آغا خان یونیورسٹی ایگزامینیشن بورڈ

AGA KHAN UNIVERSITY EXAMINATION BOARD

Notes from E-Marking Centre on SSC-I Pakistan Studies Annual Examinations 2024

Introduction

This document has been produced for the teachers and candidates of Secondary School Certificate (SSC) Part I Pakistan Studies. It contains comments on candidates' responses to the 2024 SSC-I Examination indicating the quality of the responses and highlighting their relative strengths and weaknesses.

E-Marking Notes

This includes overall comments on candidates' performance on every question and *some* specific examples of candidates' responses that support the mentioned comments. Please note that the descriptive comments represent an overall perception of the better and weaker responses as gathered from the e-marking session. However, the candidates' responses shared in this document represent some specific example(s) of the mentioned comments.

Teachers and candidates should be aware that examiners may ask questions that address the Student Learning Outcomes (SLOs) in a manner that requires candidates to respond by integrating knowledge, understanding and application skills they have developed during the course of study. Candidates are advised to read and comprehend each question carefully before writing the response to fulfil the demand of the question.

Candidates need to be aware that the marks allocated to the questions are related to the answer space provided on the examination paper as a guide to the length of the required response. A longer response will not in itself lead to higher marks. Candidates need to be familiar with the command words in the SLOs which contain terms commonly used in examination questions. However, candidates should also be aware that not all questions will start with or contain one of the command words. Words such as 'how', 'why' or 'what' may also be used.

General Observations

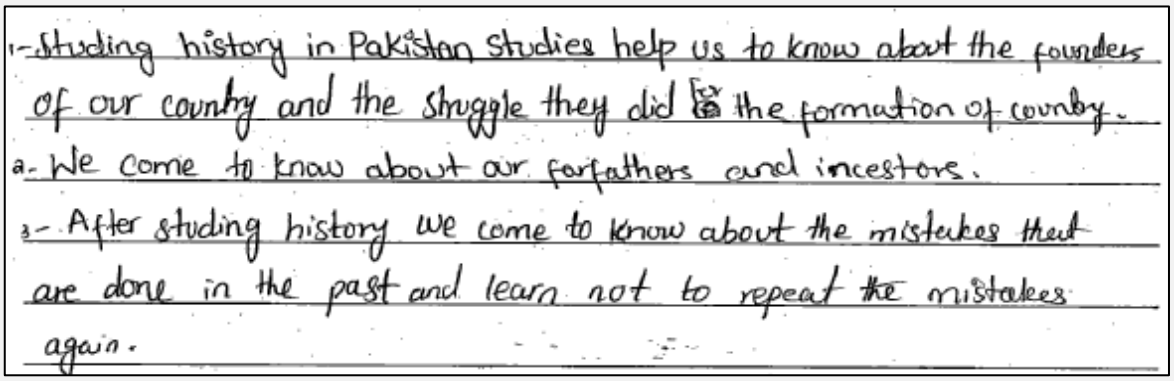

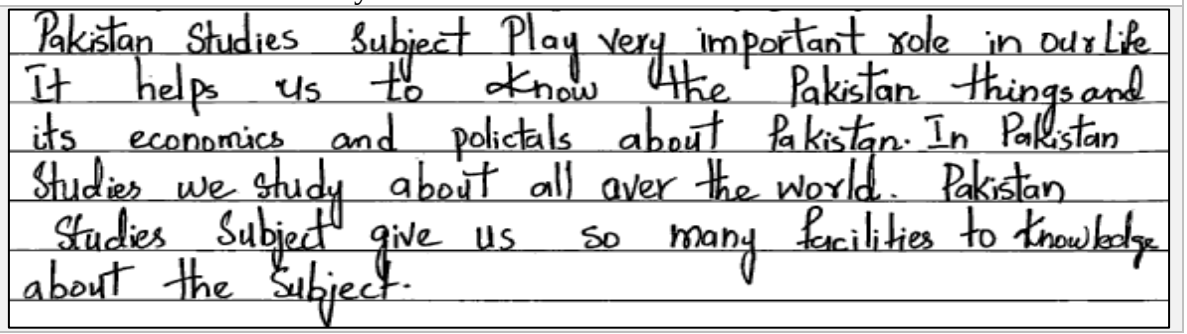

Most candidates succeeded in constructing good responses, particularly on the topics of studying history in Pakistan Studies, analysing the effect of climate on life, proposing solutions to agricultural problems, and evaluating the reasons for the failure of the All-India Muslim League in the 1937 general elections. However, teachers should focus on the following areas and provide more drills and practice to foster a solid understanding:

- A clear understanding of the failure of the Simla Conference 1945 from the perspective of the All-India Muslim League.
- Recognising agricultural problems by analysing various situations and then providing appropriate suggestions.

Note: Candidates' responses shown in this report have not been corrected for grammar, spelling, format, or information.

