Aga Khan University Examination Board

Notes from E-Marking Centre on HSSC-II Pakistan Studies Examination May 2018

Introduction:

This document has been produced for the teachers and candidates of the Higher Secondary School Certificate (HSSC) Part II subject in Pakistan Studies. It contains comments on candidates' responses to the 2018 HSSC-II Examination, indicating the quality of the responses and highlighting their relative strengths and weaknesses.

E-Marking Notes:

This includes overall comments on students' performance on every question and *some* specific examples of students' responses which support the mentioned comments. Please note that the descriptive comments represent an overall perception of the better and weaker responses as gathered from the e-marking session. However, the candidates' responses shared in this document represent some specific example(s) of the mentioned comments.

Teachers and candidates should be aware that examiners may ask questions that address the Student Learning Outcomes (SLOs) in a manner that require candidates to respond by integrating knowledge, understanding and application skills they have developed during the course of study. Candidates are advised to read and comprehend each question carefully before writing the response to fulfil the demand of the question.

Candidates need to be aware that the marks allocated to the questions are related to the answer space provided on the examination paper as a guide to the length of the required response. A longer response will not in itself lead to higher marks. Candidates need to be familiar with the command words in the SLOs which contain terms commonly used in examination questions. However, candidates should also be aware that not all questions will start with or contain one of the command words. Words such as 'how', 'why' or 'what' may also be used.

General Comments:

The paper of Pakistan Studies at this level comprises of several components. This year candidates did fairly well in the questions which required more of a general approach. Whereas, it was generally felt that the students are not able to perform well in the question which were specific in nature in terms of effects of inflation, effects of certain type of pollution on climate, and the salient features of foreign policy envisaged by Quaid-e-Azam. Most candidates performed poorly in questions dealing with foreign policy part. However some candidates produced good responses to questions from these sections well. It seemed that the candidates were not well prepared to answer questions from the above mentioned topics. It was also observed that candidates do not spend time in reading questions which lead to poor answers as in most cases, candidates prepared a general response which they wrote without realizing the demand of the question.

Note: Candidates' responses reproduced in this report have not been corrected for grammar, spelling, format or factual information.

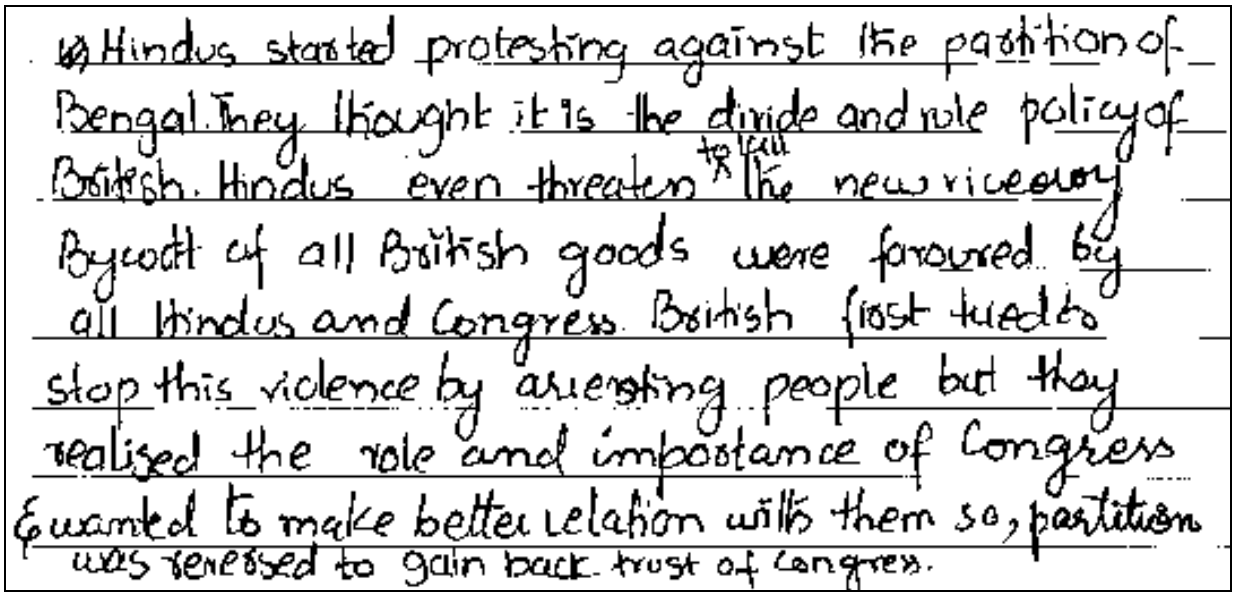

Detailed Comments:

Constructed Response Questions (CRQs)

Question 1:
Describe the reasons behind the reversal of partition of Bengal in 1911?

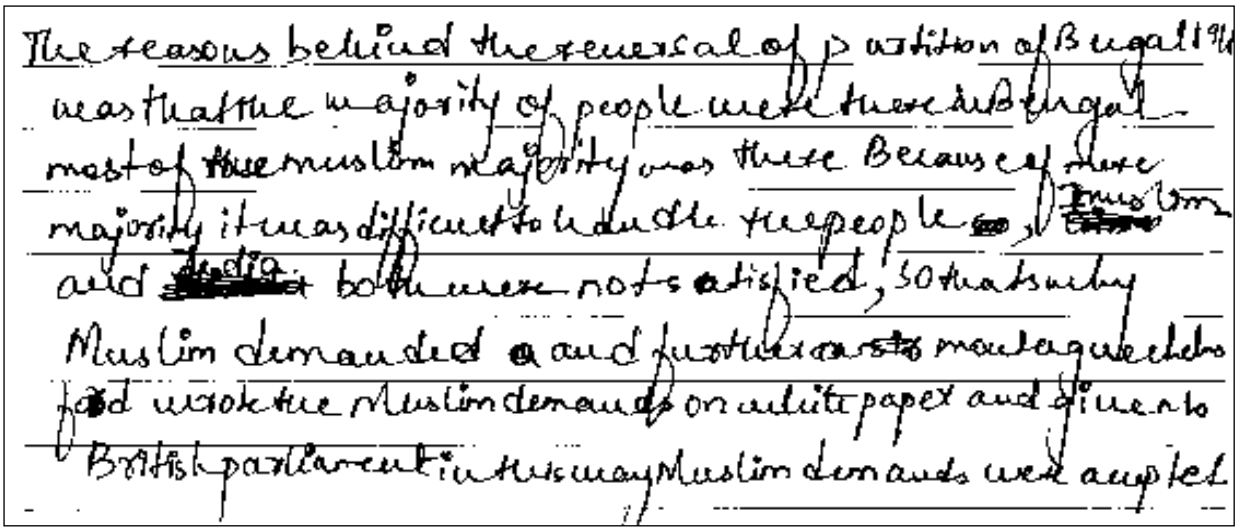

Better responses covered the reasons in a well-articulated manner, covering all the aspects that have resulted in the reversal of the partition of Bengal which included the protests and riots done by the Hindus, introduction of Swadeshi movement, i.e. boycott of British goods. Candidates also mentioned the attack on the Viceroy.

Example:

Hindus started protesting against the partition of Bengal. They thought it is the divide and rule policy of British. Hindus even threaten to kill the new viceroy. Bycodt of all British goods were favoured by all Hindus and Congress. British first tried to stop this violence by arresting people but they realised the role and importance of Congress & wanted to make better relation with them so, partition was reversed to gain back trust of Congress.

Weaker responses reflected lack of understanding of the candidates in terms of the reversal of Bengal; they majorly mentioned the causes behind the partition rather than its reversal. This reflected that the candidates have not read the entire question or have not spent time in comprehending the question, resulting in an inappropriate response.

