آغا خان یونیورسٹی ایگزامینیشن بورڈ

AGA KHAN UNIVERSITY EXAMINATION BOARD

Notes from E-Marking Centre on HSSC-II Ethics Annual Examinations 2024

Introduction

This document has been produced for the teachers and candidates of Secondary School Certificate (HSSC) Part II Ethics. It contains comments on candidates' responses to the 2024 HSSC-II Examination indicating the quality of the responses and highlighting their relative strengths and weaknesses.

E-Marking Notes

This includes remarks on candidates' **performance expectations/ indicators of better responses** for each question. Please note that the descriptive comments reflect a general understanding of what was expected and what went wrong, based on insights gathered from the e-marking session.

Teachers and candidates should be aware that examiners may ask questions that address the Student Learning Outcomes (SLOs) in a manner that requires candidates to respond by integrating knowledge, understanding and application skills they have developed during study. Candidates are advised to read and comprehend each question carefully before writing the response to fulfil the demand of the question.

Candidates need to be aware that the marks allocated to the questions are related to the answer space provided on the examination paper as a guide to the length of the required response. A longer response will not in itself lead to higher marks. Candidates need to be familiar with the command words in the SLOs which contain terms commonly used in examination questions. However, candidates should also be aware that not all questions will start with or contain one of the command words. Words such as 'how', 'why', or 'what' may also be used.

General Observations

The overall performance of the cohort demonstrated a strong command of the content, but there are areas for improvement highlighted by the weaker responses. These include staying focused on the specific task of the question, avoiding ambiguity and vague expressions, and preventing concept overlapping. For instance, some candidates did not clearly differentiate between two distinct roles of government as a social institution, resulting in overlapping explanations like working for the benefit and rights of people. Others defined social institutions broadly instead of focusing on the government's specific role within them.

To enhance understanding and performance, teachers should emphasise the importance of accurately interpreting the question. They can use exercises involving reading passages or scenarios followed by related questions to ensure students grasp the context and details before answering, thus improving the clarity and relevance of their responses.

DETAILED COMMENTS

Constructed Response Questions (CRQs)

Question No. 1	
Question Text	State the TWO conditions set by Kant to evaluate morally good actions.
SLO No.	1.2.2
SLO Text	analyse the ethical dilemma from the perspective of: a) Kantian philosophy (good will and moral duty) b) Aristotle's moral philosophy c) Moral Relativism;
Max Marks	2
Cognitive Level	K*
Checking Hints	Give ONE mark for writing each condition (TWO required).
Performance Expectations/ Indicators of Better Responses'	The expectation from the candidates was to choose any two of the following key principles or conditions set by Immanual Kant: Good will, Duty and Moral Law, Categorical Imperative, Autonomy and Rationality or Intentions over Consequences. For instances, better responses stated the first two conditions as follows: **Good Will**: The action must be performed out of a sense of duty with the intention of conforming to moral law. **Categorical Imperative (Universalisability)**: The action should be based on a principle that can be universally applied as a moral law without contradiction.
Challenges Faced	Some candidates deviated from the main topic asked in the question. Instead of focusing on Kant's principles, they discussed moral values in general. For example, some made comments like 'try not to kill somebody physically or internally' or focused on forgiving others' misdeeds. They considered whether actions are good or bad, which was not the demand of the question, as Immanuel Kant emphasised that actions should be based on moral duty, regardless of their consequences. Additionally, candidates used general examples i.e., 'Always tell the truth no matter what, even if it is for a good cause' instead of referring to Kant's specific conditions.