DETAILED COMMENTS

Constructed Response Questions (CRQs)

Question No. 1	
Question Text	Describe any THREE reasons that show the importance of studying history in Pakistan Studies.
SLO No.	1.1.1
SLO Text	Recognise the importance of Pakistan Studies as a subject that facilitates in understanding the origin, creation and development of Pakistan;
Max Marks	3
Cognitive Level	U*
Checking Hints	Give ONE mark for describing each reason (THREE required).
Overall Performance	The question was generally well-attempted by the candidates. Most of the candidates mentioned the key points about the significance of studying history in Pakistan Studies. However, some candidates discussed the importance of studying Pakistan Studies in terms of its geographical and political aspects.
Description of Better Responses	In better responses, candidates clearly articulated the importance of studying history within Pakistan Studies. They noted that studying history serves as a laboratory for examining the past, offering valuable insights into human behaviour and allowing for an unbiased analysis of current actions. Candidates also highlighted that decision-makers rely on historical facts to make informed judgments, learning from past mistakes to avoid repeating them. Additionally, studying history within Pakistan Studies emphasises the struggles and sacrifices of our ancestors, reinforcing the significance of independence and rights. By acknowledging their contributions, we learn to respect and value the privileges we enjoy today.
Image of Better Response	
Description of Weaker Responses	It was observed in weaker responses, that candidates focused on broader aspects of Pakistan Studies instead of discussing the importance of studying history in Pakistan Studies. They highlighted that studying Pakistan Studies helps in understanding Pakistan's relations with the world and appreciate the country's geographical significance, including its access to warm waters that facilitate year-round trade with other nations.
Image of Weaker Response	

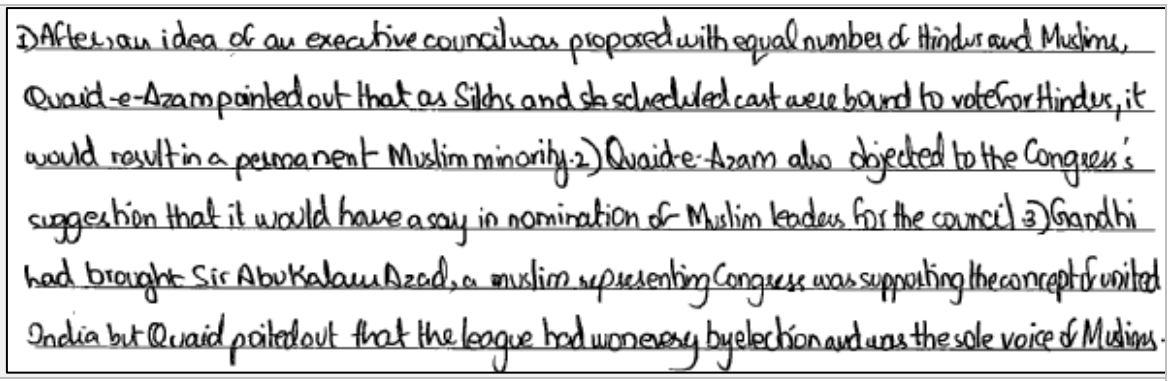

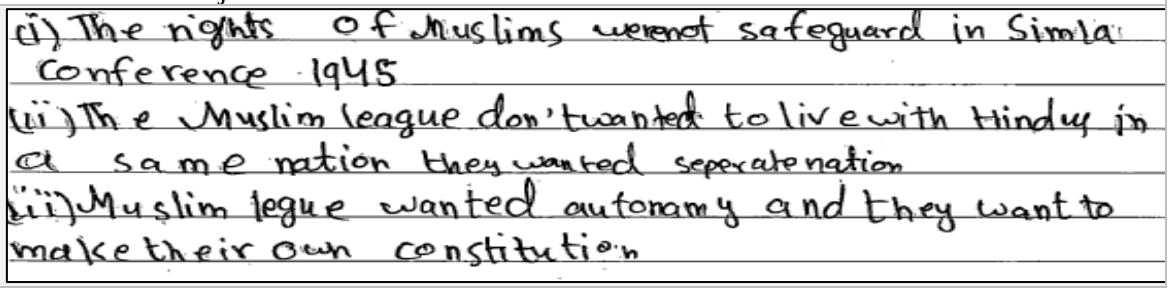

Suggestions for improvement (Highlight all that apply)

Maximising SLO Achievement	Preferred Pedagogy** Used for this SLO	Assessment Strategies
• Identify the expectation of command words (use Command Word Guide) • Ensure the content is taught at the relevant cognitive level • Identify necessary content required (skills + concepts) • Review past paper questions on the concept • Utilise the resource guide for additional materials	• Story Board • Cause and Effect • Fish and Bone • Concept Mapping • Audio Visual Resources • Think, Pair and Share • Knowledge Platform videos • Questioning Technique (Socratic approach) • Practical Demonstration ** For description of each Pedagogy, refer to Annexure A	• Past paper questions • Discussion on E-Marking Notes • AKU-EB Digital Learning Solution powered by Knowledge Platform https://akueb.knowledgeplatform.com/login

Any Additional Suggestion: Teachers are recommended to encourage candidates to pay attention to keywords like the importance of studying history in Pakistan Studies that can help them to approach the question with greater precision. Providing additional practice in question comprehension and offering guidance on how to structure responses effectively can improve candidates' ability to demonstrate a thorough understanding of the topic and address the specific requirements of the question.

*K = Knowledge U = Understanding A = Application and other higher-order cognitive skills