Example:

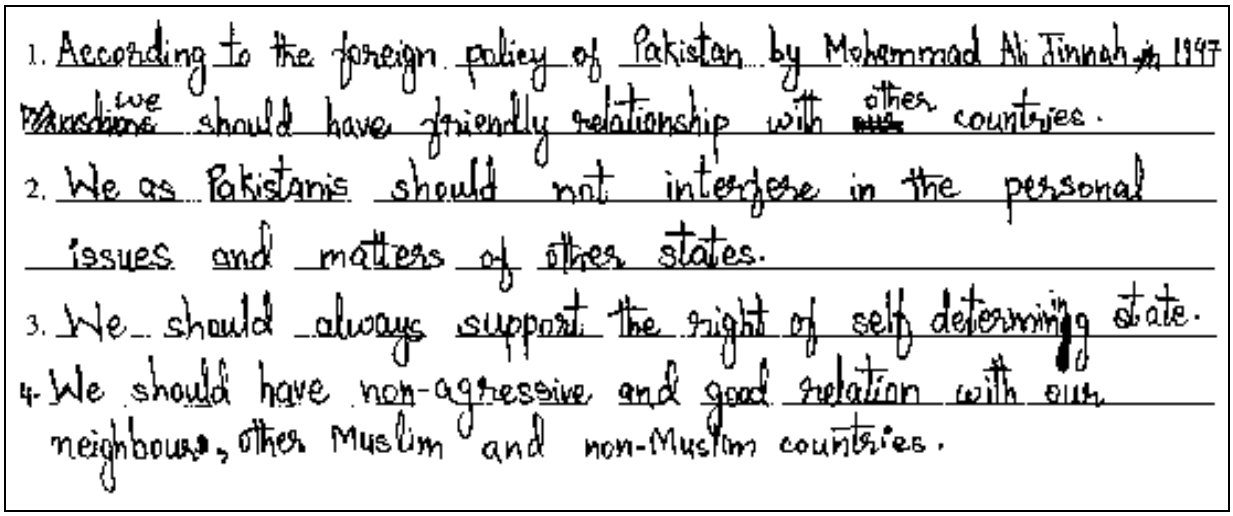

The reasons behind the reversal of partition of Bengal 1911 was that the majority of people were there in Bengal most of the muslim majority was there. Because of there majority it was difficult to handle the people, Muslim and Hindu both were not satisfied, so that's why Muslim demanded a and further a separate electorate for Muslim demands on white paper and given to British parliament in this way Muslim demands were accepted.

Question 2:

What were the salient features of the foreign policy envisaged for Pakistan by the founder of the nation, Muhammad Ali Jinnah, in 1947?

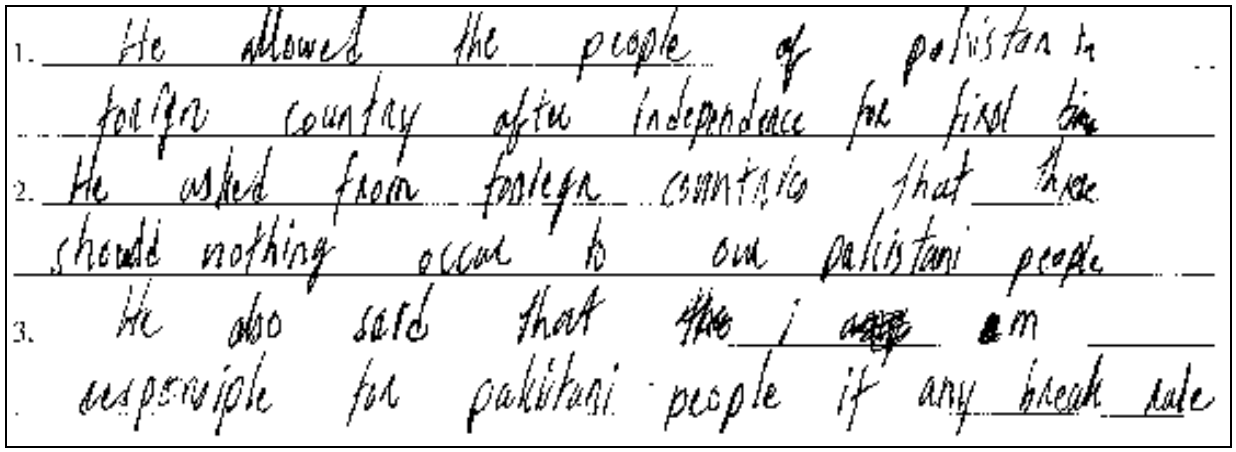

Better responses highlighted that the candidates were able to mention the features of the foreign policy presented by Quaid-e-Azam Muhammad Ali Jinnah which includes honesty and fair play in national and international dealings, preservation of the ideology of Pakistan. Candidates also wrote that being an independent sovereign state Pakistan will maintain its independence, regional co-operation with the states, support for the right of self-determination, protection of national security/ interest and there will be no aggressive designs against any country or nation etc.

Example:

1. According to the foreign paliey of Pakistan by Mohammad Ali Jinnah in 1947 we should have friendly relationship with other countries.
2. We as Pakistanis should not interfere in the personal issues and matters of other states.
3. We should always support the right of self determining state.
4. We should have non-aggressive and good relation with our neighbours, other Muslim and non-Muslim countries.

Weaker responses were not able to be specific in their answers and mentioned general descriptions such as foreign policy should be made to develop relationships with other countries. Few responses even mentioned that Quaid-e-Azam mentioned the advocacy of the interests of Muslim nations. These points were not aligned with the thoughts of Quaid-e-Azam, thus such responses did not entail any marks.

Example:

1. He allowed the people of pakistan to foreign country after independence for first time
2. He asked from foreign countries that there should nothing occur to our pakistani people
3. He also said that the i am responsible for pakistani people if any break rule

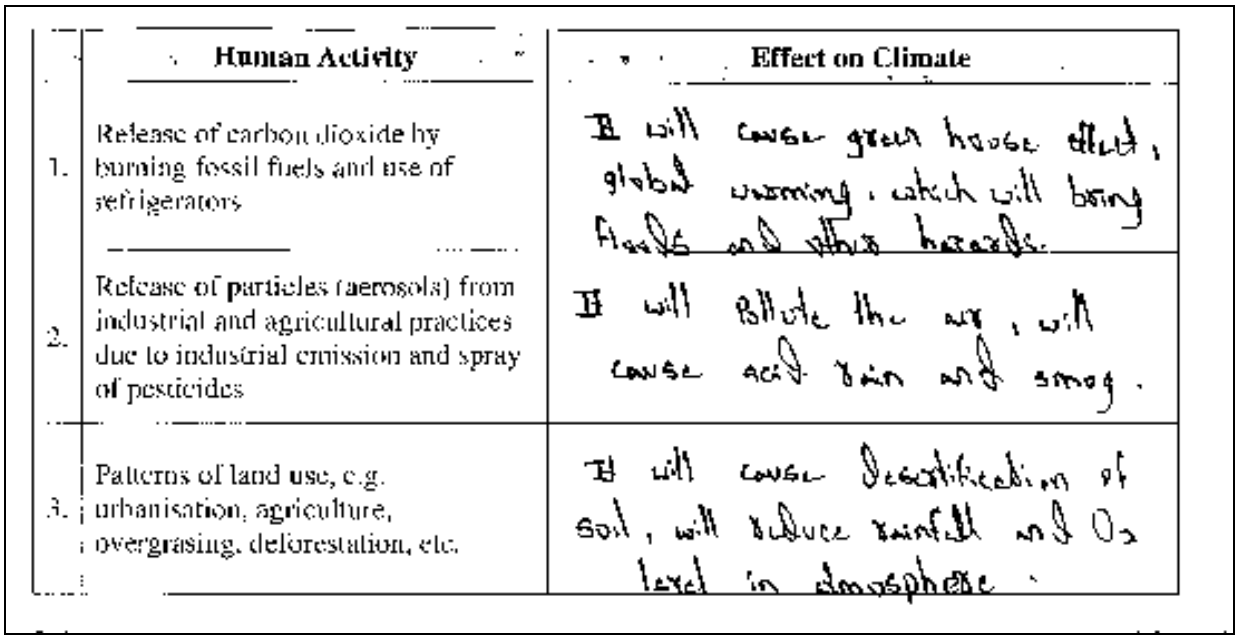

Question 3:

How do the following human activities affect the climate?