Suggestions for improvement (Highlight all that apply)

Maximising SLO Achievement	Preferred Pedagogy** Used for this SLO	Assessment Strategies
• Identify the expectation of command words (use Command Word Guide) • Ensure the content is taught at the relevant cognitive level • Identify necessary content required (skills + concepts) • Review past paper questions on the concept • Utilise the resource guide for additional materials	• Story Board • Cause and Effect • Fish and Bone • Concept Mapping • Audio Visual Resources • Think, Pair and Share • Questioning Technique (Socratic approach) • Practical Demonstration ** For description of each Pedagogy, refer to Annexure A	• Past paper questions • Discussion on E-Marking Notes

Any Additional Suggestion:
Teachers can use role-playing activity by dividing students into groups and assigning each group an ethical dilemma (e.g., lying to protect a friend). Each group will represent one philosophical perspective: Kantian ethics, Aristotelian virtue ethics, or Moral Relativism. The groups will discuss and present how their assigned philosophy would approach the dilemma, focusing on key concepts like Kant's duty and goodwill, Aristotle's virtue and character, and Moral Relativism's cultural context. After presentations, the class can engage in a discussion to compare the different approaches and explore their implications on decision-making. This activity encourages critical thinking and understanding of diverse ethical frameworks.

*K = Knowledge U = Understanding A = Application and other higher-order cognitive skills

Question No. 2	
Question Text	Describe THREE important points of observation as part of scientific process of research.
SLO No.	1.3.3
SLO Text	Elaborate the scientific process of research, i.e. observation, examination, experiment, testing, validation;
Max Marks	3
Cognitive Level	U
Checking Hints	Give ONE mark for writing each point (THREE required)
Performance Expectations/ Indicators of Better Responses	In this question, the examinees were expected to describe any three aspects related to observation as part of scientific process of research. They opted any three of the given aspects: data collection, objectivity, naturalistic understanding, hypothesis generation, insight into complexity, validity and reliability, ethical considerations, real-time feedback, qualitative data, etc. For instance, the candidates described the first three points as follows: **Data Collection:** Observation allows researchers to gather firsthand data about a phenomenon. By directly witnessing and recording events or behaviours, researchers can collect information that may not be accessible through other methods. **Objectivity:** Observations can be objective and unbiased, especially if researchers use structured protocols and avoid preconceived notions. This helps in maintaining the integrity of the research and the validity of the findings. **Naturalistic Understanding:** Observations often take place in natural settings, allowing researchers to understand the phenomenon in its natural context. This is particularly valuable in fields like anthropology, ecology, and sociology where studying behaviour in natural settings is essential.
Challenges Faced	Some candidates struggled to clearly define the concepts and often used incomplete sentences or vague phrases. Instead of identifying key aspects of observation in research, they spoke about its importance in a generic sense. They provided weak examples rather than clearly describing the points. For example, one wrote, 'A teacher is observing in class to see how many children have come on time,' and another wrote, 'You can get things you want through observation.' Such responses missed the focus on the main aspects of observation as part of the scientific research process, as required by the question.

Suggestions for improvement (Highlight all that apply)

Maximising SLO Achievement	Preferred Pedagogy Used for this SLO	Assessment Strategies
• Identify the expectation of command words (use Command Word Guide) • Ensure the content is taught at the relevant cognitive level • Identify necessary content required (skills + concepts) • Review past paper questions on the concept • Utilise the resource guide for additional materials	• Story Board • Cause and Effect • Fish and Bone • Concept Mapping • Audio Visual Resources • Think, Pair and Share • Questioning Technique (Socratic approach) • Practical Demonstration	• Past paper questions • Discussion on E-Marking Notes

Any Additional Suggestion:
Teachers can engage students in exploration of ethical implications of data privacy in social media by applying the scientific process. They can begin by observing a scenario where social media platforms collect personal information, raising ethical concerns about privacy, consent, and transparency. Students then examine different perspectives on data collection practices, using real-world cases like Facebook's data privacy issues to understand ethical challenges. They form a hypothesis, such as, "If platforms are transparent and give users control, privacy concerns will be minimised." To test this, they conduct a survey or discussion with peers or family members to gather views on sharing personal data with social media. Analysing the results, students will test whether transparency and control would change people's comfort levels and validate their conclusions by comparing them to ethical theories like Kantian ethics or utilitarianism. The activity concludes with a reflection on how ethical practices in data privacy affect user trust and the broader implications for the digital world.