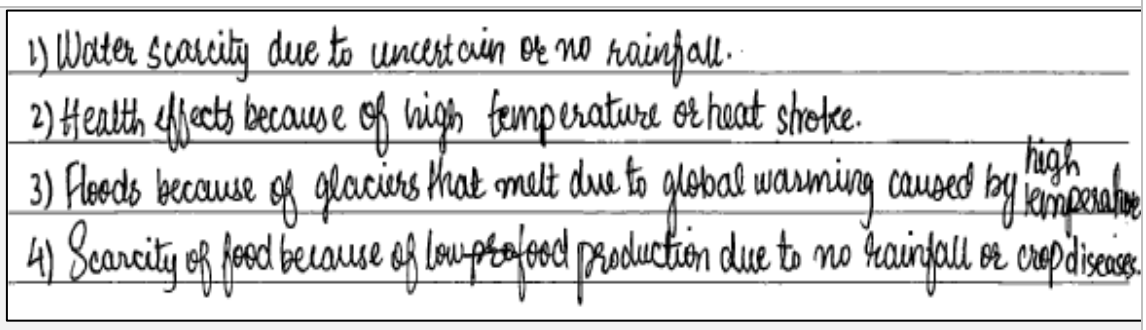

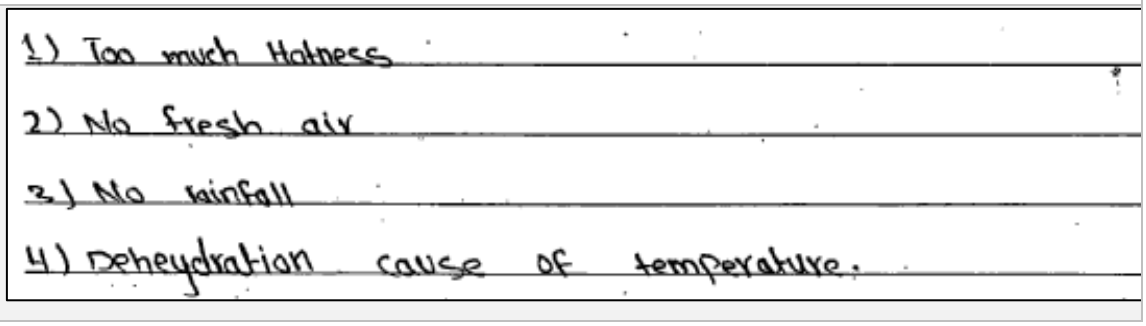

Question No. 2	
Question Text	Write THREE reasons for the failure of Simla Conference 1945 from the perspective of All-India Muslim League.
SLO No.	3.2.2
SLO Text	Explain the major features, outcomes and significance of Cripps Mission 1942, Gandhi-Jinnah Talks 1944, Simla Conference 1945, General Elections 1945-1946 and Cabinet Mission 1946;
Max Marks	3
Cognitive Level	U
Checking Hints	Give ONE mark for writing each conclusion (THREE required).
Overall Performance	The overall performance of this question was unsatisfactory. Most candidates discussed the features of the Simla Deputation 1905 but neglected to mention the reasons for the failure of the Simla Conference 1945. However, some candidates appropriately addressed the question's requirements.
Description of Better Responses	In better responses, candidates accurately identified the reasons for the failure of the Simla Conference in 1945, noting that the Muslim League's request to appoint Muslim members to the Executive Council was rejected. They also pointed out that the Congress insisted on including members from all communities within their quota for the Executive Council. Additionally, the demand from Scheduled Castes to reserve seats on the Executive Council in proportion to their population would have left Muslims in the minority.

Image of Better Responses	 1) After an idea of an executive council was proposed with equal number of Hindus and Muslims, Quaid-e-Azam pointed out that as Sikhs and the scheduled cast were bound to vote for Hindus, it would result in a permanent Muslim minority. 2) Quaide-Azam also objected to the Congress's suggestion that it would have a say in nomination of Muslim leaders for the council 3) Gandhi had brought Sir Abu Kalam Azad, a muslim representing Congress was supporting the concept of united India but Quaid pointed out that the league had won every by election and was the sole voice of Muslims.
Description of Weaker Responses	Most candidates were unable to relate the event accurately. Many stated that the Simla Conference of 1945 failed because Muslims and Hindus wanted separate homelands, where each group sought its own constitution, and the Muslims' demand for a separate electorate was rejected.
Image of Weaker Responses	 (i) The rights of Muslims weren't safeguard in Simla Conference 1945 (ii) The Muslim league don't wanted to live with hindu in a same nation they wanted seperate nation (iii) Muslim legue wanted autonamy and they want to make their own constitution

Suggestions for improvement (Highlight all that apply)

Maximising SLO Achievement	Preferred Pedagogy Used for this SLO	Assessment Strategies
• Identify the expectation of command words (use Command Word Guide) • Ensure the content is taught at the relevant cognitive level • Identify necessary content required (skills + concepts) • Review past paper questions on the concept • Utilise the resource guide for additional materials	• Story Board • Cause and Effect • Fish and Bone • Concept Mapping • Audio Visual Resources • Think, Pair and Share • Knowledge Platform videos • Questioning Technique (Socratic approach) • Practical Demonstration	• Past paper questions • Discussion on E-Marking Notes • AKU-EB Digital Learning Solution powered by Knowledge Platform https://akueb.knowledgeplatform.com/login

Any Additional Suggestion:
Debate Competition: The teacher should arrange debate competitions in the respective classrooms. The class should be divided in terms of 'for' and 'against' to address the Congress and All-India Muslim League's perspectives on the Simla Conference so that students can present their viewpoints. This not only develops critical thinking but also embeds the value of listening and accepting others' points of opinion.

Question No. 3	
Question Text	There has been a change in the annual average temperature in Aslam's locality which has risen from 35ºC to 45ºC and there is not much rainfall due to which freshwater reserves are depleting in the area. It is expected that the temperature will further increase in the years ahead. With reference to the given situation, state FOUR problems that could be faced by Aslam's family while living in that area.
SLO No.	4.3.3
SLO Text	Analyse the effect of climate on the life of people with respect to climatic zones and natural topography;
Max Marks	4
Cognitive Level	U
Checking Hints	Give ONE mark for writing each problem (FOUR required).
Overall Performance	The question was generally well-attempted and most of the candidates fulfilled the demand of the question, highlighting the key points about the effect of climate on Aslam's family while living in that area. However, some candidates discussed the impact of climate on the environment or repeated the characteristics of the climate provided in the question.
Description of Better Responses	Most candidates correctly identified the problems Aslam's family might face, such as water scarcity, heatstroke, desertification, drought, loss of vegetation, loss of farming, and flooding from melting glaciers.
Image of Better Response	
Description of Weaker Responses	Some candidates discussed the effects of rising temperatures on the environment rather than the impact of climate change on Aslam's family. For instance, they mentioned that there would be no fresh air available, an increase in heat, and a lack of rainfall due to the higher temperatures.
Image of Weaker Response	