	Human Activity	Effect on Climate
1.	Release of carbon dioxide by burning fossil fuels and use of refrigerators	
2.	Release of particles (aerosols) from industrial and agricultural practices due to industrial emission and spray of pesticides	
3.	Patterns of land use, e.g. urbanisation, agriculture, overgrasing, deforestation, etc.	

Better responses were those which had linked the human activity with that of the effect on climate, this included the change in the minimum and maximum temperatures, change in the rainfall patterns, occurrence of floods, acid rain etc.

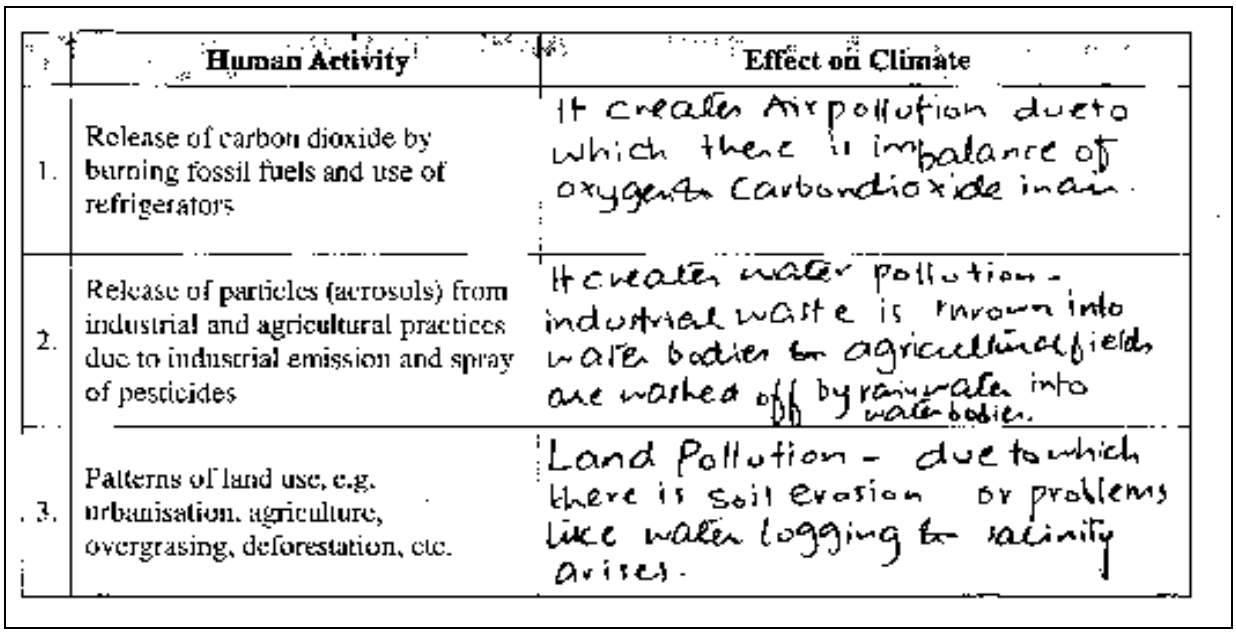

Example:

	Human Activity	Effect on Climate
1.	Release of carbon dioxide by burning fossil fuels and use of refrigerators	It will cause green house effect, global warming, which will bring floods and other hazards.
2.	Release of particles (aerosols) from industrial and agricultural practices due to industrial emission and spray of pesticides	It will pollute the air, will cause acid rain and smog.
3.	Patterns of land use, e.g. urbanisation, agriculture, overgrasing, deforestation, etc.	It will cause Desertification of soil, will reduce rainfall and O_3 level in atmosphere.

Weaker responses generally mentioned the effect of human activity but not in terms of climate but the effects were general such as increase in pollution, resulting in water logging and salinity, increased air pollution effecting human lives etc. As the question was specific in terms of climate; thus, the given responses did not account for any marks.

Example:

	Human Activity	Effect on Climate
1.	Release of carbon dioxide by burning fossil fuels and use of refrigerators	It creates Air pollution due to which there is imbalance of oxygen & Carbondioxide in air.
2.	Release of particles (aerosols) from industrial and agricultural practices due to industrial emission and spray of pesticides	It creates water pollution - industrial waste is thrown into water bodies & agricultural fields are washed off by rainwater into water bodies.
3.	Patterns of land use, e.g. urbanisation, agriculture, overgrasing, deforestation, etc.	Land Pollution - due to which there is soil erosion or problems like water logging & salinity arises.

Question 4:

Explain any TWO reasons that led to the promulgation of martial law in Pakistan in 1958?

Better responses were those which correctly mentioned the reasons that led to the promulgation of martial law which included unstable political conditions, failure of parliamentary democracy, lack of economic progress in the country, political rivalry/ mistrust between East Pakistan and West Pakistan, immature political attitude of politicians, corruption etc.

Example:

1) Ayub Khan imposed martial law in 1958 due to parliamentary form of government which was unclear to people and they didn't have political awarness regarding it because they were more close to presidential form. This caused law and order problem in Pakistan
2) President was interfering in the powers of Prime Minister. Moreover Central and provincial assemblies also quarreled over power. Therefo martial law was imposed.

- Because of the Pakistan and India's relationship. there relations was not good with each other due to Kashmir issue, and due to many more things.
- To maintain the country, to govern a country good, To tell them about Unity and brotherhood among people and for good relations of Pakistan with other countries.

Weaker responses could not comprehend the question as it seemed that a few of the candidates were not aware of the word promulgation; this might have created the confusion. Moreover, the candidates mentioned common reasons behind the imposition of martial law such as inability to govern the country without explaining what it entails.

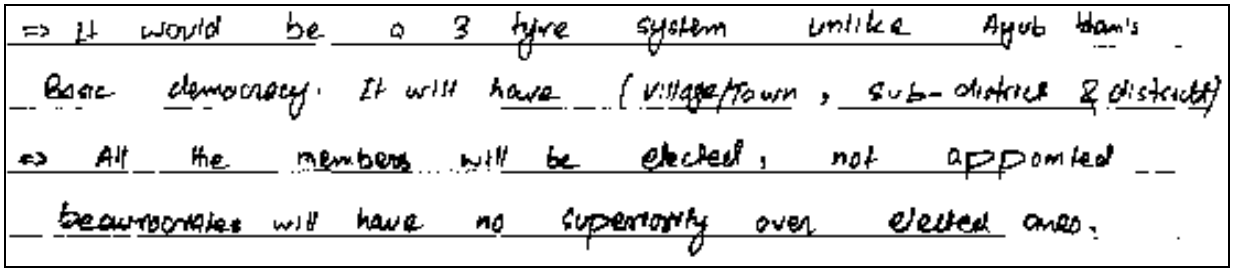

Question 6:

List any TWO widely spoken languages in Balochistan apart from Balochi language.

