AGA KHAN UNIVERSITY EXAMINATION BOARD

HIGHER SECONDARY SCHOOL CERTIFICATE

CLASS XI EXAMINATION

APRIL/ MAY 2019

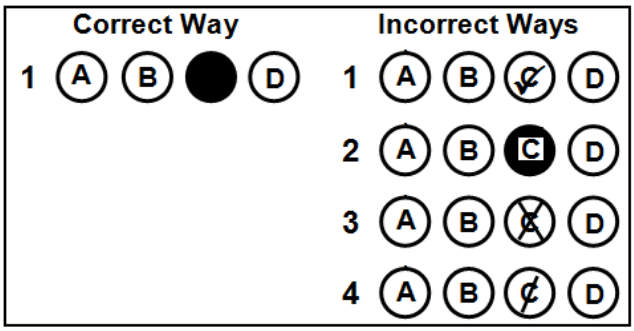

Computer Science Paper I

Time: 45 minutes Marks: 30

April/ May 2019 for Teaching & Learning only

INSTRUCTIONS

1. Read each question carefully.
2. Answer the questions on the separate answer sheet provided. DO NOT write your answers on the question paper.
3. There are 100 answer numbers on the answer sheet. Use answer numbers 1 to 30 only.
4. In each question, there are four choices A, B, C, D. Choose ONE. On the answer grid, black out the circle for your choice with a pencil as shown below.

Candidate's Signature

5. If you want to change your answer, ERASE the first answer completely with a rubber, before blacking out a new circle.
6. DO NOT write anything in the answer grid. The computer only records what is in the circles.

1. The number of stages in the data processing cycle is

   A. 2
   B. 3
   C. 4
   D. 5

2. An example of database software is

   A. Microsoft PowerPoint.
   B. Microsoft Access.
   C. Microsoft Word.
   D. Microsoft Excel.

3. Omar is travelling to Sukkur (Sindh) for a workshop. He will be required to do the following tasks:

   - Show a presentation to 25 participants
   - Play an audio clip during the presentation
   - Capture pictures of the training workshop
   - Email the pictures as an attachment to his manager

   The set of devices, other than laptop, that Omar would need to do all these tasks is

   A. printer, speaker, scanner and flash drive.
   B. projector, microphone, camera and flash drive.
   C. projector, speakers, camera and network interface card.
   D. printer, microphone, scanner and network interface card.

4.
   - It has less access time.
   - It stores data temporarily.
   - It is used for a computer's cache memory.

   The type of memory that has the given features is

   A. dynamic random access memory.
   B. static random access memory.
   C. read only memory.
   D. flash memory.

April/ May 2019
for
Teaching & Learning only

5.

- File Management
- Memory Management
- Processor Management
- Input/ Output Device Management

All of these functions are performed by the

A. utility software.
B. operating system.
C. application software.
D. compiler and interpreter.

6. The stage of system development life cycle (SDLC) during which changes are made to software and hardware to support the system's operational effectiveness is

A. testing.
B. debugging.
C. maintenance.
D. problem analysis.

7. The hardware devices required to build a computer network are

A. bridge, firewall and monitor.
B. firewall, modem and scanner.
C. modem, monitor and scanner.
D. bridge, firewall and modem.

8. RS-232 is the most common standard of the

A. physical layer.
B. data link layer.
C. network layer.
D. transport layer.

9. Which of the following correctly differentiates between client server model and peer-to-peer model of networks?

	Client Server Model	Peer-to-Peer Model
A	It is hard to manage.	It is easy to manage.
B	It is centralised model.	It is decentralised model.
C	It is inexpensive to implement.	It is expensive to implement.
D	It is suitable for small number of users.	It is suitable for large number of users.

April/ May 2019 for Teaching & Learning only

10. A topology in which each node is connected to exactly two other nodes is

    A. bus topology.
    B. star topology.
    C. ring topology.
    D. tree topology.

11. If computer **A** sends data to computer **B**, then the first open system interconnection (OSI) model layer at computer **B** through which data will be received is

    A. application layer.
    B. transport layer.
    C. network layer.
    D. physical layer.

12. The device that works on data link layer of OSI model is

    A. connector.
    B. switch.
    C. router.
    D. cable.

13. The set of CORRECT examples of the three data communication modes is

	Simplex Transmission	**Half-Duplex Transmission**	**Full Duplex Transmission**
A	Radio Broadcast	Walkie-Talkie	Telephone
B	Telephone	Radio Broadcast	Walkie-Talkie
C	Walkie-Talkie	Radio Broadcast	Telephone
D	Radio Broadcast	Telephone	Walkie-Talkie

