AGA KHAN UNIVERSITY EXAMINATION BOARD

HIGHER SECONDARY SCHOOL CERTIFICATE

CLASS XII

ANNUAL EXAMINATIONS (THEORY) 2024

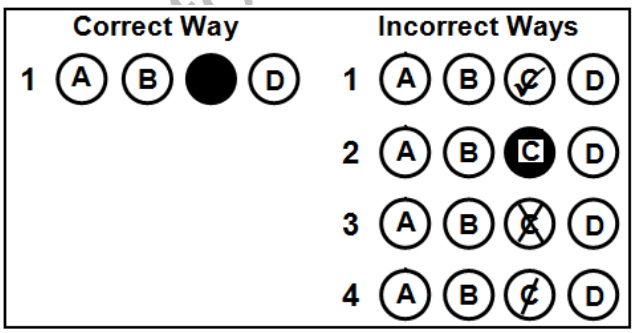

Computer Studies Paper I

Time: 1 hour 10 minutes Marks: 40

AKU-EB Annual Examinations 2024 for Teaching & Learning only

INSTRUCTIONS

1. Read each question carefully.
2. Answer the questions on the separate answer sheet provided. DO NOT write your answers on the question paper.
3. There are 100 answer numbers on the answer sheet. Use answer numbers 1 to 40 only.
4. In each question, there are four choices A, B, C, D. Choose ONE. On the answer grid, black out the circle for your choice with a pencil as shown below.

Candidate's Signature

5. If you want to change your answer, ERASE the first answer completely with a rubber, before blacking out a new circle.
6. DO NOT write anything in the answer grid. The computer only records what is in the circles.
7. You may use a scientific calculator if you wish.

1. An example of entertainment software is

   A. Media player.
   B. MS Access.
   C. Windows.
   D. MS Paint.

2. The number of stages in data processing cycle is

   A. 2
   B. 3
   C. 4
   D. 5

3. Which of the following is an automatic data capturing device?

   A. Barcode reader
   B. Keyboard
   C. Printer
   D. Mouse

4. On converting 2 MB into nibbles, we get

   A. 2048
   B. 1048576
   C. 2097152
   D. 4194304

5. Consider the following characteristics of a printer.

   - It uses ink ribbons.
   - Its printing quality is low.
   - It produces noise while printing.

   The printer with given characteristics is identified as

   A. laser printer.
   B. inkjet printer.
   C. thermal printer.
   D. dot matrix printer.

6. The phase of system development life cycle (SDLC) in which the plan is executed is

   A. design and development.
   B. testing and debugging.
   C. implementation.
   D. maintenance.

AKU-EB Annual Examinations 2024 for Teaching & Learning only

7. Which of the following is a benefit of using e-commerce?

   A. Dependency on internet
   B. Duration of shipping time
   C. Availability of reviews about products
   D. Experience of products before purchasing

8. The industry that uses robots is MOST commonly known as

   A. manufacturing.
   B. marketing.
   C. education.
   D. financial.

9. A CPU register that holds the address instruction that is being executed is

   A. memory address register.
   B. memory buffer register.
   C. program counter.
   D. accumulator.

10. Consider the given characteristics.

   - It can only read data.
   - It is slow in execution.
   - The stored data is not easily accessible.
   - It can store data even if the power is turned off.