Question 5:

Mention any TWO features of the local government system introduced by General Pervez Musharraf's government in 2000.

Example:

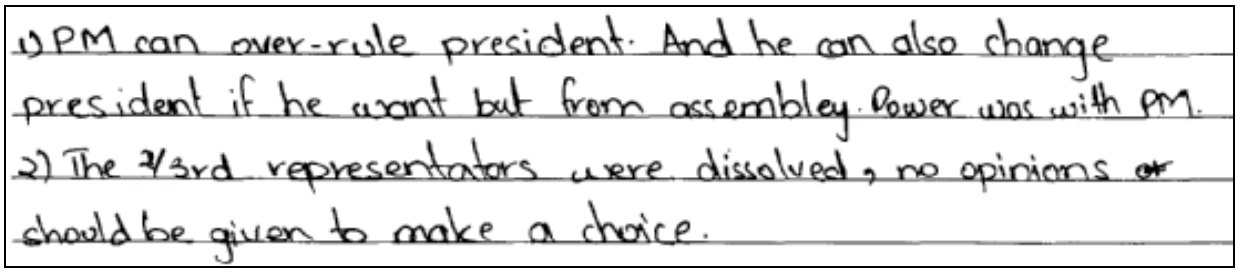

Better responses appropriately mentioned the features of local government system 2000. Candidates mentioned that there were allocation of seats for women/ peasants and farmers, there was no provincial intervention; police was bound to accept orders of nazims. Candidates mentioned about decentralisation of specified taxation powers, direct elections, single-non transferrable vote, creation of three countrywide levels of governments etc.

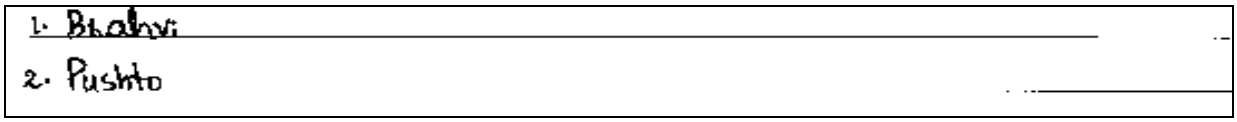

Example:

Weaker responses instead of being specific, mentioned the features which were true for all type of devolution that is it devolved the power to the grass root level. Some responses also included the amendments that were made by General Pervez Musharraf in the constitution which has nothing to do with the devolution of power.

Example:

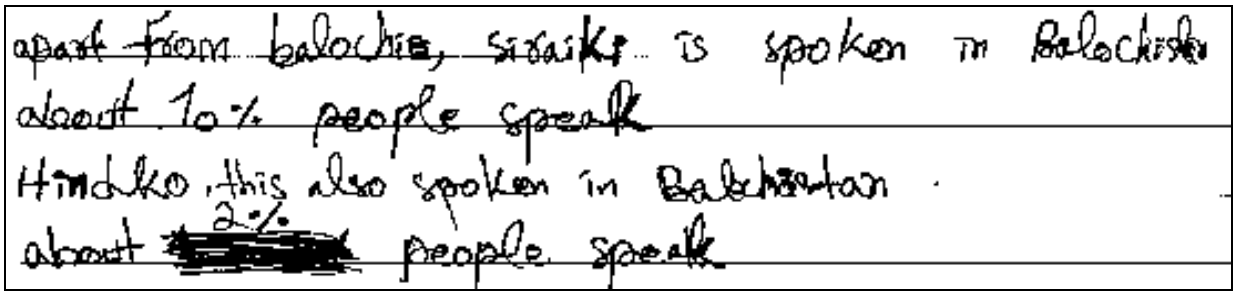

Better responses clearly mentioned the languages that were spoken in Balochistan i.e. Brahui, Pashto and Hazaragi (Dari).

Example:

There were few *weaker responses* which showed that the candidates did not read the question well and mentioned Balochi as the language. This could also be due to their lack of knowledge of the language spoken.

Example:

Question 7:

Mention any TWO positive and TWO negative effects of inflation on a country's economy?

Better responses reflected understanding of candidates in terms of inflation. Though this was an economic concept, yet the candidates were able to answer the question pretty effectively. The negative effects included difficultly for consumers to purchase more goods, reduction in the living standard and purchasing power of people, increase in tax bracket, decline in national savings, increase in import expenditure, increase in crime rate etc. Whereas the positive effect included increase in investment in the country, may cause increase in inventions and innovations, interest rate will increase etc.

Example:

Positive Effects:

1. Due to inflation, the economy tries to produce and manufacture more goods so as to increase the amount of production and to decrease prices. More industrialization.
2. The ~~export of goods~~ employeement increases as there is a push from inflation. It will also promote national integration as all of the citizen would unify against this issue. So industries will develop, more production.

Negative Effects:

1. Due to inflation, poor people ~~strive~~ strive for basic necessities as they are unable to afford it. Poverty increases. Development in economy ceases.
2. Due to inflation the demand of the local products decreases. Instead the imports are increased. Economy gets unstable. GDP reduces, negative balance of payment.

Weaker responses were the ones where the candidates instead of highlighting the effects of inflation mentioned the reasons due to which inflation takes place. Some of the responses even reflected that the candidates were not aware of this term.

Example:

Positive Effects:

1. Two countries are sharing product with each other in the import and export.
2. Relation b/w two country is better.

Negative Effects:

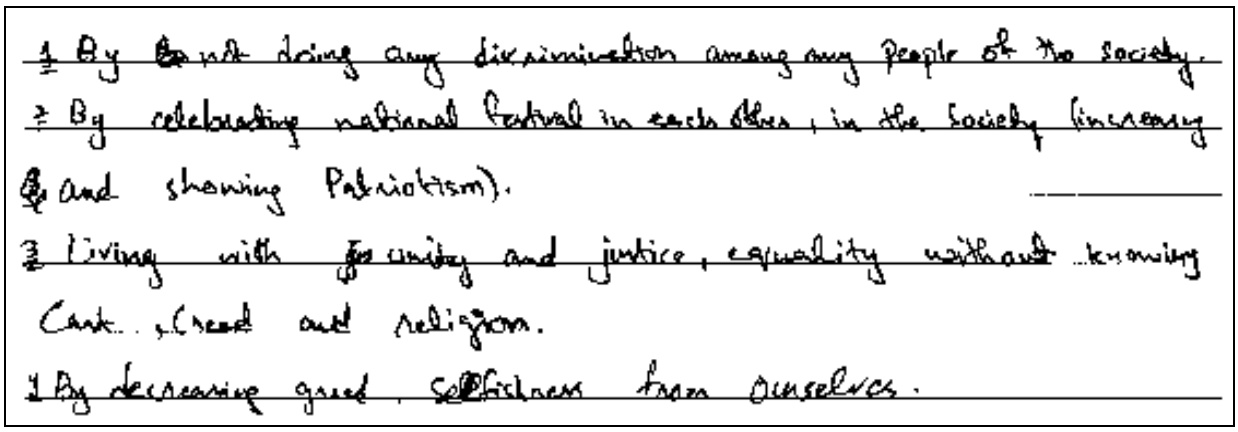

1. Soil exosion. and the country's donot sharing product with each other in the import and export.
2. Uses of fertilizers and ~~of~~ the relation b/w ~~to~~ two contries is ~~not~~ not good.

Question 8:

Suggest any THREE ways in which an individual can contribute to strengthening national integration in a country.