14. The component of fibre optic cable that protects it from physical damage is

    A. core.
    B. jacket.
    C. buffer.
    D. cladding.

April/May 2019 for Teaching & Learning only

15. The image that has the lowest resolution is

			
A	**B**	**C**	**D**

16. The CORRECT difference between serial and parallel communication is

	Serial Communication	Parallel Communication
A	It is expensive to implement.	It is cheap to implement.
B	It sends multiple bits of data at a time.	It sends one bit of data at a time.
C	It has fast data communication speed.	It has slow data communication speed.
D	It is used for long distance communication.	It is used for short distance communication.

17. The maximum capacity of a link to transfer data from sender to receiver over a computer network is called

A. baseband.
B. bandwidth.
C. full duplex.
D. modulation.

18. The communication medium that is most commonly used for the distribution of cable television signals is

A. fibre optics.
B. microwave.
C. coaxial cable.
D. twisted-pair cable.

April May 2019 for Teaching & Learning only

19. Hina is a school teacher. She wants to generate graphs that represent percentages of marks obtained by all students of her class. The most suitable software to do this task is

A. spreadsheet.
B. word processor.
C. graphics package.
D. presentation software.

20. The MOST important concern associated with online banking is

A. excessive cost.
B. delayed services.
C. compromise of privacy.
D. lack of availability of services.

21. One of the core applications of computer aided design (CAD) is designing

A. cars.
B. maps.
C. posters.
D. presentations.

22. One of the potential drawbacks of e-commerce is that

A. it allows comparing prices among several providers.
B. it needs a well-built website but not the infrastructure.
C. consumer is unable to experience the product before purchase.
D. consumer can read the online good or bad reviews about a product.

23. When a processor writes data into the main memory, it sends a signal to initiate the data writing process. This signal is sent via

A. data bus.
B. serial port.
C. control bus.
D. parallel port.

24. An instruction performs a simple division of two integers.

The CPU register that would store the result of division is

A. program counter register.
B. accumulator register.
C. instruction register.
D. data buffer register.

April/ May 2019
for
Teaching & Learning only

25. In fetch-decode-execute cycle, the fetch operation places the instruction fetched from the memory into the

A. program counter register.
B. data buffer register.
C. instruction register.
D. flag register.

26. Which of the following is TRUE about Trojan horse?

A. It replicates itself over network.
B. It affects boot sector of floppy disk.
C. It replicates itself within a computer.
D. It seems as valid beneficial software but it is not.

27. A file named **NewFile** with **.xls** extension is saved in the folder named **MyFiles.**

The folder, **MyFiles**, is located within another folder named **MyData** which is saved in drive **D**.

The file path that should be used to open this file is

A. D:\MyData\MyFiles\NewFile.xls
B. D:\MyFiles\MyData\NewFile.xls
C. D:\\MyData\MyFiles\NewFile.xls
D. D:\\MyFiles\MyData\NewFile.xls

28. The CORRECT sequence of steps to insert WordArt in an MS Word file is

1. Click the **Insert** tab 2. Click **WordArt** in the Text group 3. Select **Character Style** from the drop-down menu 4. Type the text in the textbox and **Format** it according to needs	1. Click **WordArt** in the Text group 2. Click the **Insert** tab 3. Select **Character Style** from the drop-down menu 4. Type the text in the textbox and **Format** it according to needs
A	B
1. Select **Character Style** from the drop-down menu 2. Click **WordArt** in the Text group 3. Click the **Insert** tab 4. Type the text in the textbox and **Format** it according to needs	1. Type the text in the textbox and **Format** it according to needs 2. Click the **Insert** tab 3. Click **WordArt** in the Text group 4. Select **Character Style** from the drop-down menu
C	D

April/ May 2019 for Teaching & Learning only

29. Consider the given part of MS Excel sheet.

	A	B	C
1	5	4	1
2	10	6	3
3	15	8	5
4	20	10	7
5	25	12	9
6	30	14	11

The MS Excel formula that will **add** the values of cells A1, A2, A3, A4, A5 and B2 giving result 81 is

A. =ADD(A1:A5:B2)
B. =ADD(A1:A5,B2)
C. =SUM(A1:A5:B2)
D. =SUM(A1:A5,B2)

30. Which of the following options represents the hostname in the given email address?

alizeh@spark.edu

A. @
B. edu
C. spark
D. alizeh