Question No. 3	
Question Text	Describe the TWO basic ethical teachings in Zoroastrianism.
SLO No.	2.1.2
SLO Text	Discuss the moral values preached and practiced by the founders and other prominent personalities of the given religions, i.e. a) Prophet Muhammad (PBUH) b) Guru Nanak c) Shri Krishna d) Jesus Christ e) Zarathustra
Max Marks	2
Cognitive Level	U
Checking Hints	Give ONE mark for each of the underlined text (TWO required)
Performance Expectations/ Indicators of Better Responses	In this question, the candidates were expected to describe any two moral teachings of Zoroastrianism i.e. Good Thoughts, Good Words, Good Deeds; Dualism of Good and Evil; Truth (Asha); Moral Responsibility; Charity and Benevolence; Environmental Stewardship; Respect for All Life; Ritual Purity. For instance, the first three teachings described by the candidates are as follows: **1. Good Thoughts, Good Words, Good Deeds**: This is the central ethical maxim in Zoroastrianism, encapsulating the idea that individuals should strive to think, speak, and act in ways that promote goodness and truth. **2. Dualism of Good and Evil**: Zoroastrianism emphasises the cosmic struggle between the forces of good (represented by Ahura Mazda and the Amesha Spentas) and the forces of evil (represented by Angra Mainyu or Ahriman). Humans have a role in this struggle by choosing good over evil. **3. Truth (Asha)**: Asha, often translated as "truth" or "order," is a fundamental concept in Zoroastrianism. It represents the divine order and truth that humans should follow to maintain harmony in the world.
Challenges Faced	Some candidates merged two related teachings into a single point, where one teaching is embedded within the other. For example, one point might cover being kind to everyone regardless of their background, while another point emphasises showing humanity before seeking revenge, with the latter encompassing the former. Additionally, some candidates only described one teaching or focused on attributes of God, such as the belief that God is present in all things, including objects and people, rather than discussing the specified moral teachings of Zoroastrianism.

Suggestions for improvement (Highlight all that apply)

Maximising SLO Achievement	Preferred Pedagogy Used for this SLO	Assessment Strategies
• Identify the expectation of command words (use Command Word Guide) • Ensure the content is taught at the relevant cognitive level • Identify necessary content required (skills + concepts) • Review past paper questions on the concept • Utilise the resource guide for additional materials	• Story Board • Cause and Effect • Fish and Bone • Concept Mapping • Audio Visual Resources • Think, Pair and Share • Questioning Technique (Socratic approach) • Practical Demonstration	• Past paper questions • Discussion on E-Marking Notes

Any Additional Suggestion:
Divide students into five groups, each group focuses on one of the given personality figures, discussing their key teachings and creating a skit to demonstrate how these values apply in today's world. After presenting their skits, students will engage in a class discussion on common themes and relevance of these values in contemporary life. This activity will help students understand and reflect on the moral teachings of these influential figures through interactive and creative methods.

Question No. 4	
Question Text	"No one of you is a believer until he desires for his brother that which he desires for himself." (Saying of Prophet Muhammad PBUH) Describe the message in the given hadith from the perspective of any THREE religions other than Islam.
SLO No.	2.1.5
SLO Text	Elaborate the teachings of the given religions about character building and knowledge enhancement of human beings;
Max Marks	3
Cognitive Level	U
Checking Hints	Give ONE mark for each example (THREE required)
Performance Expectations/ Indicators of Better Responses	In this question, candidates were expected to quote similar teaching from any three religions and describe the similar message from all three. The candidates wrote the following points in their answers. **1. Christianity**: Matthew 7:12 teaches, "Do unto others as you would have them do unto you," emphasising mutual respect and kindness. **2. Buddhism**: Udana-Varga 5,1 advises, "Hurt not others in ways that you yourself would find hurtful," highlighting empathy and compassion. **3. Hinduism**: Mahabharata 5,1517 states, "Do naught unto others what you would not have them do unto you," promoting ethical behaviour and respect for others. These teachings collectively underscore the value of treating others with the same consideration one wishes for oneself.
Challenges Faced	Some candidates struggled to describe the similar teachings across different religions. Many candidates referenced only one religion instead of comparing teachings from multiple faiths.