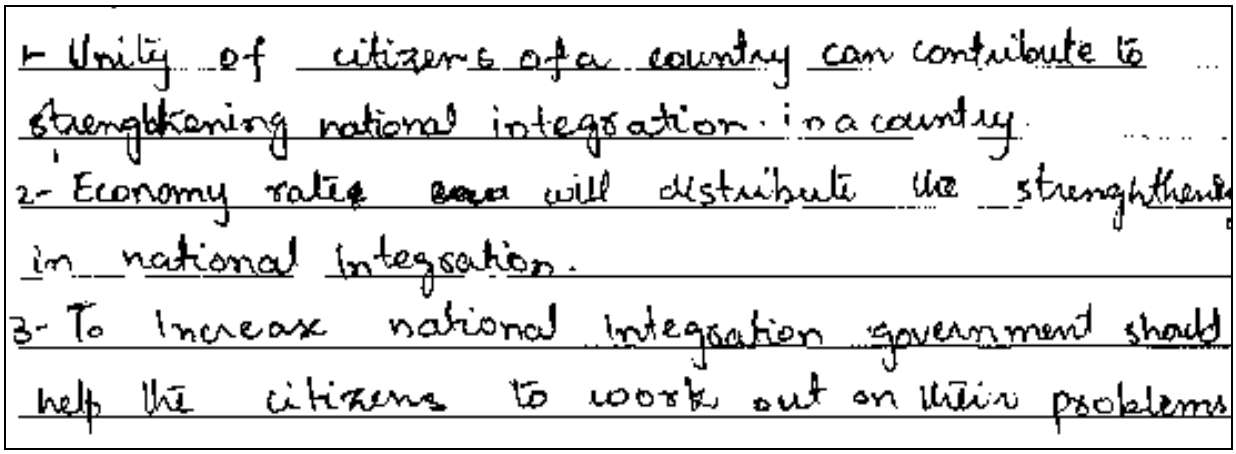

Better response carried interesting suggestions in terms of strengthening national integration. For example, the candidate wrote about respect of diversity, more weightage to national interest than personal self-interest etc. The responses reflected the sense of maturity amongst the candidates in relation to the country.

Example:

1 By not doing any discrimination among any people of the society.
2 By celebrating national festival in each other, in the society (increasing & and showing Patriotism).
3 Living with fraternity and justice, equality without knowing Caste, Creed and religion.
1 By decreasing greed, selfishness from ourselves.

Weaker response reflected the poor attention that the candidates gave while reading the questions. Some of the responses were towards why do we need national integration and some responses gave suggestions which involved the working of government rather than an individual.

Example:

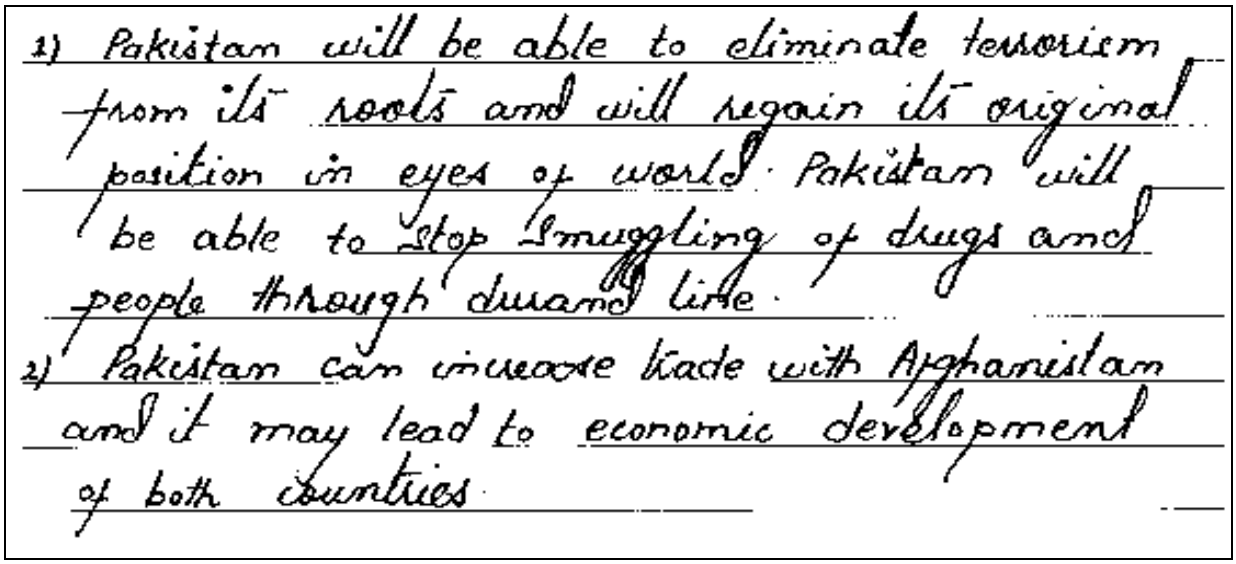

1- Unity of citizens of a country can contribute to strengthening national integration in a country.
2- Economy rates can will distribute the strengthen in national Integration.
3- To Increase national Integration government should help the citizens to work out on their problems

Question 9:

Explain any TWO benefits that Pakistan would reap if Afghanistan joins China-Pakistan Economic Corridor (CPEC)?

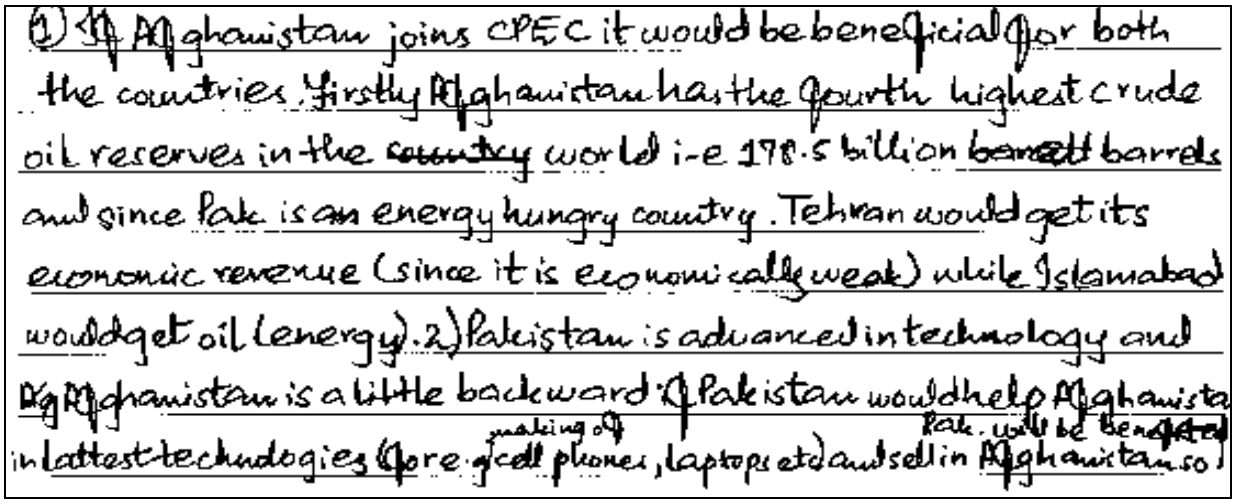

Better response reflected the understanding of CPEC that how it can benefit Pakistan through multiple options. Candidates mentioned that improved relationship between both the countries that is Pakistan and Afghanistan will be helpful in benefiting the refugees, there will be no security threat/ level of hostility/ border tension with Afghanistan, curbing smuggling and more systematic trade will occur between both the countries. Candidates also wrote that there will be new economic market for Pakistan i.e. relations with Central Asian countries can be enhanced for trading purpose etc.