Suggestions for improvement (Highlight all that apply)

Maximising SLO Achievement	Preferred Pedagogy Used for this SLO	Assessment Strategies
• Identify the expectation of command words (use Command Word Guide) • Ensure the content is taught at the relevant cognitive level • Identify necessary content required (skills + concepts) • Review past paper questions on the concept • Utilise the resource guide for additional materials	• Story Board • Cause and Effect • Fish and Bone • Concept Mapping • Audio Visual Resources • Think, Pair and Share • Knowledge Platform videos • Questioning Technique (Socratic approach) • Practical Demonstration	• Past paper questions • Discussion on E-Marking Notes • AKU-EB Digital Learning Solution powered by Knowledge Platform https://akueb.knowledgeplatform.com/login

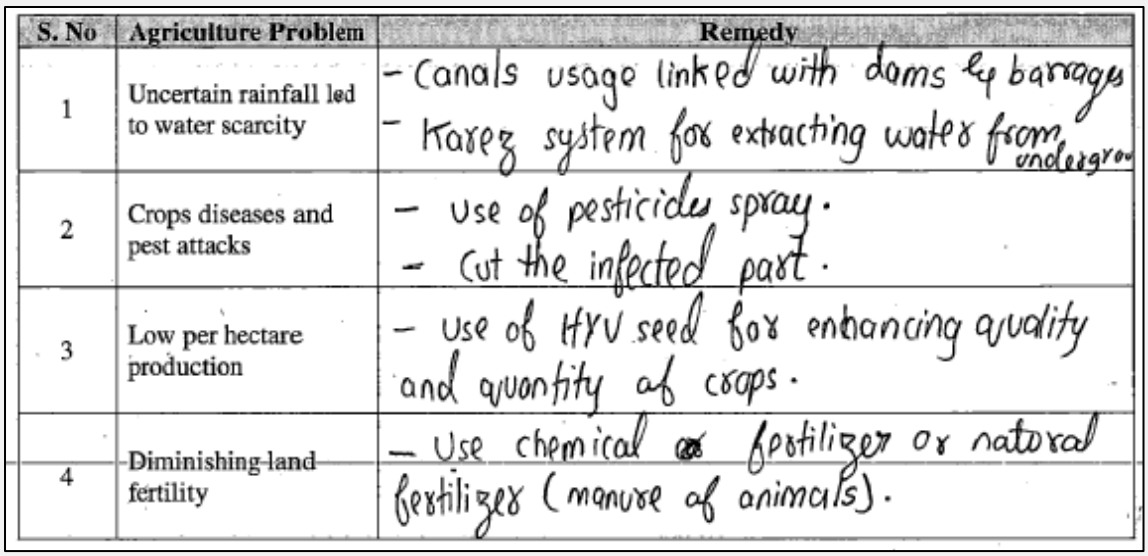

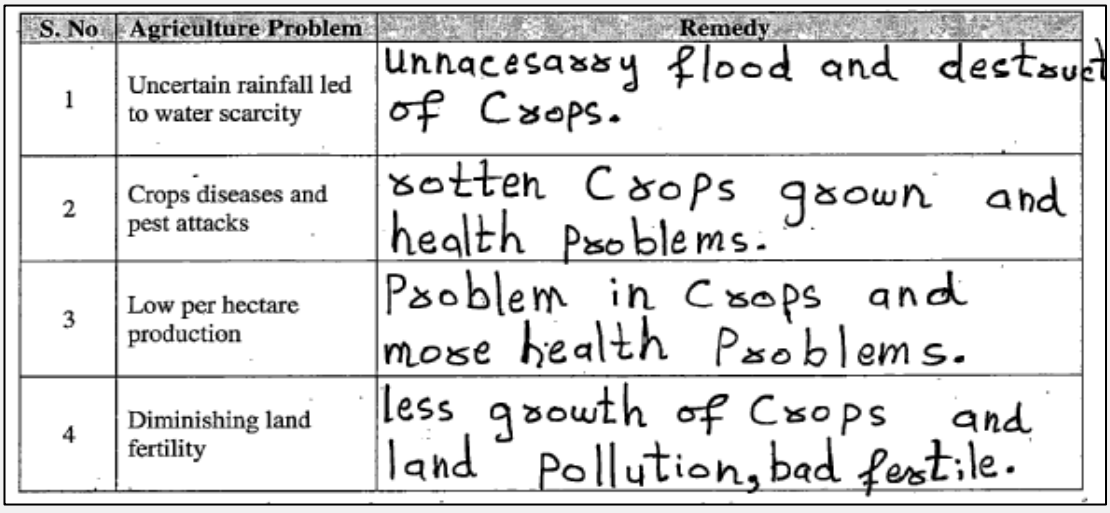

Any Additional Suggestion:
Case Studies: Teachers can provide students with various case studies related to different terrains or physical features and ask them to reflect on how rising temperatures in these areas might impact an individual's life. In this way, students' critical and analytical thinking skills will be enhanced.

Question No. 4

Question Text	State the remedies to overcome the following agriculture problems.