	Additionally, the examples provided were not directly related to the task. For instance, some candidates cited Hindu scriptures but did not connect it with the given message. Instead of addressing the question, some responses focused on general comments about selflessness and non-selfish behaviour, which were irrelevant to the specific task of comparing similar teachings across different religious traditions.

Suggestions for improvement (Highlight all that apply)

Maximising SLO Achievement	Pedagogy Used for that SLO	Assessment Strategies
• Identify the expectation of command words (use Command Word Guide) • Ensure the content is taught at the relevant cognitive level • Identify necessary content required (skills + concepts) • Review past paper questions on the concept • Utilise the resource guide for additional materials	• Story Board • Cause and Effect • Fish and Bone • Concept Mapping • Audio Visual Resources • Think, Pair and Share • Questioning Technique (Socratic approach) • Practical Demonstration	• Past paper questions • Discussion on E-Marking Notes
Any Additional Suggestion: Teachers can involve their students in visually exploring the importance of love by drawing a large central circle labelled 'Love' on a large sheet of paper, surrounded by smaller circles labelled 'Family,' 'Siblings,' 'Neighbours,' 'Country,' 'Nature,' and 'Humanity.' Students will write examples or personal experiences related to each category on sticky notes and place them around the appropriate circles. The teacher will then help the students connect these smaller circles to the central 'Love' circle using string, demonstrating how love connects different aspects of life. The class will then reflect on these connections and discuss how understanding this web of love can influence their actions.		

Question No. 5	
Question Text	Describe any TWO roles played by government as social institution in the development of society.
SLO No.	3.1.2
SLO Text	Describe the five basic social institutions, i.e. family, religion, education, economy, and government;
Max Marks	2
Cognitive Level	U
Checking Hints	Give ONE mark for each role (TWO required)
Performance Expectations/ Indicators of Better Responses	In answering this question, Candidates clearly identified and described two specific roles that the government plays in societal development. This involves explaining how each role contributes to the overall progress and well-being of society. Furthermore, the candidates illustrated each role with relevant examples or details that showed how the government fulfils these roles and impacts societal development. The given examples are written in this regard. **1. Regulation and Lawmaking**: The government establishes and enforces laws and regulations that maintain order, protect rights and ensure justice within society. This role

	supports societal stability and creates an environment where economic and social activities can flourish. **2. Provision of Public Services**: The government provides essential services such as education, healthcare and infrastructure. These services contribute to the development of human capital and the overall quality of life, promoting long-term societal growth and development.
Challenges Faced	Some candidates struggled to clearly mention the two distinct roles of the government as a social institution. Many mentioned overlapping roles, such as working for the benefit and rights of people, which essentially conveyed the same idea. Others defined social institutions instead of focusing on the government's role within them. Additionally, some responses addressed roles of other institutions, like providing basic knowledge, which is more relevant to education rather than the government's direct role. This led to answers that did not effectively outline the government's distinct contributions to societal development.

Suggestions for improvement (Highlight all that apply)

Maximising SLO Achievement	Pedagogy Used for that SLO	Assessment Strategies
• Identify the expectation of command words (use Command Word Guide) • Ensure the content is taught at the relevant cognitive level • Identify necessary content required (skills + concepts) • Review past paper questions on the concept • Utilise the resource guide for additional materials	• Story Board • Cause and Effect • Fish and Bone • Concept Mapping • Audio Visual Resources • Think, Pair and Share • Questioning Technique (Socratic approach) • Practical Demonstration	• Past paper questions • Discussion on E-Marking Notes
Any Additional Suggestion: Teachers can organise an activity called the 'Social Institutions Web,' where students draw a central circle labelled 'Society' and extend lines to surrounding circles representing different social institutions. Along each branch, students will write down key functions and examples for each institution. This visual exercise will help students grasp the interconnected roles of these institutions within society.		

