AGA KHAN UNIVERSITY EXAMINATION BOARD

HIGHER SECONDARY SCHOOL CERTIFICATE

CLASS XII EXAMINATION

APRIL/ MAY 2019

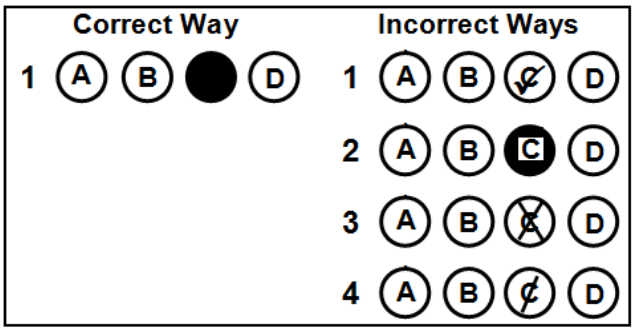

Computer Studies Paper I

Time: 40 minutes Marks: 25

April/ May 2019 for Teaching & Learning only

INSTRUCTIONS

1. Read each question carefully.
2. Answer the questions on the separate answer sheet provided. DO NOT write your answers on the question paper.
3. There are 100 answer numbers on the answer sheet. Use answer numbers 1 to 25 only.
4. In each question, there are four choices A, B, C, D. Choose ONE. On the answer grid, black out the circle for your choice with a pencil as shown below.

Candidate's Signature

5. If you want to change your answer, ERASE the first answer completely with a rubber, before blacking out a new circle.
6. DO NOT write anything in the answer grid. The computer only records what is in the circles.

1. As compared to digital computers, analogue computers

   A. have no memory disc or chip.
   B. can also process noisy signals.
   C. use switches for representing 0s and 1s.
   D. show results on monitor, screen or LCD.

2. The type of computer used in large organisations to which many users are connected by using only a keyboard and monitor is called a

   A. minicomputer.
   B. microcomputer.
   C. super computer.
   D. mainframe computer.

3. Which of the following is a portable computer?

   A. Minicomputer
   B. Super computer
   C. Palmtop computer
   D. Mainframe computer

4. An image with different resolutions is shown below. Which of these images has the lowest resolution?

			
A	B	C	D

5. An output device that uses pen to draw lines on paper according to the commands received from the computer is

   A. printer.
   B. plotter.
   C. monitor.
   D. DVD writer.

6. One gigabyte of memory storage capacity is equal to

   A. 1024 megabytes.
   B. 1024 kilobytes.
   C. 1024 terabytes.
   D. 1024 bytes.

Apr/May 2019 Teaching for learning only

7. The example(s) of optical storage media is/ are

I. DVD
II. Hard disc
III. CD drive

A. I only.
B. III only.
C. I and III.
D. II and III.

8. Which of the following statements is TRUE for ROM?

A. It allows only writing of data.
B. It allows both reading and writing of data.
C. Its contents are lost when the power is off.
D. Its contents are retained when the power is off.

9. A byte consists of 8 bits and a nibble consists of 4 bits. If each alphabet of English language requires 2 nibbles memory in computer, then the number of bytes required to store the word ALPHA in the computer memory is

A. 40
B. 30
C. 10
D. 5

10. The example(s) of alphanumeric data is/ are

I. Name
II. Email address
III. Passport number

A. II only.
B. I and II.
C. I and III.
D. II and III.

11. The 2's complement of $(10001110)_2$ is

A. $(10001111)_2$
B. $(01110001)_2$
C. $(11110001)_2$
D. $(01110010)_2$

12. $(101)_2 \times (11)_2$ is equal to

A. $(1111)_2$
B. $(1010)_2$
C. $(1001)_2$
D. $(1011)_2$

April/ May 2019 for Teaching & Learning Only

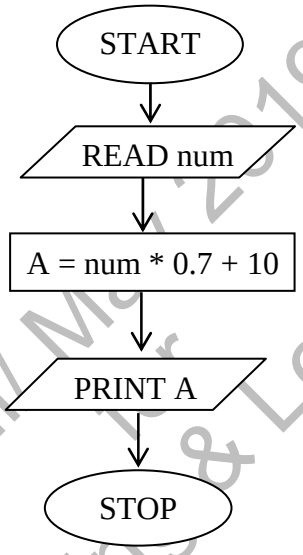

13. All of the following are application software EXCEPT

A. word processor.
B. device drivers.
C. web browser.
D. spreadsheet.

14. User documentation does NOT have

A. potential problems that might occur during use.
B. description of the required data.
C. flowcharts of the program.
D. description of output.

15. Study the flowchart given below.

If the input value is 1000, then the output value would be

A. 700
B. 710
C. 1010
D. 10700

16. A program was written to multiply three numbers and show results. Due to an error, the result shows addition of three numbers instead. This type of error is called

A. execution error.
B. memory error.
C. syntax error.
D. logic error.

April/ May 2019 For Teaching & Learning only

17. The variable that will store the name of a person is

A. string variable.
B. integer variable.
C. single-precision variable.
D. double-precision variable.

18. An example of a valid variable name in GW-BASIC is

A. First Number%
B. %First Number
C. First_Number%
D. %First_Number

19. Consider the arithmetic expression given below.

$A = X^5Y \div Z$

In GW-BASIC programing, the CORRECT representation of this arithmetic expression is

A. A = (X^5 * Y) / Z
B. A = (X^5 * Y) ÷ Z
C. A = (X^5 * Y) / Z
D. A = (X^5 * Y) ÷ Z

20. How many times should the given For Loop statement be repeated?

```
10    FOR D = 0 to 20 STEP 3
```

A. 20
B. 21
C. 7
D. 6

21. Consider the given GW-BASIC code.

```
10    CLS
20    INPUT "Value of J", J
30    IF ((J < =100 ) AND (J >= 70)) THEN PRINT "Good" ELSE 40
40    IF ((J < =69 ) AND (J >= 45)) THEN PRINT "Satisfactory" ELSE 50
50    IF ((J < =44 ) AND (J >= 0)) THEN PRINT "Poor" ELSE 60
60    PRINT "Incorrect Marks"
70    END
```

If J is equal to 53, then the output of this code will be

A. Incorrect Marks
B. Satisfactory
C. Good
D. Poor

April/ May 2019 for Teaching & Learning only

22. Consider the given GW-BASIC code.

```
10    X = 15
20    INPUT "Value of Y", Y
30    WHILE Y < > 0
40    X = X + Y
50    INPUT "Value of Y", Y
60    WEND
70    PRINT X
80    END
```

The output of the given GW-BASIC program for the input sequence of numbers 17, 6, 90, 0 is

A. 128
B. 113
C. 107
D. 96

23. While declaring a GW-BASIC array, the DIM keyword will be used if the array dimension is

A. 0
B. 5
C. 9
D. 10

24. PRINT 5 ^ 5 + 5 * 5

The output of the given GW-BASIC statement is

A. 50
B. 150
C. 3125
D. 3150

25. Consider the following program.

```
10    FOR x = ?  to ? step ?
20    PRINT x
30    NEXT x
```

What should be the values assigned in the loop in place of question marks so that the following series is generated.

99, 97, 95,….. 5, 3, 1

A. FOR x = 1 to 99 step 2
B. FOR x = 99 to 1 step 2
C. FOR x = 1 to 99 step - 2
D. FOR x = 99 to 1 step - 2