Example:

1) Pakistan will be able to eliminate terrorism from its roots and will regain its original position in eyes of world. Pakistan will be able to stop smuggling of drugs and people through duuand line.
2) Pakistan can increase trade with Afghanistan and it may lead to economic development of both countries.

Weaker response showed that the candidates were confused between the relationships of Afghanistan and Iran and wrote about trade relations in terms of oil and others which are not true for Afghanistan. Some of the responses even mentioned benefit that can be reaped by Afghanistan rather than Pakistan. For example, Afghanistan will be able to have good relations with Pakistan and other countries in surrounding; Afghanistan can provide more job opportunities to its people if it will join hands with Pakistan. etc.

Example:

(1) If Afghanistan joins CPEC it would be beneficial for both the countries. Firstly Afghanistan has the fourth highest crude oil reserves in the country world i-e 178.5 billion barrels and since Pak is an energy hungry country. Tehran would get its economic revenue (since it is economically weak) while Islamabad would get oil (energy). 2) Pakistan is advanced in technology and Afghanistan is a little backward. If Pakistan would help Afghanista in lattest technologies (for e.g making of cell phones, laptops etc) and sell in Afghanistan so Pak. will be benefited

Extended Response Questions (ERQs)

This question offered a choice between part **a** and **b**. Part **a** was based on history whereas part **b** was from the topic of economic development. Majority of the candidates attempted option **b** and did well.

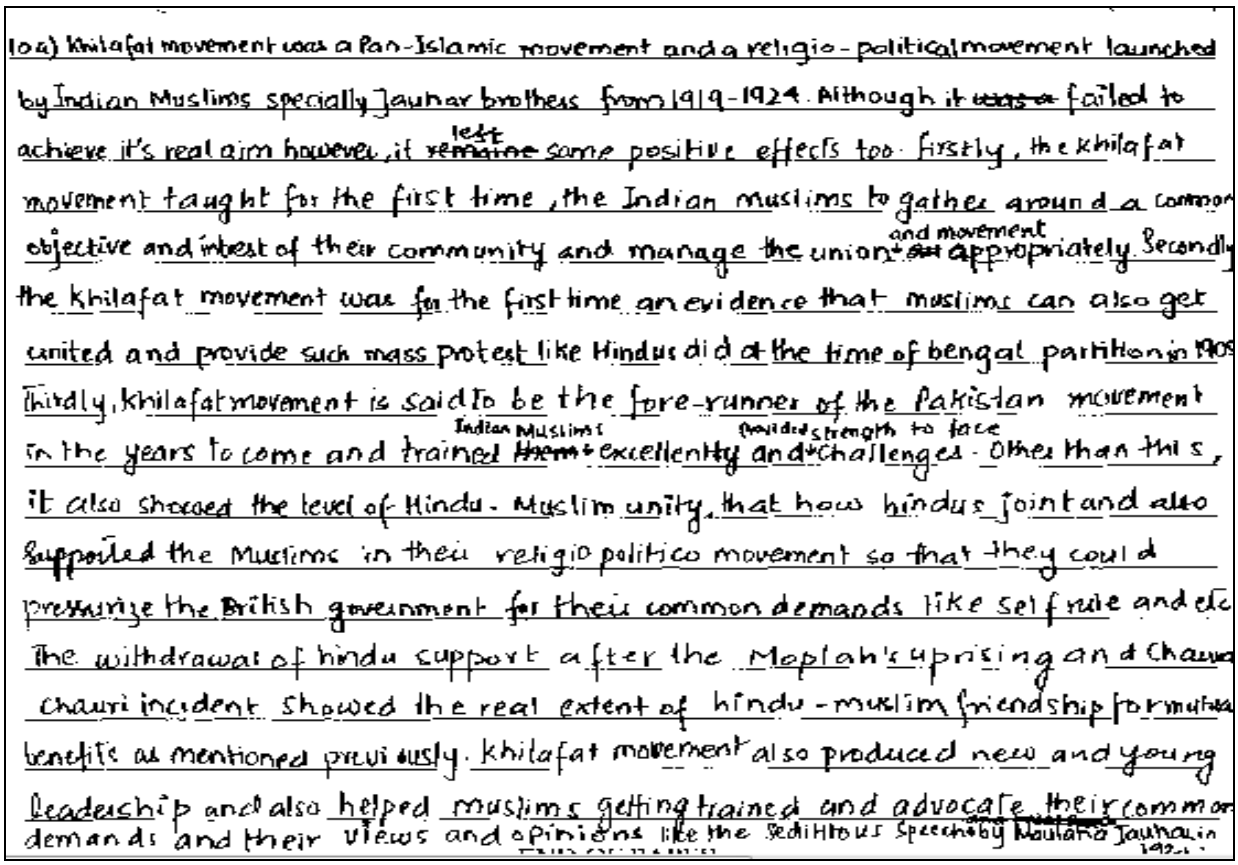

Question 10a:

The Khilafat Movement (1919-1924) failed to achieve its immediate objectives but it left lasting impact on the politics of the subcontinent.

Explain the benefits reaped by the Indian Muslims from the Khilafat Movement in the long run.