S. No	Agriculture Problem	Remedy
1	Uncertain rainfall led to water scarcity	
2	Crop diseases and pest attacks	
3	Low per-hectare production	
4	Diminishing land fertility	

SLO No.	5.3.7
SLO Text	Suggest remedies for the problems faced by the agricultural sector of Pakistan;
Max Marks	4
Cognitive Level	U
Checking Hints	Give ONE mark for each remedy (FOUR required). Marks will be awarded on relevant remedies pertaining to the given problems. The answer may vary from the given possible answer.
Overall Performance	It was noted that candidates performed well on this question. Most candidates responded proficiently to the questions, providing the correct solutions to the problems. However, some candidates focused on the causes of the issues instead of their solutions.
Description of Better Responses	Better responses were able to offer effective solutions to the mentioned issues. For example, to address water scarcity caused by uncertain rainfall, they suggested building dams or canals for water storage. To combat crop diseases and pest attacks, they recommended using insecticides and pesticides. To improve low per-hectare production, they emphasised the

	importance of farm mechanisation and HIV seeds. Additionally, to increase soil fertility, they suggested using high-quality fertilisers and practicing crop rotation.
Image of Better Response	
Description of Weaker Responses	It was observed in weaker responses that some candidates did not provide correct solutions to the given problems; instead, they mentioned the reasons for these problems or their potential impacts on daily life. For example, to address water scarcity caused by uncertain rainfall, they suggested that a proper drainage system should be built. To combat crop diseases and pest attacks, they pointed out that these issues could lead to rotten crops or health problems. For low per-hectare production, they mentioned that crop issues could cause illnesses. Additionally, they attributed the decrease in soil fertility to the improper use of fertilisers and land pollution.
Image of Weaker Response	

S. No	Agriculture Problem	Remedy
1	Uncertain rainfall led to water scarcity	- Canals usage linked with dams & barrages - Karez system for extracting water from undergro
2	Crops diseases and pest attacks	- Use of pesticides spray. - Cut the infected part.
3	Low per hectare production	- Use of HYV seed for enhancing quality and quantity of crops.
4	Diminishing land fertility	- Use chemical or fertilizer or natural fertilizer (manure of animals).

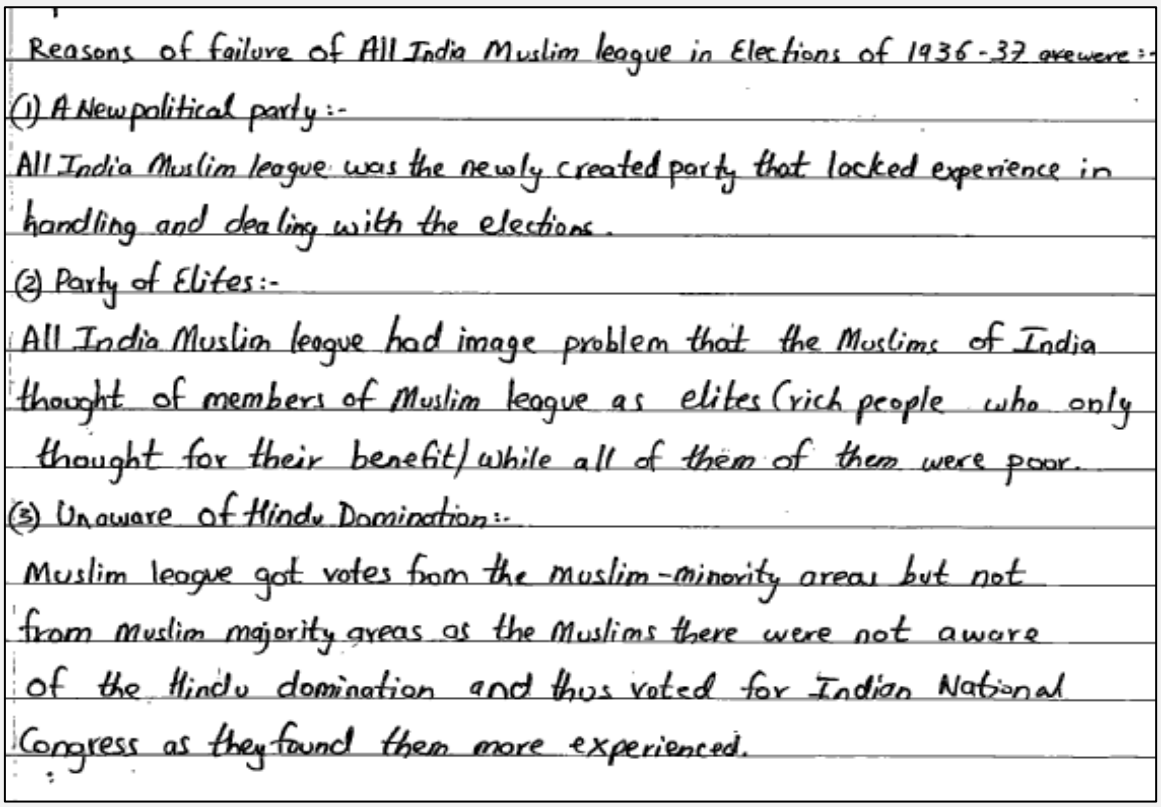

S. No	Agriculture Problem	Remedy
1	Uncertain rainfall led to water scarcity	Unnacesaasy flood and destruct of Csops.
2	Crops diseases and pest attacks	sotten Csops grown and health Psoblems.
3	Low per hectare production	Psoblem in Csops and mose health Psoblems.
4	Diminishing land fertility	less growth of Csops and land Pollution, bad fertile.

