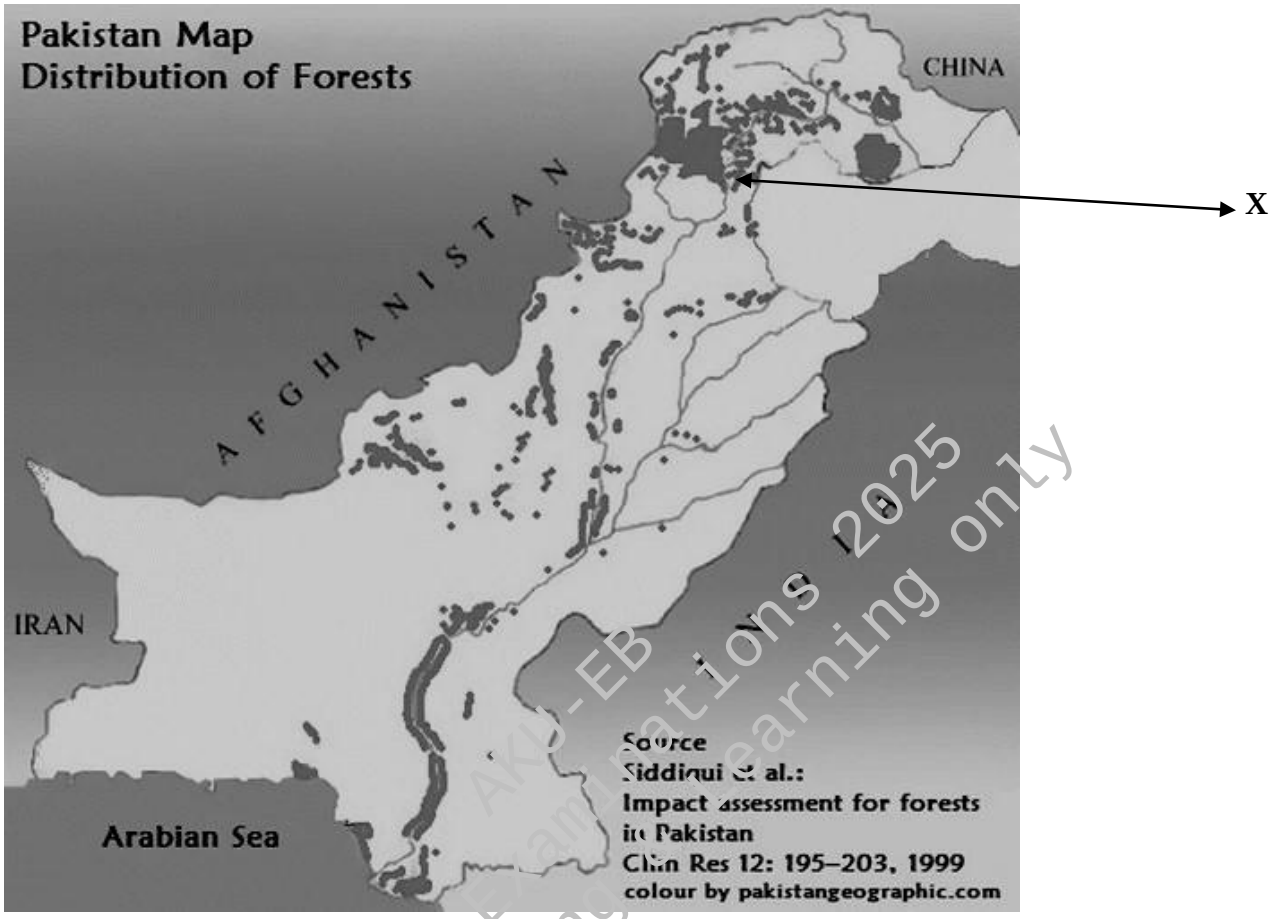

7. As per the data collected by the globaleconomy.com (2023), the total area of Pakistan covered by forests is

   (Source: https://www.theglobaleconomy.com/rankings/forest_area/)

   A. 3.2%.
   B. 4.8%.
   C. 5.2%.
   D. 9.5%.

AKU-EB Annual Examinations 2025 for Teaching & Learning only

8. The forest labelled at **X** in the given map of Pakistan indicates

A. coniferous forest.
B. deciduous forest.
C. mangrove forest.
D. rainforest.

9. The term, 'lumbering' is described as the

A. burning of trees.
B. conservation of forests.
C. cultivation of herbs and shrubs in forestry.
D. utilisation of forest products for commercial use.