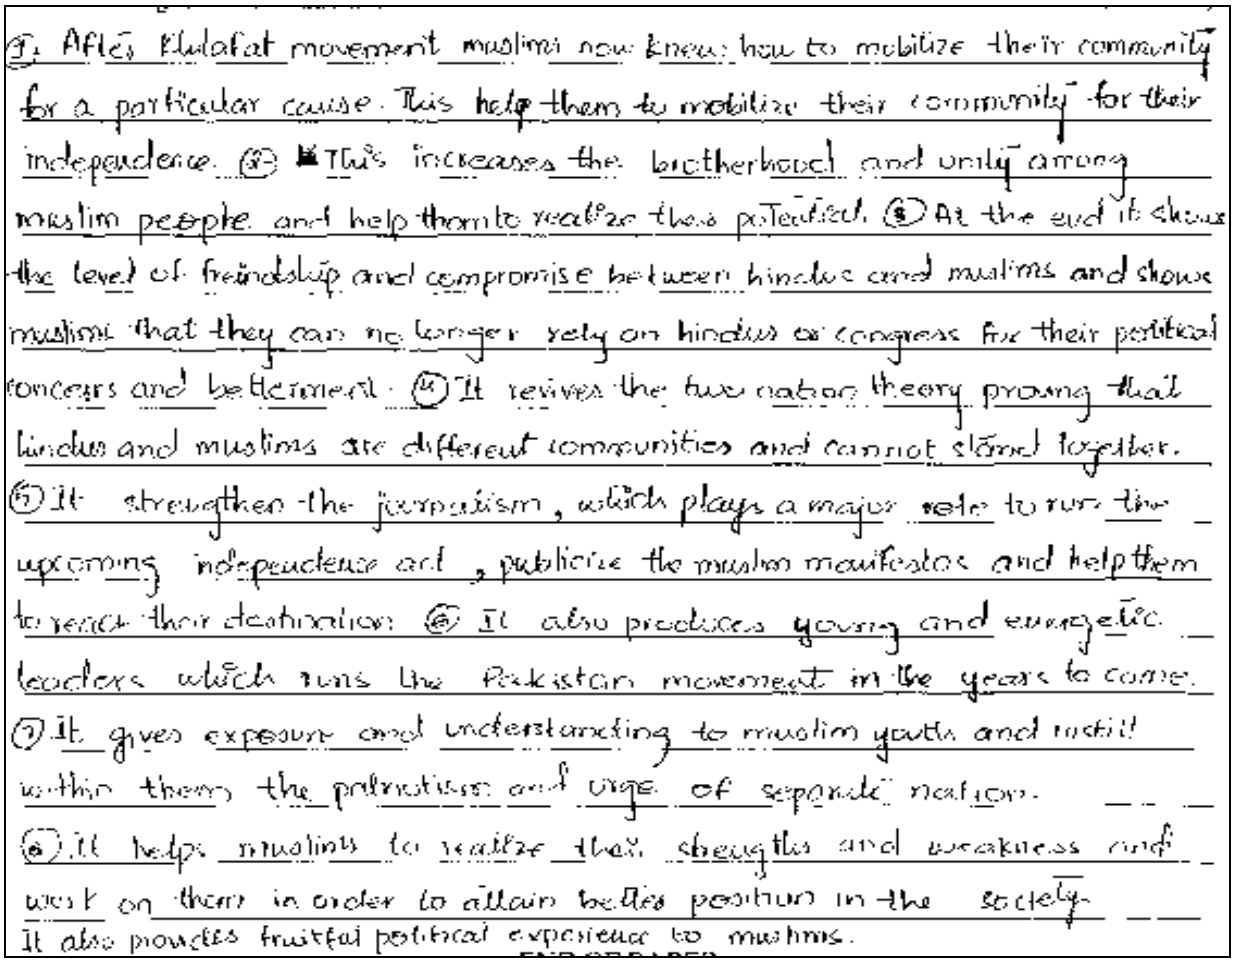

Better responses mentioned how the khilafat movement was beneficial for the Indian Muslims. Candidates mentioned that it created a general awareness and self-confidence among the Muslims of India. They also wrote that this movement contributed in awakening the sense of political understanding in the Muslims of India, it led to produce leaders who were key figures in Pakistan movement and it boasted journalism as the publication of many magazines and newspapers started under the patronage of Muslim community. Candidates also mentioned that it made the Muslims of India realise that they could now no longer rely on the British and Hindus for the protection of their rights.

Example 1:

10a) Khilafat movement was a Pan-Islamic movement and a religio-political movement launched by Indian Muslims specially Jauhar brothers from 1919-1924. Although it was failed to achieve it's real aim however, it left some positive effects too. Firstly, the khilafat movement taught for the first time, the Indian muslims to gather around a common objective and intrest of their community and manage the union and movement appropriately. Secondly the khilafat movement was for the first time an evidence that muslims can also get united and provide such mass protest like Hindus did at the time of bengal partition in 1905. Thirdly, khilafat movement is said to be the fore-runner of the Pakistan movement in the years to come and trained Indian Muslims excellently and provided strength to face challenges. Other than this, it also showed the level of Hindu-Muslim unity, that how hindus joint and also supported the Muslims in their religio politico movement so that they could pressurize the British government for their common demands like self rule and etc. The withdrawal of hindu support after the Moplah's uprising and Chauri chauri incident showed the real extent of hindu-muslim friendship for mutual benefits as mentioned previously. khilafat movement also produced new and young leadership and also helped muslims getting trained and advocate their common demands and their views and opinions like the seditious speech by Maulana Jauhar in 1921.

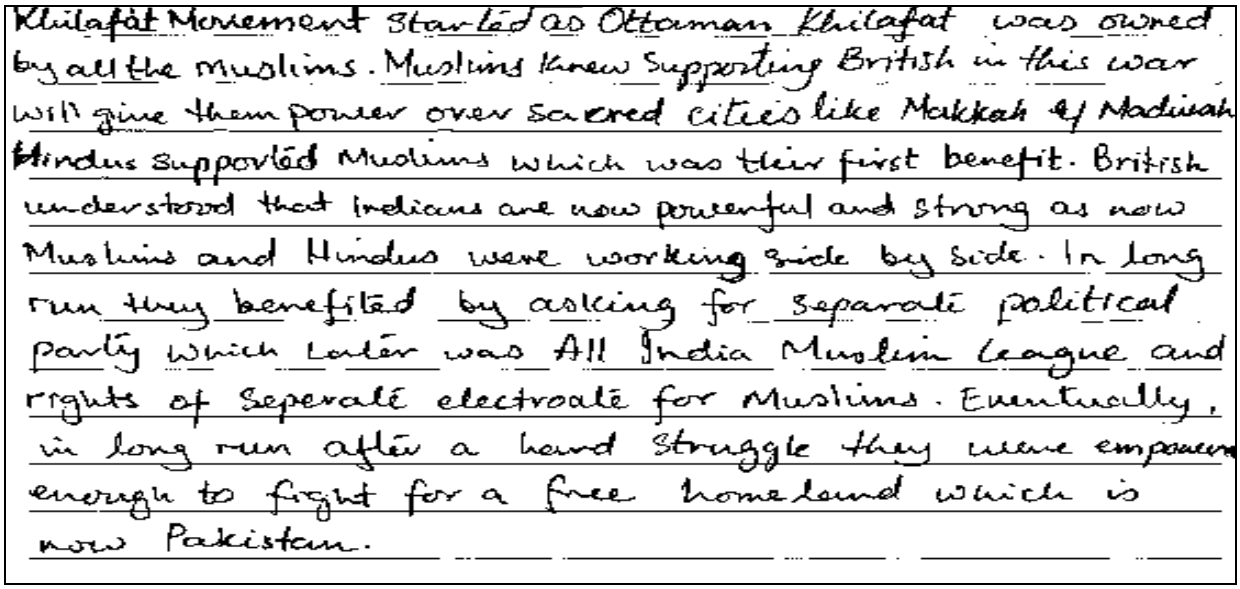

Example 2:

① After Khilafat movement muslims now knew how to mobilize their community for a particular cause. This help them to mobilize their community for their independence. ② This increases the brotherhood and unity among muslim people and help them to realize these potential. ③ At the end it shows the level of friendship and compromise between hindus and muslims and shows muslims that they can no longer rely on hindus or congress for their political concerns and betterment. ④ It revives the two nation theory proving that hindus and muslims are different communities and cannot stand together. ⑤ It strengthen the journalism, which plays a major role to run the upcoming independence act, publicize the muslim manifestos and help them to reach their destination. ⑥ It also produces young and energetic leaders which runs the Pakistan movement in the years to come. ⑦ It gives exposure and understanding to muslim youth and instill within them the patriotism and urge of separate nation. ⑧ It helps muslims to realize their strengths and weakness and work on them in order to attain better position in the society. It also provides fruitful political experience to muslims.

Weaker responses simply highlighted the reason which initiated the Khilafat movement. Some of the responses mentioned the events rather than reflecting of the demand of the questions. Candidates wrote about the impacts of this movement which were negative in nature. For example, Khilafat was abolished not by British but by Turks themselves, religious leaders for the time being vanished from political arena. etc.

Example:

Khilafat Movement started as Ottaman Khilafat was owned by all the muslims. Muslims knew supporting British in this war will give them power over sacred cities like Makkah & Madinah Hindus supported Muslims which was their first benefit. British understood that Indians are now powerful and strong as now Muslims and Hindus were working side by side. In long run they benefited by asking for separate political party which later was All India Muslim League and rights of seperate electroate for Muslims. Eventually, in long run after a hard struggle they were empower enough to fight for a free homeland which is now Pakistan.