Question No. 6	
Question Text	Describe any TWO ways through which Muhammad Younus contributed in the economic development of Bangladesh.
SLO No.	4.1.2
SLO Text	Discuss the contributions made by the given personalities towards the betterment of their societies;
Max Marks	2
Cognitive Level	U
Checking Hints	Give ONE mark for each contribution (TWO required)
Performance Expectations/ Indicators of	In answering this question, candidates identified and described two contributions made by Younus to the economic development. They provided a brief explanation of how each contribution impacted economic development, including its effects and significance. Following are the two examples given in this regard. **1. Microfinance and Grameen Bank**:

Better Responses	This describes how Yunus's Grameen Bank provided small, collateral-free loans to the poor, fostering entrepreneurship and reducing poverty. **2. Social Business Model**: This explains Yunus's promotion of social businesses that address social issues while being financially self-sustainable, contributing to broader societal development.
Challenges Faced	Some candidates provided generic comments, like 'Muhammad Yunus gave the people of Bangladesh the resources they needed,' which lacked specific details about his contributions to economic development. Many responses included multiple contributions, but they were not essentially the specific contributions required by the question. Additionally, some candidates repeated the same points or focused on minor aspects rather than presenting distinct and separate contributions of Muhammad Younus.

Suggestions for improvement (Highlight all that apply)

Maximising SLO Achievement	Pedagogy Used for that SLO	Assessment Strategies
• Identify the expectation of command words (use Command Word Guide) • Ensure the content is taught at the relevant cognitive level • Identify necessary content required (skills + concepts) • Review past paper questions on the concept • Utilise the resource guide for additional materials	• Story Board • Cause and Effect • Fish and Bone • Concept Mapping • Audio Visual Resources • Think, Pair and Share • Questioning Technique (Socratic approach) • Practical Demonstration	• Past paper questions • Discussion on E-Marking Notes

Any Additional Suggestion:

Teacher can engage students in a 'Research and Presentation Project' by assigning each student or group a key personality known for their contributions to societal improvement, such as Muhammad Yunus. Students will research their assigned figure's impact on social institutions and prepare a detailed presentation, including written reports and visual aids (e.g., posters or infographics). They will present their findings to the class, highlighting specific achievements and their effects on society. This activity fosters in-depth research, effective communication and critical analysis, helping students understand the significant roles individuals play in improving various aspects of society.

Extended Response Questions (ERQs)

Extended response questions offered a choice between parts 'a' and 'b'.

Question No. 7a	
Question Text	Give any THREE examples through which you can show respect for the rights of your colleagues.
SLO No.	3.2.2
SLO Text	Exemplify desirable ethical work practices such as honesty and integrity, self- respect and self- discipline, responsibility and accountability, punctuality and respecting the rights of colleagues;
Max Marks	6
Cognitive Level	U
Checking Hints	Give ONE mark for each example (THREE required) Give ONE mark for linking the examples with that of their rights (THREE required) (Note: All relevant examples will be accepted)
Performance Expectations/ Indicators of Better Responses	This was a choice question and candidates were expected to provide three specific actions that demonstrate respect for colleagues' rights. They briefly explained each example by offering a short explanation of how each example shows respect and contributes to a positive work environment. The following are the three examples candidates provided. **1. Listening Actively**: Pay attention to colleagues' views without interruption. **2. Maintaining Confidentiality**: Keep sensitive information private. **3. Acknowledging Achievements**: Recognise and appreciate colleagues' accomplishments.
Challenges Faced	Some candidates provided examples of values rather than focusing on the rights as required by the question. For instance, some wrote, 'you should inform the teacher about the absence of your classmate,' which does not relate to workplace rights. Others referenced Kant's Theory of good will and moral laws, such as mentioning that one should complain about bias against his/her friend at work. These examples were not properly linked to demonstrating respect for colleagues' rights, as required by the question.