10. One of benefits of the forests to the economy of the country is that they

A. increase the amount of carbon dioxide.
B. provide raw material to the industries.
C. prevent soil erosion and floods.
D. reduce global warming.

Annual Examinations 2025 AKU-EB for Teaching Learning only

11. Haroon is a fisherman in a coastal village of Pakistan. His daily catch is often affected by fluctuating fish populations and the lack of modern equipment. He has also noticed that his fish quality declines before he can reach to the market, leading to lower prices.

    To increase his daily earnings, the sustainable fishing practice that Haroon should adapt is that he should

    A. upgrade his fishing boat and gear through financing and utilise cold storage facility.
    B. focus on catching as many fish as possible each day to maximise his immediate income.
    C. practice and improve his fishing skills regardless of any restriction on areas and seasons.
    D. adopt traditional techniques of fishing and sold fresh catch in the neighbourhood to save storage cost.

12. The largest and busiest fishing ground in the world is the

    A. north-east Atlantic and Arctic region.
    B. north-west Atlantic region.
    C. north-west Pacific region.
    D. south-east Pacific region.

13. The region famous for trophy hunting of Ibex and Markhor in Pakistan is

    A. Hunza, Gilgit-Baltistan.
    B. Kashmore, Sindh.
    C. Rahimyar Khan, Punjab.
    D. Gomal, Balochistan.

AKU-EB Annual Examinations 2025 for Teaching & Learning only

14. Review the given image.

The method of fishing depicted in the given image is

A. gillnet.
B. trawling.
C. pole and line.
D. pots and traps.

15. According to Food and Agriculture Organization (FAO), Pakistan ranks in the top 20 global exporters of halal meat.

The LARGEST exporting zone for Pakistan meat market is

A. Asia Pacific.
B. Middle East.
C. South America.
D. Western Europe.

16. Pakistan has one of the lowest per hectare yield of crops generally as compared to the other countries in the South Asian region.

All of the following are the major causes to this lesser yield EXCEPT

A. low quality seeds.
B. less fertility of the land.
C. waterlogging and salinity.
D. shortage of financial resources.

AKU-EB Annual Examinations 2025 for Teaching & Learning only

17. All of the following are considered as cash crops the EXCEPT

A. cotton.
B. maize.
C. oilseeds.
D. sugarcane.

18. Consider the given image.

The farming strategy that is used to maintain fertility of soil as shown in the given image is