Suggestions for improvement (Highlight all that apply)

Maximising SLO Achievement	Pedagogy Used for that SLO	Assessment Strategies
• Identify the expectation of command words (use Command Word Guide) • Ensure the content is taught at the relevant cognitive level • Identify necessary content required (skills + concepts) • Review past paper questions on the concept • Utilise the resource guide for additional materials	• Story Board • Cause and Effect • Fish and Bone • Concept Mapping • Audio Visual Resources • Think, Pair and Share • Knowledge Platform videos • Questioning Technique (Socratic approach) • Practical Demonstration	• Past paper questions • Discussion on E-Marking Notes • AKU-EB Digital Learning Solution powered by Knowledge Platform https://akueb.knowledgeplatform.com/login
Any Additional Suggestion: Teachers can create a flowchart that lists each problem with two additional columns to identify the reasons behind the problem and suggest solutions. This approach will help students understand the relationship between problems, their underlying causes, and effective solutions.		

Extended Response Questions (ERQs)

Extended response questions offered a choice between parts 'a' and 'b'

Question No. 5a	
Question Text	Evaluate any THREE reasons due to which All-India Muslim League was not able to perform well in the general elections of 1936-37.
SLO No.	3.1.1
SLO Text	Analyse the reasons for the Muslim League's failure in the general elections of 1936-37;
Max Marks	06
Cognitive Level	A
Checking Hints	Give ONE mark for mentioning each reason (THREE required). Give ONE mark for evaluating each reason (THREE required).
Overall Performance	The majority of students chose option A for the extended response question. Overall, candidates addressed this question effectively, with most able to evaluate the reasons why the All-India Muslim League struggled in the general elections of 1936-1937. However, some candidates incorrectly stated that Muhammad Ali Jinnah and Mahatma Gandhi were in jail, which was not a valid reason.
Description of Better Responses	Most candidates correctly identified the reasons why the All-India Muslim League was unable to win the general elections of 1936-1937. For instance, they pointed out that the All-India Muslim League had an image problem, being perceived as a party of the elite that would not support ordinary Muslims. Another reason was that the Muslims were unaware of Hindu dominance and did not campaign in Hindu-majority areas, leading to a lack of seats. Additionally, they mentioned that the All-India Muslim League did not have a comprehensive manifesto, which made it difficult to persuade people to vote for them. Another reason mentioned by the candidates was that Quaid-e-Azam did not have enough time as president to streamline the party's policies, which hindered the party's ability to meet the demands of the Muslim.
Image of Better Response	

Reasons of failure of All India Muslim league in Elections of 1936-37 arewere :-

(1) A New political party :-

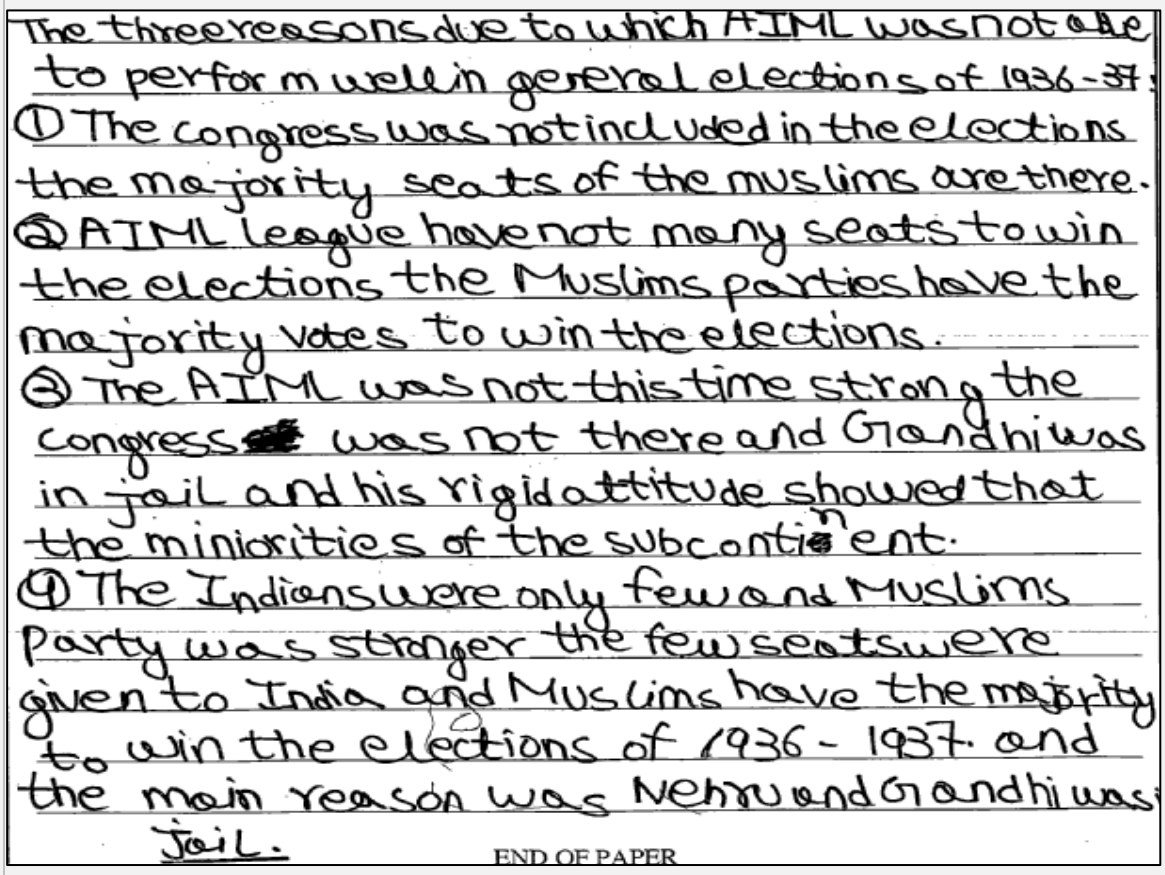

All India Muslim league was the newly created party that lacked experience in handling and dealing with the elections.