Suggestions for improvement (Highlight all that apply)

Maximising SLO Achievement	Preferred Pedagogy Used for this SLO	Assessment Strategies
• Identify the expectation of command words (use Command Word Guide) • Ensure the content is taught at the relevant cognitive level • Identify necessary content required (skills + concepts) • Review past paper questions on the concept • Utilise the resource guide for additional materials	• Story Board • Cause and Effect • Fish and Bone • Concept Mapping • Audio Visual Resources • Think, Pair and Share • Questioning Technique (Socratic approach) • Practical Demonstration	• Past paper questions • Discussion on E-Marking Notes

Any Additional Suggestion: Teachers can engage students in a "Workplace Ethics Simulation" activity. Divide the class into small groups and assign each group a scenario involving ethical dilemmas related to honesty, integrity, responsibility, and punctuality. For example, one scenario might involve handling a conflict of interest or addressing a missed deadline. Students will role-play these scenarios, demonstrating desirable work practices such as self-discipline, respect for colleagues' rights, and accountability. After each role-play, have a class discussion to reflect on the actions taken and their ethical implications. This activity fosters

practical understanding of ethical work behaviours and encourages students to apply these principles in real-life contexts.

Question No. 7b	
Question Text	A country is faced with discrimination against sects, genders, race and classes. Keeping in mind the example of Nelson Mandela, suggest any THREE ways to address this issue.
SLO No.	4.1.4
SLO Text	Suggest ways to practice the exemplary behaviour of the given personalities in the society;
Max Marks	6
Cognitive Level	A
Checking Hints	Give ONE mark for each suggestion (THREE required) Give ONE mark for making the connections (THREE required) Note: All relevant answers should be accepted.
Performance Expectations/ Indicators of Better Responses	The candidates identified three approaches by listing and describing three strategies to combat discrimination, inspired By Nelson Mandela's methods. They also briefly explained each approach by providing a short explanation of how each approach addresses discrimination and promotes equality. Here are examples of how each approach was listed and described. **1. Promote Reconciliation and Dialogue**: Encourage open discussions to address grievances, like Mandela's Truth and Reconciliation Commission. **2. Implement Inclusive Policies**: Enforce policies that ensure equal opportunities, inspired by Mandela's affirmative action efforts. **3. Encourage Education and Awareness**: Support education and awareness campaigns to foster understanding and reduce prejudice.
Challenges Faced	Some candidates struggled with the question by not directly addressing the task of identifying and describing the three strategies inspired by Nelson Mandela to combat discrimination. Instead, their responses focused on defining discrimination and its societal effects, missing the specific requirement to link approaches like reconciliation, inclusive policies and education to Mandela's methods. The suggestions provided were general and did not clearly explain how they were inspired by Mandela or their impact on promoting equality. Additionally, the responses lacked emphasis on how these strategies affect collective life and address practical societal issues.

Suggestions for improvement (Highlight all that apply)

Maximising SLO Achievement	Preferred Pedagogy Used for this SLO	Assessment Strategies
• Identify the expectation of command words (use Command Word Guide) • Ensure the content is taught at the relevant cognitive level • Identify necessary content required (skills + concepts) • Review past paper questions on the concept • Utilise the resource guide for additional materials	• Story Board • Cause and Effect • Fish and Bone • Concept Mapping • Audio Visual Resources • Think, Pair and Share • Questioning Technique (Socratic approach) • Practical Demonstration	• Past paper questions • Discussion on E-Marking Notes

Any Additional Suggestion:

Teacher can engage students in a 'Community Impact Project Simulation'. He/ she can begin by introducing students to exemplary behaviours of key personalities, such as Muhammad Yunus's dedication to empowering underserved communities. Divide the class into groups, each representing a community facing a specific challenge (e.g., poverty, education). Task each group with designing a project that mirrors the positive behaviours and solutions of the personalities discussed. Students will present their projects, outlining how their proposed actions could address real-world issues and benefit society. This hands-on activity fosters understanding of how to apply exemplary behaviours and encourages practical problem-solving skills.

Annexure A: Pedagogies Used for Teaching the SLOs

Pedagogy: Storyboard
Description: A visual pedagogy that uses a series of illustrated panels to present a narrative, encouraging creativity and critical thinking. It helps learners organise ideas, sequence events, and comprehend complex concepts through storytelling.
Example: In a Literature class, students are tasked with creating storyboards to visually retell a novel. They draw key scenes, write captions, and present their stories to the class, enhancing their reading comprehension and fostering their imagination.