   The type of memory identified from the given characteristics is

   A. RAM.
   B. ROM.
   C. cache.
   D. register.

11. The shortcut key in MS Word to paste the copied text is

   A. Ctrl+C
   B. Ctrl+P
   C. Ctrl+V
   D. Ctrl+X

AKU-EB Annual Examinations 2024 for Teaching & Learning only

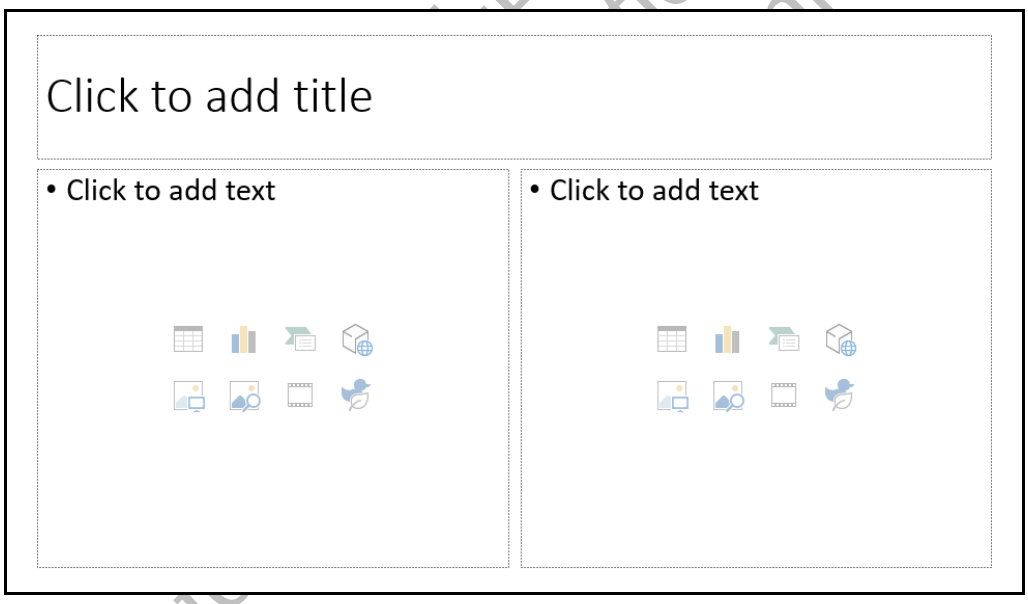

12. Consider the given image of an excel sheet.

	A	B
1	**Job Title**	**Number of Staff**
2	Director	3
3	Engineer	12
4	Analyst	5
5	Sales officer	9
6	Clerk	12

To calculate the average number of staff, the MS Excel formula used will be

A. Avg (B2:B6)
B. =Avg (B2:B6)
C. Average (B2:B6)
D. =Average (B2:B6)

13. Consider the given image.

The layout of the MS PowerPoint in the given image is

A. Comparison.
B. Two Content.
C. Title and Content.
D. Content with Caption.

14. Which of the following is NOT a database object?

A. Form
B. Query
C. Record
D. Relationship

15. Asad has applied a database relationship on two tables **X** and **Y**. In this relationship, one row of table **X** is linked with multiple rows of table **Y**, but in table **Y**, one row can only be linked to one row of table **X**.

The relationship that Asad has applied is

A. one-to-one.
B. one-to-many.
C. many-to-one.
D. many-to-many.

16. An example of valid field name in MS Access is

A. Total.Marks
B. Total[Marks
C. Total!Marks
D. Total_Marks

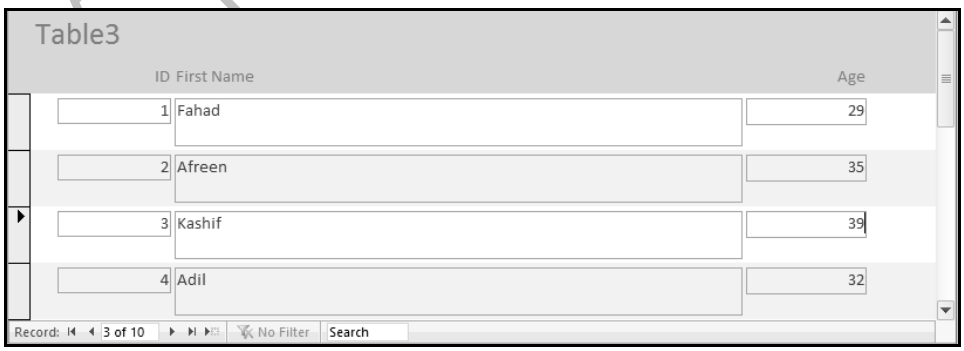

17. Hamza wants to change the data type of a field. The type of view he should use to perform this task is

A. Design view.
B. Datasheet view.
C. PivotChart view.
D. PivotTable view.

18. Which of the following is the purpose of forms in a database?

A. To store data
B. To retrieve data from tables
C. To provide a user-friendly interface
D. To preview or print data in different formats

19. There are four different types of forms in MS Access.

The given type of form is

A. tabular form.
B. justified form.
C. datasheet form.
D. columnar form.

AKU-EB Annual Examinations 2024 Teaching & Learning only

20. Consider the given flowchart symbol.

This symbol is used to represent the

A. decision in a flowchart.
B. processing in a flowchart.
C. off-page connector in a flowchart.
D. starting and ending in a flowchart.