(2) Party of Elites :-

All India Muslim league had image problem that the Muslims of India thought of members of Muslim league as elites (rich people who only thought for their benefit) while all of them of them were poor.

(3) Unaware of Hindu Domination :-

Muslim league got votes from the muslim-minority areas but not from muslim majority areas as the Muslims there were not aware of the Hindu domination and thus voted for Indian National Congress as they found them more experienced.

Description of Weaker Responses	Some candidates were unable to respond to this question efficiently and mentioned incorrect reasons for the All-India Muslim League's poor performance in the general elections of 1936-1937. For example, they incorrectly stated that Muhammad Ali Jinnah and Mahatma Gandhi were in jail, while others mentioned that the Congress did not participate in the election.
Image of Weaker Response	

The three reasons due to which AIML was not able to perform well in general elections of 1936-37:
① The congress was not included in the elections the majority seats of the muslims are there.
② AIML league have not many seats to win the elections the Muslims parties have the majority votes to win the elections.
③ The AIML was not this time strong the congress was not there and Gandhi was in jail and his rigid attitude showed that the minorities of the subcontinent.
④ The Indians were only few and Muslims Party was stronger the few seats were given to India and Muslims have the majority to win the elections of 1936 - 1937. and the main reason was Nehru and Gandhi was Jail.

END OF PAPER

Suggestions for improvement (Highlight all that apply)

Maximising SLO Achievement	Preferred Pedagogy Used for this SLO	Assessment Strategies
• Identify the expectation of command words (use Command Word Guide) • Ensure the content is taught at the relevant cognitive level • Identify necessary content required (skills + concepts) • Review past paper questions on the concept • Utilise the resource guide for additional materials	• Story Board • Cause and Effect • Fish and Bone • Concept Mapping • Audio Visual Resources • Think, Pair and Share • Knowledge Platform videos • Questioning Technique (Socratic approach) • Practical Demonstration	• Past paper questions • Discussion on E-Marking Notes • AKU-EB Digital Learning Solution powered by Knowledge Platform https://akueb.knowledgeplatform.com/login

Any Additional Suggestion:
Organising Debates: Teachers are advised to arrange debates where the students can talk about the failures of general elections in front of the college/ class his approach fosters an inclusive learning environment that values diverse perspectives and empowers candidates to express their opinions constructively.

Question No. 5b	
Question Text	Hamid has 3 acres of land, but half of his land is covered with standing water. The other half of the land is used for growing crops. When he sells the crops in the market, he does not get enough money because the crops do not meet the market's requirements. With reference to the given scenario, i. identify TWO problems that are faced by Hamid. ii. describe the reason that led to the problems mentioned in (i). iii. suggest any TWO solutions to overcome each of the identified problems.
SLO No.	5.3.7
SLO Text	Suggest remedies for the problems faced by the agricultural sector of Pakistan;
Max Marks	6
Cognitive Level	A
Checking Hints	Give ONE mark for mentioning each problem (TWO required). Give ONE mark describing each reason for the mentioned problems (TWO required). Give ONE mark for writing each suggestion for the mentioned problems (TWO required). Any relevant point will be accepted, and marks will be awarded.
Overall Performance	Overall, the candidates responded well to this question. While many understood the question's requirements, some candidates struggled to correctly identify the agricultural problem and its underlying reasons within the given scenario.
Description of Better Responses	Most candidates were able to identify the correct agricultural problems according to the given scenario, such as waterlogging, poor drainage infrastructure, poor quality crops, nutrient imbalance, and limited arable land. They accurately mentioned the reasons behind these issues, such as excessive watering of crops or seepage from canals causing waterlogging, over-irrigation, poor drainage, or excessive rainfall leading to saturated soil, affecting its fertility and making it unsuitable for crop cultivation, or the lack of use of high-yielding varieties (HYVs) and improper soil management impacting crop quality. Candidates also provided solutions to these problems. For example, they suggested that farmers can install tube wells and plant eucalyptus trees to address waterlogging. Similarly, they recommended using good quality seeds, high-yielding seeds, organic or synthetic fertilisers, and modern techniques to increase crop yield. Crop rotation was also suggested as a beneficial practice.

Image of Better Response	(i) Hamid might be facing: (a) Water logging (b) Nutritional imbalan (ii) Water logging (too much water) is due to excessive storali water in half of his land that's covering it. Nutritional imbalance in crops can be a reason that he might have not provided plants with suitable nutrients they need & that's why he does not get enough money because crops do not meet market's requirement. On top of everything too much water for plant ~~of~~ of crop just kills all of its natural source & processes so the plant won't be able to grow as he thought it would. (iii) Planting eucalpeytes (water absorbing plants) can be useful for Hamid. Giving crops required amount of nutrients & creating a tube well system can help him maintain his crops.
Description of Weaker Responses	Candidates identified irrelevant agricultural problems along with incorrect reasons and solutions. They gave a general observation about other issues rather than restricting it to the scenario in the given question. For instance, they mentioned that standing water causes salinity, stating that when standing water dries up, the land will face salinity issues and suggested sprinkling limestone on the land to remove it. Another example they gave was that cows, eagles, and crows can destroy crops, and their solution was to place scarecrows in the fields to protect the crops from these birds/ animals.
Image of Weaker Response	Ans) Hamid faced these two Problems. 1) He cannot have a enough growing crops like, rice, wheat & grained and etc. that cause he cannot gets enough money of his crop Field. 2) The second Problem he faced by animals that crow, eagles and monkey would like to eat from crops. and they will destroy the crop. ii) The reason is lead to the Problems is that the animals like eating crops and he have not enough. iii) The Solution For Problems he faced. 1) The solution of first Problem is he should have to do the Parts of crop For other crops like rice, wheat, cotton and grain. 2) The second Problem solution is the he should must have to install scare crow and heis security guards