Pedagogy: Cause and Effect
Description: This pedagogy explores the relationships between actions and consequences. By analysing cause-and-effect relationships, learners develop a deeper understanding of how events are interconnected and how one action can lead to various outcomes.
Example: In a History class, students study the causes and effects of the Industrial Revolution. They research and discuss how technological advancements in manufacturing led to significant societal changes, such as urbanisation and labour reform movements.

Pedagogy: Fish and Bone
Description: A method that breaks down complex topics into main ideas (the fish) and supporting details (the bones). This visual approach enhances comprehension by highlighting essential concepts and their relevant explanations.
Example: During a Biology class on human anatomy, the teacher uses the fish and bone technique to teach about the human skeletal system. Teacher presents the main components of the human skeleton (fish) and elaborates on each bone's structure and function (bones).

Pedagogy: Concept Mapping
Description: An effective way to visually represent relationships between ideas. Learners create diagrams connecting key concepts, aiding in understanding the overall structure of a subject and fostering retention.
Example: In a Psychology assignment, students use concept mapping to explore the various theories of personality. They interlink different theories, such as Freud's psychoanalysis, Jung's analytical psychology, and Bandura's social-cognitive theory, to see how they relate to each other.

Pedagogy: Audio Visual Resources
Description: Incorporating multimedia elements like videos, images, and audio into lessons. This approach caters to different learning styles, making educational content more engaging and memorable.
Example: In a General Science class, the teacher uses a documentary-style video to teach about the solar system. The video includes stunning visual animations of the planets, interviews with astronomers, and background music, enhancing students' interest and understanding of space.

Pedagogy: Think, Pair, and Share
Description: A collaborative learning technique where students ponder a question or problem individually, then discuss their thoughts in pairs or small groups before sharing with the entire class. It fosters active participation, communication skills, and diverse perspectives.
Example: In a Literature in English class, the teacher poses a thought-provoking question about a novel's moral dilemma. Students first reflect individually, then pair up to exchange their opinions, and finally participate in a lively class discussion to explore different viewpoints.

Pedagogy: Questioning Technique (Socratic Approach)
Description: Based on Socratic dialogue, this method stimulates critical thinking by posing thought-provoking questions. It encourages learners to explore ideas, justify their reasoning, and discover knowledge through a process of inquiry.
Example: In an Ethics class, the instructor uses the Socratic approach to lead a discussion on the meaning of justice. By asking a series of probing questions, the students engage in a deeper exploration of ethical principles and societal values.

Pedagogy: Practical Demonstration
Description: A hands-on approach where learners observe real-life applications of theories or skills. Practical demonstrations enhance comprehension, skill acquisition, and problem-solving abilities by bridging theoretical concepts with real-world scenarios.
Example: In a Food and Nutrition class, the instructor demonstrates the proper technique for filleting a fish. Students observe and then practice the skill themselves, learning the practical application of knife skills and culinary precision.

(**Note:** The examples provided in this annexure serve as illustrations of various pedagogies. It is important to understand that these pedagogies are versatile and can be applied across subjects in numerous ways. Feel free to adapt and explore these techniques creatively to enhance learning outcomes in your specific context.)

Acknowledgments

The Aga Khan University Examination Board (AKU-EB) acknowledges with gratitude the invaluable contributions of all the dedicated individuals who have played a pivotal role in the development of the Ethics HSSC-II E-Marking Notes.

We extend our sincere appreciation to Mr Noor Akbar, Specialist Humanities at AKU-EB, for taking the subject lead during the entire process of e-marking.

Additionally, we express our gratitude to the esteemed team of reviewers for their constructive feedback on overall performance, better and weaker responses, and validating teaching pedagogies along with suggestions for improvement.

These contributors include:

• Dur Nasab, Associate, Curriculum Development, AKU-EB

• Munira Muhammad, Lead Specialist, Assessment, AKU-EB

• Zain Muluk, Manager, Examination Development, AKU-EB

• Dr Naveed Yousuf, CEO, AKU-EB
