May 2019 for learning only

11. The method of irrigation that provides water directly to the roots without any wastage is

A. drip irrigation.
B. sprinkle irrigation.
C. sub-surface irrigation.
D. free-flooding irrigation.

12. The renewable source of energy is

A. coal.
B. water.
C. petroleum.
D. natural gas.

13. A brownish black coal has a high moisture content (up to 45 %) and a high sulphur content. It is more like soil than a rock and tends to disintegrate when exposed to the weather.

The given characteristics are of

A. lignite.
B. anthracite.
C. bituminous.
D. sub-bituminous.

14. All of the following are considered as a natural source of fibre in textile industry EXCEPT

A. silk.
B. jute.
C. nylon.
D. cotton.

15. A pre-requisite factor for the establishment of iron and steel industry is the supply of

A. coal.
B. water.
C. power.
D. labour.

16. An artificial waterway located in Egypt that

- connects the Red Sea to the Mediterranean Sea.
- allows ships to sail between Europe and Asia by avoiding Africa.

The given information refers to

A. Suez canal.
B. Panama canal.
C. Suzhou canal.
D. Stockholm canal.

April/ May 2019 for Teaching & Learning only

17. The last railway junction in the province of Khyber Pakhtunkhwa by the year 2017 is

A. Haripur.
B. Mardaan.
C. Havelian.
D. Nowshera.

18. The port that is operational throughout the year for international trade is a/ an

A. cargo port.
B. inland port.
C. fishing port.
D. warm water port.

19. Which of the following is the most important function performed by the 'iron and steel industry' that leads to the economic development of a country?

A. It is the basic component of the domestic demand.
B. It produces the basic component for cyber industry.
C. It supplies the basic component for construction industry.
D. It provides basic raw material for the consumer-based industries.

20. The soil that is rich in nutrients and is MOST suitable for agriculture is called

A. silt.
B. aeolian.
C. residual.
D. alluvium.

21. The border between Pakistan and China is known as

A. Durand Line.
B. Sino-Pak Line.
C. Radcliffe Line.
D. Gold Smith Line.

22.

- The border is 909 km long.
- The border initially was cordoned off by bordering fence.
- Concrete walls (three feet thick and 10 feet high) at the border are currently under construction at various places to stop smuggling.

These are the features of the border between Pakistan and

A. Iran.
B. India.
C. China.
D. Afghanistan.

April/ May 2019 for Teaching & Learning only

23. With reference to the world's population distribution 2017-18, which of the following regions is considered as the most densely populated region in the world?

A. South Asia
B. Central Africa
C. Latin America
D. Eastern Europe