Suggestions for improvement (Highlight all that apply)

Maximising SLO Achievement	Preferred Pedagogy Used for this SLO	Assessment Strategies
• Identify the expectation of command words (use Command Word Guide) • Ensure the content is taught at the relevant cognitive level • Identify necessary content required (skills + concepts) • Review past paper questions on the concept • Utilise the resource guide for additional materials	• Story Board • Cause and Effect • Fish and Bone • Concept Mapping • Audio Visual Resources • Think, Pair and Share • Knowledge Platform videos • Questioning Technique (Socratic approach) • Practical Demonstration	• Past paper questions • Discussion on E-Marking Notes • AKU-EB Digital Learning Solution powered by Knowledge Platform https://akueb.knowledgeplatform.com/login

Any Additional Suggestion: Teachers are advised to use the following class activity to enhance analytical skills in students: Divide the class into two groups—one focusing on positive impacts and the other on negative impacts and for that instruct candidates to research the subject content. Guide students to actively participate in discussions by presenting their opinions supported by facts and data. Encourage students to take notes of their discussion points.

Annexure A: Pedagogies Used for Teaching the SLOs

Pedagogy: Storyboard
Description: A visual pedagogy that uses a series of illustrated panels to present a narrative, encouraging creativity and critical thinking. It helps learners organise ideas, sequence events, and comprehend complex concepts through storytelling.
Example: In a Literature class, students are tasked with creating storyboards to visually retell a novel. They draw key scenes, write captions, and present their stories to the class, enhancing their reading comprehension and fostering their imagination.

Pedagogy: Cause and Effect
Description: This pedagogy explores the relationships between actions and consequences. By analysing cause-and-effect relationships, learners develop a deeper understanding of how events are interconnected and how one action can lead to various outcomes.
Example: In a History class, students study the causes and effects of the Industrial Revolution. They research and discuss how technological advancements in manufacturing led to significant societal changes, such as urbanisation and labour reform movements.

Pedagogy: Fish and Bone
Description: A method that breaks down complex topics into main ideas (the fish) and supporting details (the bones). This visual approach enhances comprehension by highlighting essential concepts and their relevant explanations.
Example: During a Biology class on human anatomy, the teacher uses the fish and bone technique to teach about the human skeletal system. Teacher presents the main components of the human skeleton (fish) and elaborates on each bone's structure and function (bones).

Pedagogy: Concept Mapping
Description: An effective way to visually represent relationships between ideas. Learners create diagrams connecting key concepts, aiding in understanding the overall structure of a subject and fostering retention.
Example: In a Psychology assignment, students use concept mapping to explore the various theories of personality. They interlink different theories, such as Freud's psychoanalysis, Jung's analytical psychology, and Bandura's social-cognitive theory, to see how they relate to each other.

Pedagogy: Audio Visual Resources
Description: Incorporating multimedia elements like videos, images, and audio into lessons. This approach caters to different learning styles, making educational content more engaging and memorable.
Example: In a General Science class, the teacher uses a documentary-style video to teach about the solar system. The video includes stunning visual animations of the planets, interviews with astronomers, and background music, enhancing students' interest and understanding of space.

Pedagogy: Think, Pair, and Share
Description: A collaborative learning technique where students ponder a question or problem individually, then discuss their thoughts in pairs or small groups before sharing with the entire class. It fosters active participation, communication skills, and diverse perspectives.
Example: In a Literature in English class, the teacher poses a thought-provoking question about a novel's moral dilemma. Students first reflect individually, then pair up to exchange their opinions, and finally participate in a lively class discussion to explore different viewpoints.

Pedagogy: Questioning Technique (Socratic Approach)
Description: Based on Socratic dialogue, this method stimulates critical thinking by posing thought-provoking questions. It encourages learners to explore ideas, justify their reasoning, and discover knowledge through a process of inquiry.
Example: In an Ethics class, the instructor uses the Socratic approach to lead a discussion on the meaning of justice. By asking a series of probing questions, the students engage in a deeper exploration of ethical principles and societal values.

Pedagogy: Practical Demonstration
Description: A hands-on approach where learners observe real-life applications of theories or skills. Practical demonstrations enhance comprehension, skill acquisition, and problem-solving abilities by bridging theoretical concepts with real-world scenarios.
Example: In a Food and Nutrition class, the instructor demonstrates the proper technique for filleting a fish. Students observe and then practice the skill themselves, learning the practical application of knife skills and culinary precision.

(**Note:** The examples provided in this annexure serve as illustrations of various pedagogies. It is important to understand that these pedagogies are versatile and can be applied across subjects in numerous ways. Feel free to adapt and explore these techniques creatively to enhance learning outcomes in your specific context.)

Acknowledgments

The Aga Khan University Examination Board (AKU-EB) acknowledges with gratitude the invaluable contributions of all the dedicated individuals who have played a pivotal role in the development of the Pakistan Studies SSC-I E-Marking Notes.

We extend our sincere appreciation to Ms Anita Saleem, Specialist in Humanities at AKU-EB, for taking the subject lead during the entire process of e-marking.

Additionally, we express our gratitude to the esteemed team of reviewers for their constructive feedback on overall performance, better and weaker responses, and validating teaching pedagogies along with suggestions for improvement.

These contributors include:

• Sania Iqbal, Specialist, Curriculum and Examination Development, AKU-EB

• Munira Muhammad, Lead Specialist, Assessment, AKU-EB

• Zain Muluk, Manager, Examination Development, AKU-EB

• Raabia Hirani, Manager, Curriculum Development, AKU-EB

• Dr Naveed Yousuf, CEO, AKU-EB