Question 10b:

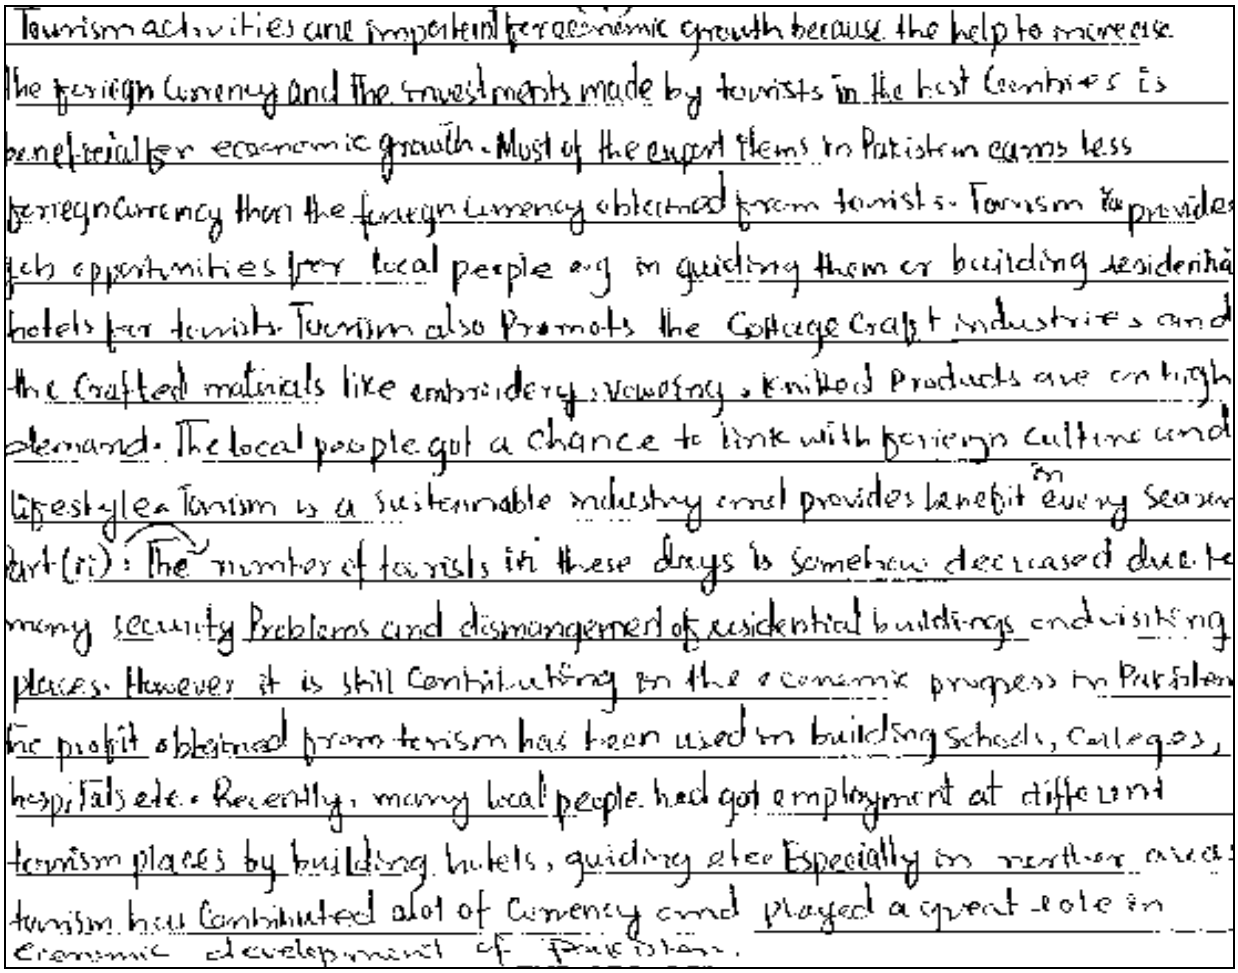

i. Why are tourism activities considered to be important sources of economic growth?

ii. What is the current situation and contribution of international tourism in the economic growth of Pakistan?

Better responses comprised of generating income, employment, investment and exports, infrastructure and local community facilities. Tourism supplements the foreign exchange earnings which are considered to the important sources of economic growth through tourism.

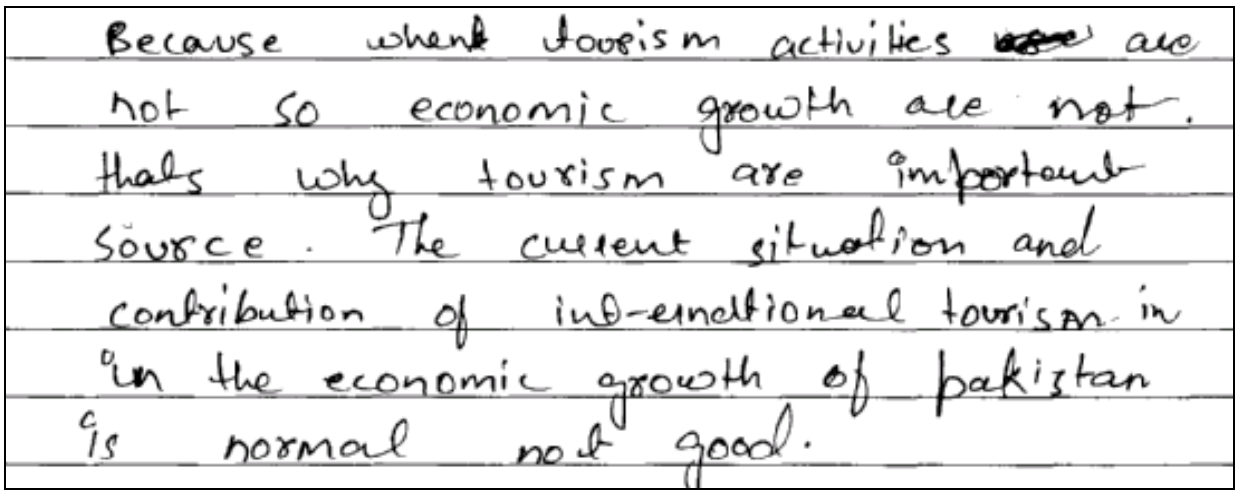

The answer to the second part of the question was well-informed as the candidates mentioned the reasons for the decline and how it has improved in the recent years. The candidates were able to mention that Pakistan has many tourist attractions places including Swat, Kalam, Malam Jaba, Shangla, Balakot, Ayubia, Murri, Chitral, Gilgit, Naran and Kaghan valleys, and other mountains ranges, historical, and archaeological places in the other parts of the country. Some candidates also mentioned that International tourism is highly dependent on peace and security and currently Pakistan is facing problems in relation to security that is adversely affecting international tourism.

Example:

Tourism activities are important for economic growth because the help to increase the foreign Currency and the investments made by tourists in the host Countries is beneficial for economic growth. Most of the export items in Pakistan earns less foreign Currency than the foreign Currency obtained from tourists. Tourism is provides job opportunities for local people eg in guiding them or building residential hotels for tourists. Tourism also Promots the Cottage Craft Industries and the Crafted materials like embroidery, Weaving, Knitted Products are on high demand. The local people got a chance to link with foreign culture and lifestyle. Tourism is a sustainable industry and provides benefit in every season. Part (ii): The number of tourists in these days is somehow decreased due to many security Problems and dismangement of residential buildings and visiting places. However it is still Contributing in the economic progress in Pakistan. The profit obtained from tourism has been used in building schools, Colleges, hospitals etc. Recently, many local people had got employment at different tourism places by building hotels, guiding also. Especially in northern areas tourism has Contributed alot of Currency and played a great role in economic development of Pakistan.

Weaker responses showed a complete lack of understanding. They were not able to associate the importance of tourism with the economic growth nor were aware about the current situation. Candidates mentioned the benefits of tourism that due to tourism infrastructure will be developed, schools will be made and job opportunities will be provided to the people and hence their living standard will be increased. These pointers were not the requirement of the question.

Example:

Because when tourism activities ~~are~~ are not so economic growth are not. thats why tourism are important source. The current situation and contribution of int-enational tourism in in the economic growth of pakistan is normal not good.