A. crop rotation.
B. truck farming.
C. crop rationing.
D. intensive farming.

19. According to Food and Agriculture Organization (FAO) 2020-21, the LARGEST rice producer of the world was

A. Bangladesh.
B. Vietnam.
C. China.
D. India.

AKU-EB Annual Examinations 2021 for Teaching & Learning Only

20. Consider the given image.

The kind of farming depicted in the given image is

A. shift farming.
B. truck farming.
C. mixed farming.
D. plantation farming.

21. As a result of Indus Basin Treaty, India and Pakistan agreed upon the allocation of

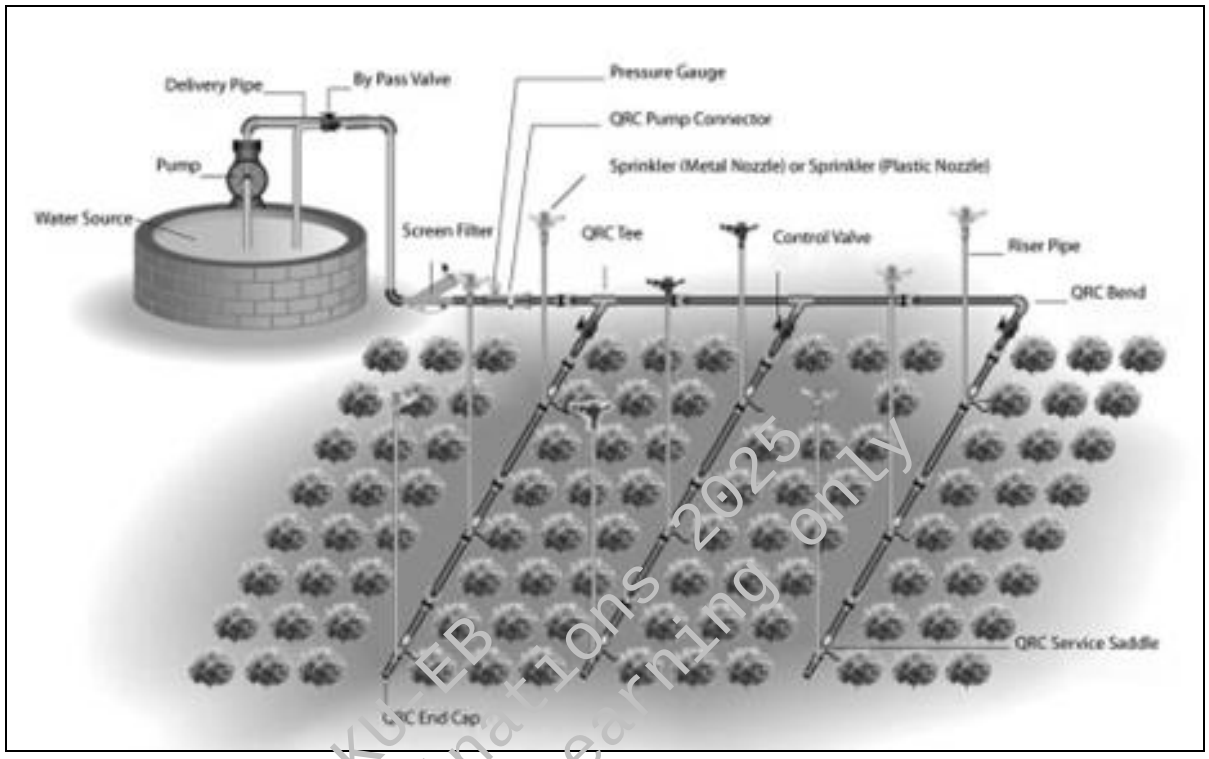

A. Western rivers to Pakistan and Eastern rivers to India.
B. Eastern rivers to Pakistan and Western rivers to India.
C. Northern rivers to Pakistan and Southern rivers to India.
D. Southern rivers to Pakistan and Northern rivers to India.

22. The PRIMARY purpose of building a barrage is to

A. generate electricity.
B. rise the river flow down the stream.
C. control the flow of water for irrigation
D. provide water for irrigation in mountainous regions.

© AKU-EB Annual Examinations 2025 for Teaching & Learning only

23. Review the given image.

The irrigation system depicted in the given image is

A. tubewell / *chargha*.
B. surface irrigation.
C. drip irrigation.
D. *karez*.

24. Consider the given image.

The type of mining depicted in the given image is

A. placer mining.
B. in situ mining.
C. surface mining.
D. underground mining.

AKU-EB Annual Examinations 2025 for Teaching & Learning only

25. As per economic survey of Pakistan 2023, the LARGEST source of power generation in Pakistan is

A. solar.
B. hydel.
C. nuclear.
D. thermal.

26. Pakistan's energy crisis is due to heavy reliance on non-renewable fuels like furnace oil and LNG (liquefied natural gas), straining foreign reserves. In addition, fossil fuel combustion worsens air pollution and increases greenhouse gas emissions, leading to environmental degradation and climate change.

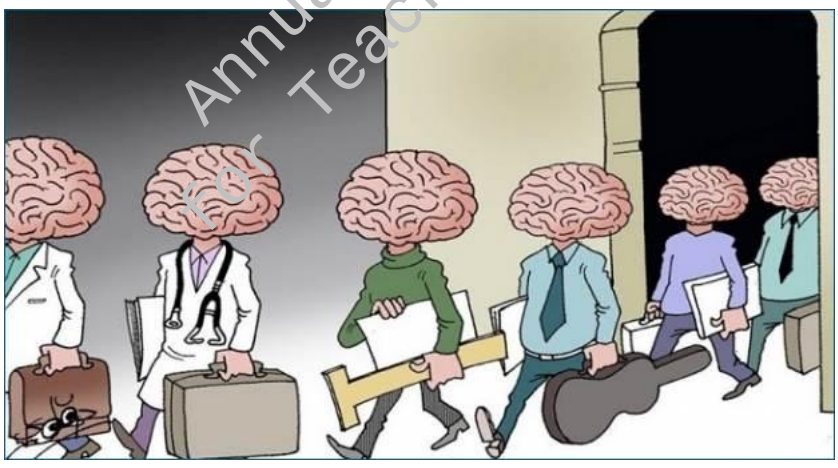

The government of Pakistan can mitigate the given problems by

A. motivating the consumers to use solar energy.
B. importing cheap fuel products from the neighbouring countries.
C. adopting appropriate load shedding techniques to domestic use.
D. applying limits to the power supplies in commercial and industrial sectors.