21. Consider the given algorithm.

```
Step 1: Start
Step 2: P = 5
Step 3: Q = 8
Step 4: R = P*Q-2
Step 5: Output R
Step 6: Stop
```

The output of this algorithm is

A. 38
B. 30
C. 24
D. 21

22. Consider the given actions.

- Find out about the problem.
- Obtain information from the problem.
- Carefully read the problem to understand it.

The step of problem solving in which these actions are performed is

A. defining the problem.
B. analysing the problem.
C. planning the solutions of the problem.
D. selecting the best solution of the problem.

AKU-EB Annual Examinations 2024 for Teaching & Learning only

23. Following are the features of programming languages.

I. It uses mathematical operators and English words.
II. It deals with variables, stacks etc.
III. It is machine dependent.

High level programming is described by the feature(s)

A. I only.
B. III only.
C. I and II.
D. II and III.

24. The shortcut key to compile a program in Turbo C IDE is

A. Ctrl+F9
B. Alt+F9
C. F9
D. F8

25. Which of the following is NOT an advantage of C language over other programming languages?

A. It is a portable language.
B. It is used to make classes.
C. It is a middle level language.
D. It is a block-structured language.

26. In C language, a statement ends with a

A. bracket.
B. semicolon.
C. right brace.
D. right parenthesis.

27. In C language, the output of a compiler is called

A. assembly code.
B. machine code.
C. source code.
D. object code.

28. Which of the following is the file extension of an object code in a C program?

A. .c
B. .lib
C. .obj
D. .exe

Annual AKU-EB Examinations 2024 for Teaching & Learning only

29. The CORRECT syntax for a multi-line comment in a C program is

A. /Comment
B. //Comment
C. /*Comment
D. /*Comment*/

30. A function that gives all kinds of output is

A. puts
B. putc
C. printf
D. putchar

31. The data type that can store the largest decimal value is

A. int
B. long
C. float
D. double

32. An escape sequence used to show an end of string is

A. \r
B. \a
C. \b
D. \0

33. The CORRECT input statement to take a single character as an input is

A. scanf("%f", &var_1)
B. scanf("%s", &var_1)
C. scanf("%c", &var_1)
D. scanf("%d", &var_1)

34. All of the following are used to perform logical operations EXCEPT

A. !
B. ||
C. !=
D. &&

AKU-EB Annual Examinations 2024 for Teaching & Learning only

35. Consider the given C program.

```
#include <stdio.h>
int main() {
  int x = 10;
  int y = 3;
  printf ("Result = %d" , 10 - x % 5 * y);
return 0;
}
```

The output of this program is

A. 4
B. 10
C. 24
D. 30

36. The number of repetition due to the given **for loop** statement is

for (i = 15; i > 3; i -=3)

A. 4
B. 5
C. 11
D. 12

37. Consider the given syntax.

```
if (condition)
{
   //statement;
}
```

The given syntax is an example of

A. if-else structure.
B. if-else-if structure.
C. nested if structure.
D. simple if structure.

38. A control statement in which the program control skips the rest of the loop statement(s) and moves to the next iteration in the loop is a

A. break.
B. switch.
C. continue.
D. do-while.

AKU-EB Annual Examinations 2024 for Teaching & Learning only

39. The CORRECT syntax to declare a user-defined function named Add that takes two integer arguments is

A. int Add (int x, y);
B. int Add (int x, int y);
C. integer Add (integer x, y);
D. integer Add (integer x, integer y);

40. Consider the following properties.

I. It reduces the readability of code.
II. It allows the division of complex code.
III. It increases the reusability of code.

The property(ies) that is/ are FALSE about function is

A. I only.
B. III only.
C. I and II.
D. II and III.