27. In recent decades, the MAJOR cause of the rapid rise in death rate of rural areas of Pakistan is the

A. spread of diseases.
B. lack of general health care facilities.
C. inconsistent law and order situations.
D. increase in floods and natural disasters.

28. Review the given image.

The given image depicts an important migration phenomenon of

A. seasonal migration (*khana-badooshi*).
B. rural-urban migration (urbanisation).
C. international migration (brain-drain).
D. urban-rural migration (ruralisation).

Annual Examinations 2025 AKU-EB for Teaching & Learning only

29. According to the given source, Pakistan's one-third population is living in urban centres currently. However, that figure will rise to nearly 50% by 2030.

(https://www.files.ethz.ch/isn/159296/4c5b5fa0ebc5684da2b9f244090593bc.pdf)

The MOST contributing factor that motivates this population shift to urban centres is

A. less polluted and better natural environment.
B. access to better infrastructure and civic facilities.
C. stable rate of inflation and rate of interest on loans.
D. safety and security with luxurious living conditions.

30. As per Economic Survey of Pakistan 2023, the death rate during the period of 2000-2020 is on constant decline.

The given information depicts

A. improved health facilities and infrastructure.
B. increased exposure to contagious diseases.
C. non-outbreak of any pandemic.
D. aging pattern of population.

31. The Human Development Index (HDI) was initially developed and introduced by

A. Mahboob-ul-Haq.
B. Milton Friedman.
C. Mohammad Younus.
D. John Maynard Keynes.

32. With reference to fertiliser production in Pakistan, the LARGEST market share holder province is

A. Sindh.
B. Punjab.
C. Baluchistan.
D. Khyber Pakhtunkhwa.

33. Which of the following cities of Pakistan is famous globally for its textile production?

A. Sialkot
B. Karachi
C. Faisalabad
D. Gujranwala

Annual Examinations 2025 AKU-EB for Teaching & Learning only

34. The following are the famous tourist attractions of Pakistan:

- Ziarat
- Hanna lake
- Urak Valley
- Hazarganji Chiltan National Park

The given travel attractions are found in

A. Swat.
B. Quetta.
C. Khuzdar.
D. Peshawar.

35. The product that MOSTLY contributes to the textile industry's exports of Pakistan is

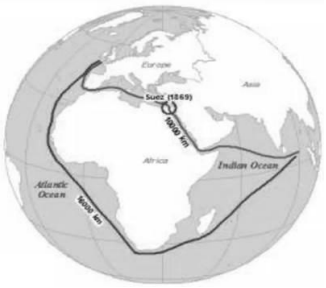

A. Knitwear.
B. Bed wear.
C. Readymade Garments.
D. Cotton cloth roll (*Than*).

36. With reference to economic survey of Pakistan 2023, the percentage contribution of manufacturing industries in the total GDP of Pakistan is in the range of

A. 12% to 15%.
B. 16% to 20%.
C. 21% to 40%.
D. 40% to 60%.

AKU-EB Annual Examinations 2025 for Teaching & Learning only

37. Review the given image.

I	II
	

The trade routes depicted in the given map show trade routes connecting continents. The canal that made it possible are

	I	II
A	Suez canal	Panama canal
B	Panama canal	Suez canal
C	Silk route	Panama canal
D	Suez canal	Silk route

38. Anaj Traders deals in agricultural products such as oilseeds, pulses, beans herbs and shrubs within the country. They build warehouses in major urban centres to store and collect the products from rural areas.

The cheapest and efficient mode of transportation in the given situation would be

A. airways.
B. railways.
C. roadways.
D. waterways.

39. The PRIME factor that is considered before developing a seaport in any coastal region is

A. infrastructure and power resources.
B. road transportation network and human resource.
C. regional law and order situation and security for trade vessels.
D. water depth, wave condition and land space adjacent to the port.

40. As per the year records of 2021, the BUSIEST seaport of the world is

A. Hong Kong.
B. New York.
C. Singapore.
D. Shanghai.
